Ferrellgas Finance Corp.

(Exact name of registrants as specified in their charters)

Delaware 43-1698480  
Delaware 43-1698481  
Delaware 43-1742520  
Delaware 14-1866671

(States or other jurisdictions of incorporation or organization) (I.R.S. Employer Identification Nos.)

One Liberty Plaza 64068  
Liberty, Missouri (Zip Code)  
(Address of principal executive office)

Registrants' telephone number, including area code:  
(816) 792-1600

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol	Name of each exchange on which registered
N/A	N/A	N/A

Securities registered pursuant to section 12(g) of the Act:

None.

Indicate by check mark if the registrants are well-known seasoned issuers, as defined in Rule 405 of the Securities Act.

Ferrellgas Partners, L.P.: Yes  No

Ferrellgas, L.P., Ferrellgas Partners Finance Corp. and Ferrellgas Finance Corp.: Yes  No

Indicate by check mark if the registrants are not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrants were required to file such reports), and (2) have been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrants have submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrants were required to submit such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Ferrellgas Partners, L.P.:

Large Accelerated Filer  Accelerated Filer  Non-accelerated Filer  Smaller Reporting Company  Emerging Growth Company

Ferrellgas, L.P., Ferrellgas Partners Finance Corp. and Ferrellgas Finance Corp.:

Large Accelerated Filer  Accelerated Filer  Non-accelerated Filer  Smaller Reporting Company  Emerging Growth Company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

Indicate by check mark whether the registrants are shell companies (as defined in Rule 12b-2 of the Exchange Act).

Ferrellgas Partners, L.P. and Ferrellgas, L.P. Yes  No

Ferrellgas Partners Finance Corp. and Ferrellgas Finance Corp. Yes  No

The aggregate market value as of January 31, 2022, of Ferrellgas Partners, L.P.'s common units held by nonaffiliates of Ferrellgas Partners, L.P., based on the reported closing price of such units on the OTC Pink Market on such date, was approximately \$59,054,417. There is no aggregate market value of the common equity of Ferrellgas, L.P., Ferrellgas Partners Finance Corp. and Ferrellgas Finance Corp. as their common equity is not sold or traded.

At August 31, 2022, the registrants had common units or shares of common stock outstanding as follows:

Ferrellgas Partners, L.P.	4,857,605	Class A Units
	1,300,000	Class B Units
Ferrellgas, L.P.	n/a	n/a
Ferrellgas Partners Finance Corp.	1,000	Common Stock
Ferrellgas Finance Corp.	1,000	Common Stock

Documents Incorporated by Reference: None

EACH OF FERRELLGAS PARTNERS FINANCE CORP. AND FERRELLGAS FINANCE CORP. MEET THE CONDITIONS SET FORTH IN GENERAL INSTRUCTION I(1) (A) AND (B) OF FORM 10-K AND ARE THEREFORE, FILING THIS FORM 10-K WITH THE REDUCED DISCLOSURE FORMAT WITH RESPECT TO EACH SUCH REGISTRANT.

## **EXPLANATORY NOTE**

This report combines the annual reports on Form 10-K for the year ended July 31, 2022 of Ferrellgas Partners, L.P. together with its consolidated subsidiaries, including Ferrellgas, L.P., Ferrellgas Partners Finance Corp., and Ferrellgas Finance Corp. Unless stated otherwise or the context otherwise requires, references to “Ferrellgas Partners” refers to Ferrellgas Partners, L.P. itself, without its consolidated subsidiaries. References to the “operating partnership” mean Ferrellgas, L.P., together (except where the context indicates otherwise) with its consolidated subsidiaries, including Ferrellgas Finance Corp. The terms “us,” “we,” “our,” “ours,” “consolidated,” the “Company” or “Ferrellgas” refer to Ferrellgas Partners, L.P. together with its consolidated subsidiaries, including Ferrellgas, L.P., Ferrellgas Partners Finance Corp. and Ferrellgas Finance Corp., except when used in connection with “Class A Units” or Class B Units,” in which case these terms refer to Ferrellgas Partners, L.P. without its consolidated subsidiaries.

Ferrellgas Partners is a publicly traded Delaware limited partnership formed in 1994 and is primarily engaged in the retail distribution of propane and related equipment sales. Our Class A Units are traded on the OTC Pink Market under the symbol “FPGR.” The operating partnership was formed on April 22, 1994, and accounts for substantially all of our consolidated assets, sales and operating earnings, except for interest expense related to the Ferrellgas Partners Notes during the relevant historical periods.

Ferrellgas Partners is a holding entity that conducts no operations and has two direct subsidiaries, the operating partnership and Ferrellgas Partners Finance Corp. Our activities are primarily conducted through the operating partnership. Ferrellgas Partners and the Preferred Unitholders are the only limited partners of the operating partnership. Ferrellgas, Inc. is the sole general partner of Ferrellgas Partners and the operating partnership and, excluding the economic interests attributable to the Class B Units and the Preferred Units, owns an approximate 1% general partner economic interest in each, and, therefore, an effective 2% general partner economic interest in the operating partnership. Excluding the economic interests attributable to the Preferred Units, Ferrellgas Partners owns an approximate 99% limited partner interest in the operating partnership.

Our general partner performs all management functions for us. The parent company of our general partner, Ferrell Companies, currently beneficially owns approximately 23.4% of our outstanding Class A Units. Ferrell Companies is owned 100% by an employee stock ownership trust.

We believe that combining the annual reports on Form 10-K for these entities provides the following benefits:

- enhances investors’ understanding of Ferrellgas Partners and the operating partnership by enabling investors to view the business as a whole in the same manner that management views and operates the business;
- eliminates duplicative disclosure and provides a more streamlined and readable presentation, since a substantial portion of the disclosure applies to both Ferrellgas Partners and the operating partnership; and
- creates time and cost efficiencies through the preparation of a combined presentation.

To help investors understand the differences between Ferrellgas Partners and the operating partnership, this report provides separate consolidated financial statements for Ferrellgas Partners and the operating partnership. Noncontrolling interests, Class A Units, Class B Units, shareholders’ equity (deficit) and partners’ capital (deficit) are the main areas of difference between the consolidated financial statements of Ferrellgas Partners and those of the operating partnership. A single set of notes to consolidated financial statements is presented that includes separate discussions for Ferrellgas Partners and the operating partnership, when applicable. A combined Management’s Discussion and Analysis of Financial Condition and Results of Operations section is also included that presents combined information and discrete information related to each entity, as applicable.

In order to highlight the differences between Ferrellgas Partners and the operating partnership, this report includes the following sections that provide separate financial information for Ferrellgas Partners

and the operating partnership:

- consolidated financial statements; and
- certain accompanying notes to consolidated financial statements, which denote “Ferrellgas Partners” and “The operating partnership” in sections where applicable.

**PART I**  
**References and Defined Terms**

In this Annual Report on Form 10-K:

- “us,” “we,” “our,” “ours,” “consolidated,” the “Company” or “Ferrellgas” are references to Ferrellgas Partners, L.P. together with its consolidated subsidiaries, including Ferrellgas, L.P., Ferrellgas Partners Finance Corp. and Ferrellgas Finance Corp., except when used in connection with “Class A Units” or “Class B Units,” in which case these terms refer to Ferrellgas Partners, L.P. without its consolidated subsidiaries;
- “Ferrellgas Partners” refers to Ferrellgas Partners, L.P. itself, without its consolidated subsidiaries;
- the “operating partnership” refers to Ferrellgas, L.P., together (except where the context indicates otherwise) with its consolidated subsidiaries, including Ferrellgas Finance Corp.;
- our “general partner” refers to Ferrellgas, Inc.;
- “Ferrell Companies” refers to Ferrell Companies, Inc., the sole shareholder of our general partner;
- “Board of Directors” or “Board” refers to the board of directors of our general partner, except where the context indicates otherwise;
- “GAAP” refers to accounting principles generally accepted in the United States;
- “retail sales” refers to Propane and other gas liquid sales: Retail — Sales to End Users or the volume of propane sold primarily to our residential, industrial/commercial and agricultural customers;
- “wholesale sales” refers to Propane and other gas liquid sales: Wholesale — Sales to Resellers or the volume of propane sold primarily to our portable tank exchange customers and bulk propane sold to wholesale customers;
- “other gas sales” refers to Propane and other gas liquid sales: Other Gas Sales or the volume of bulk propane sold to other third-party propane distributors or marketers and the volume of refined fuel sold;
- “propane sales volume” refers to the volume of propane sold to our retail sales and wholesale sales customers;
- “Class A Units” refers to the Class A Units of Ferrellgas Partners, one of which was issued for every twenty of Ferrellgas Partners’ then-outstanding common units in a 1-for-20 reverse unit split effected on March 30, 2021;
- “Class B Units” refers to the Class B Units of Ferrellgas Partners;
- “Preferred Units” refers to the Senior Preferred Units of the operating partnership;
- “Unitholders” or “unitholders” refers to holders of Class A Units, holders of Class B Units or holders of Preferred Units, as indicated or as the context requires for each such reference; and
- references to any fiscal year are to the fiscal year ended or ending on July 31 of the applicable year.

Also, the following terms that are used throughout this Annual Report on Form 10-K are defined in Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations”:

- Amended Ferrellgas Partners LPA
- Amended OpCo LPA
- Credit Agreement
- Credit Facility
- Effective Date
- Ferrellgas Partners Notes
- OpCo LPA Amendment
- OpCo Notes

### **Forward-looking Statements**

Statements included in this report include forward-looking statements. These forward-looking statements are identified as any statement that does not relate strictly to historical or current facts. These statements often use words such as “anticipate,” “believe,” “intend,” “plan,” “projection,” “forecast,” “strategy,” “position,” “continue,” “estimate,” “expect,” “may,” “will,” or the negative of those terms or other variations of them or comparable terminology. These statements often discuss plans, strategies, events or developments that we expect or anticipate will or may occur in the future and are based upon the beliefs and assumptions of our management and on the information currently available to them. In particular, statements, express or implied, concerning our future operating results or financial position or our ability to generate sales, income or cash flow are forward-looking statements.

Forward-looking statements are not guarantees of performance. You should not put undue reliance on any forward-looking statements. All forward-looking statements are subject to risks, uncertainties and assumptions that could cause our actual results to differ materially from those expressed in or implied by these forward-looking statements. Many of the factors that will affect our future results are beyond our ability to control or predict. Some of the risk factors that may affect our business, financial condition or results of operations include:

- the effect of weather conditions on the demand for propane;
- the prices of wholesale propane, motor fuel and crude oil;
- disruptions to the supply of propane;
- competition from other industry participants and other energy sources;
- energy efficiency and technology advances;
- significant delays in the collection of accounts or notes receivable;
- customer, counterparty, supplier or vendor defaults;
- changes in demand for, and production of, hydrocarbon products;
- increased trucking and rail regulations;
- inherent operating and litigation risks in gathering, transporting, handling and storing propane;
- our inability to complete acquisitions or to successfully integrate acquired operations;
- costs of complying with, or liabilities imposed under, environmental, health and safety laws;
- the impact of pending and future legal proceedings;
- the interruption, disruption, failure or malfunction of our information technology systems including due to cyber-attack;
- the impact of changes in tax law that could adversely affect the tax treatment of Ferrellgas Partners for federal income tax purposes;
- economic and political instability, particularly in areas of the world tied to the energy industry;
- disruptions in the capital and credit markets; and
- access to available capital to meet our operating and debt service requirements.

When considering any forward-looking statement, you should also keep in mind the risk factors set forth in “Item 1A. Risk Factors.” Any of these risks could impair our business, financial condition or results of operations. Any such impairment may affect our ability to make distributions to our unitholders or pay interest on the principal of any of our debt securities. In addition, the trading price of our securities could decline as a result of any such impairment.

Except for our ongoing obligations to disclose material information as required by federal securities laws, we undertake no obligation to update any forward-looking statements or risk factors after the date of this Annual Report on Form 10-K.

---

### **ITEM 1. BUSINESS.**

#### **Overview**

Ferrellgas Partners is a publicly traded Delaware limited partnership formed in 1994 and is primarily engaged in the retail distribution of propane and related equipment sales. Our Class A Units are traded on the OTC Pink Market under the symbol “FPGR”.

Ferrellgas Partners is a holding entity that conducts no operations and has two direct subsidiaries, the operating partnership and Ferrellgas Partners Finance Corp. Our activities are primarily conducted through the operating partnership. Ferrellgas Partners and the Preferred Unitholders are the only limited partners of the operating partnership. Ferrellgas, Inc. is the sole general partner of Ferrellgas Partners and the operating partnership and, excluding the economic interests attributable to the Class B Units and the Preferred Units, owns an approximate 1% general partner economic interest in each, and, therefore, an effective 2% general partner economic interest in the operating partnership. Excluding the economic interests attributable to the Preferred Units, Ferrellgas Partners owns an approximate 99% limited partner interest in the operating partnership. For information regarding the economic and other terms of the Class B Units and the Preferred Units, see [Note J – Equity \(Deficit\)](#) and [Note I – Preferred units](#) – to our consolidated financial statements included elsewhere herein.

Our general partner performs all management functions for us. The parent company of our general partner, Ferrell Companies, currently beneficially owns approximately 23.4% of our outstanding Class A Units. Ferrell Companies is owned 100% by an employee stock ownership trust.

The operating partnership was formed on April 22, 1994, and accounts for substantially all of our consolidated assets, sales and operating earnings, except for interest expense related to the Ferrellgas Partners Notes during the relevant historical periods.

#### ***Business***

We are a leading distributor of propane and related equipment and supplies to customers in the United States. We believe that we are the second largest retail marketer of propane in the United States as measured by the volume of our retail sales in fiscal 2022 and a leading national provider of propane by portable tank exchange.

We serve residential, industrial/commercial, portable tank exchange, agricultural, wholesale and other customers in all 50 states, the District of Columbia and Puerto Rico. Our operations primarily include the distribution and sale of propane and related equipment and supplies with concentrations in the Midwest, Southeast, Southwest and Northwest regions of the United States. Sales from propane distribution are generated principally from transporting propane purchased from third parties to propane distribution locations and then to tanks on customers’ premises or to portable propane tanks delivered to nationwide and local retailers. Sales from portable tank exchanges, nationally branded under the name Blue Rhino, are generated primarily through a network of partnership-owned distribution outlets and to a lesser extent through independently-owned distribution outlets. Our market areas for our residential and agricultural customers are generally rural while our market areas for our industrial/commercial and portable tank exchange customers are generally urban.

In the residential and industrial/commercial markets, propane is primarily used for space heating, water heating, cooking and other propane fueled appliances. In the portable tank exchange market, propane is used primarily for outdoor cooking using gas grills. In the agricultural market, propane is primarily used for crop drying, space heating, irrigation and weed control. In addition, propane is used for a variety of industrial applications, including as an engine fuel burned in the internal combustion engines of vehicles and forklifts and as a heating or energy source in manufacturing and drying processes.

A substantial majority of our gross margin from propane and other gas liquids sales is derived from the distribution and sale of propane and related risk management activities. Our gross margin from the retail

distribution of propane is primarily based on the cents-per-gallon difference between the sales price we charge our customers and our costs to purchase and deliver propane to our propane distribution locations.

## [Table of Contents](#)

The distribution of propane to residential customers generally involves large numbers of small volume deliveries. Our retail deliveries of propane are typically transported from our retail propane distribution locations to our customers by our fleet of bulk delivery trucks, which are generally fitted with tanks ranging in size from 2,600 to 3,500 gallons. Propane storage tanks located on our customers' premises are then filled from these bulk delivery trucks. We also deliver propane to our industrial/commercial and portable tank exchange customers using our fleet of portable tank and portable tank exchange delivery trucks, truck tractors and portable tank exchange delivery trailers.

We track "Propane sales volumes," "Revenues – Propane and other gas liquids sales" and "Gross Margin – Propane and other gas liquids sales" by customer; however, we are not able to specifically allocate operating and other costs by customer in a manner that would determine their specific profitability with a high degree of accuracy. The wholesale propane price per gallon is subject to various market conditions, including inflation, and may fluctuate based on changes in demand, supply and other energy commodity prices, primarily crude oil and natural gas, as propane prices tend to correlate with the fluctuations of these underlying commodities.

As of July 31, 2022, approximately 69% of our residential customers utilize our equipment, while the remainder own their tanks. Our rental terms and the fire safety regulations in some states require rented bulk tanks to be filled only by the propane supplier owning the tank. The cost and inconvenience of switching bulk tanks helps minimize a customer's tendency to switch suppliers of propane on the basis of minor variations in price, helping us minimize customer loss.

In addition, we lease tanks to some of our independent distributors involved with our delivery of propane for portable tank exchanges. Our owned and independent distributors provide portable tank exchange customers with a national delivery presence that is generally not available from most of our competitors.

In our past three fiscal years, our total annual propane sales volumes in gallons were:

Fiscal year ended	Propane sales volumes (in millions)
July 31, 2022	831
July 31, 2021	860
July 31, 2020	874

In fiscal 2022, no one customer accounted for 10% or more of our consolidated revenues.

We utilize marketing programs targeting both new and existing customers by emphasizing:

- our efficiency in delivering propane to customers;
- our employee training and safety programs;
- our enhanced customer service, facilitated by our technology platform and our 24 hours a day, seven days a week emergency retail customer call support capabilities; and
- our national distributor network for our commercial and portable tank exchange customers.

Some of our propane distribution locations also conduct the retail sale of propane appliances and related parts and fittings, as well as other retail propane related services and consumer products.

Our other activities in our propane operations and related equipment sales segment include the following:

- the sale of refined fuels, and
- common carrier services.

## [Table of Contents](#)

### *Effect of Weather and Seasonality*

Weather conditions have a significant impact on demand for propane for heating purposes during the months of November through March (the “winter heating season”). Accordingly, the volume of propane used by our customers for this purpose is directly affected by the severity of the winter weather in the regions we serve and can vary substantially from year to year. In any given region, sustained warmer-than-normal temperatures in the winter heating season will tend to result in reduced propane usage, while sustained colder-than-normal temperatures in the winter heating season will tend to result in greater usage. Although there is a strong correlation between weather and customer usage, general economic conditions in the United States and the wholesale price of propane can also significantly impact this correlation. Additionally, there is a natural time lag between the onset of cold weather and increased sales to customers. If the United States were to experience a cooling trend, we could expect nationwide demand for propane for heating purposes to increase which could lead to greater sales, income and cash flow. Conversely, if the United States were to experience a continued warming trend, we could expect nationwide demand for propane for heating purposes to decrease which could lead to a reduction in our sales, income and cash flow as well as impact our ability to maintain compliance with our debt covenants.

The market for propane is seasonal because of increased demand during the winter heating season primarily for the purpose of providing heating in residential and commercial buildings. Consequently, sales and operating profits are concentrated in our second and third fiscal quarters, which are during the winter heating season. However, our propane by portable tank exchange business experiences higher volumes in the spring and summer, which include the majority of the grilling season. These volumes add to our operating profits during our first and fourth fiscal quarters due to those counter-seasonal business activities. These sales also provide us the ability to better utilize our seasonal resources at our propane distribution locations. Other factors affecting our results of operations include competitive conditions, volatility in energy commodity prices, timing of acquisitions and general economic conditions in the United States.

We use information on temperatures to understand how our results of operations are affected by temperatures that are warmer or colder than normal. We define “normal” temperatures based on a 10-year average of information published by the National Oceanic and Atmospheric Administration. Based on this information we calculate a ratio of actual heating degree days to normal heating degree days. Heating degree days are a general indicator of weather impacting propane usage. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations” for weather trends compared to the prior fiscal year as well as to normal heating degree days.

We believe that our broad geographic distribution helps us reduce exposure to regional weather and economic patterns. During times of colder-than-normal winter weather, we have been able to take advantage of our large, efficient distribution network to avoid supply disruptions, thereby providing us a competitive advantage in the markets we serve.

### *Risk Management Activities – Commodity Price Risk*

We employ risk management activities that attempt to mitigate price risks related to the purchase, storage, transport and sale of propane generally in the contract and spot markets from major domestic energy companies on a short-term basis. We attempt to mitigate these price risks through the use of financial derivative instruments and forward propane purchase and sales contracts. We enter into propane sales commitments with a portion of our customers that provide for a contracted price agreement for a specified period of time. These commitments can expose us to product price risk if not immediately hedged with an offsetting propane purchase commitment.

Our risk management strategy involves taking positions in the forward or financial markets that are equal and opposite to our positions in the physical products market in order to minimize the risk of financial loss from an adverse price change. This risk management strategy is successful when our gains or losses in the physical product markets are offset by our losses or gains in the forward or financial markets. Our propane related financial derivatives are designated as cash flow hedges.

## [Table of Contents](#)

Our risk management activities may include the use of financial derivative instruments including, but not limited to, futures, swaps, and options to seek protection from adverse price movements and to minimize potential losses. We enter into these financial derivative instruments primarily with brokers who are clearing members with the Intercontinental Exchange or the Chicago Mercantile Exchange and, to a lesser extent, directly with third parties in the over-the-counter market. We also enter into forward propane purchase and sales contracts with counterparties. These forward contracts qualify for the normal purchase normal sales exception within GAAP and are therefore not recorded on our financial statements until settled.

Through our supply procurement activities, we purchase propane primarily from energy companies. Supplies of propane from these sources have traditionally been readily available, although no assurance can be given that they will be readily available in the future. We may purchase and store inventories of propane to avoid delivery interruptions during the periods of increased demand and to take advantage of favorable commodity prices. As a result of our ability to buy large volumes of propane and utilize our national distribution system, we believe we are in a position to achieve product cost savings and avoid shortages during periods of tight supply to an extent not generally available to other propane distributors. During fiscal 2022, ten suppliers accounted for approximately 51% of our total propane purchases. Because there are numerous alternative suppliers available, we do not believe it is reasonably possible that this supplier concentration could cause a near-term severe impact on our ability to procure propane, though propane prices could be affected; however, if supplies were interrupted or difficulties in obtaining alternative transportation were to arise, the cost of procuring replacement supplies may materially increase. These transactions are accounted for at cost in "Cost of sales – propane and other gas liquids sales" in our consolidated statements of operations.

A portion of our propane inventory is purchased under supply contracts that typically have a one-year term and a price that fluctuates based on spot market prices. In order to limit overall price risk, we will enter into fixed price over-the-counter propane forward and/or swap contracts that generally have terms of less than 36 months. We may also use options to hedge a portion of our forecasted purchases, which generally do not exceed 36 months in the future. Executing our price risk management strategy includes regularly issuing letters of credit and posting cash collateral.

We also incur risks related to the price and availability of propane during periods of much colder-than-normal weather, temporary supply shortages concentrated in certain geographic regions and commodity price distortions between geographic regions. We attempt to mitigate these risks through our transportation activities by utilizing our transport truck and railroad tank car fleet to distribute propane between supply or storage locations and propane distribution locations. The propane we sell to our customers is generally transported from gas processing plants and refineries, pipeline terminals and storage facilities to propane distribution locations or storage facilities by our leased railroad tank cars, our owned or leased highway transport trucks, common carriers, or owner-operated transport trucks.

### *Risk Management Activities – Transportation Fuel Price Risk*

From time to time, we employ risk management activities that attempt to mitigate price risks related to the purchase of gasoline and diesel fuel for use in the transport of propane from supply or storage locations and from retail fueling stations. When employed, we attempt to mitigate these price risks through the use of financial derivative instruments.

When employed, our risk management strategy involves taking positions in the financial markets that are not more than the forecasted purchases of fuel for our internal use in both the supply and retail propane delivery fleet in order to minimize the risk of decreased earnings from an adverse price change. This risk management strategy locks in our purchase price and is successful when our gains or losses in the physical product markets are offset by our losses or gains in the financial markets. Our transport fuel financial derivatives are not designated as cash flow hedges.

### *Industry*

Natural gas liquids are derived from petroleum products and are sold in compressed or liquefied form. Propane, the predominant natural gas liquid, is typically extracted from natural gas or separated during crude oil refining. Although propane is gaseous at normal pressures, it is compressed into liquid form at relatively low pressures for storage and transportation. Propane is a clean-burning energy source, recognized for its transportability and ease of use relative to alternative forms of stand-alone energy sources.

---

## [Table of Contents](#)

Based upon industry publications propane accounts for approximately 4% of energy consumption in the United States, a level which has remained relatively constant for the past two decades. Propane competes primarily with natural gas, electricity and fuel oil as an energy source principally on the basis of price, availability and portability. Propane serves as an alternative to natural gas in rural and urban areas where natural gas is unavailable or portability of product is required. Propane is generally more expensive than natural gas on an equivalent British Thermal Unit (“BTU”) basis in locations served by natural gas, although propane is often sold in such areas as a standby fuel for use during peak demands and during interruption in natural gas service. The expansion of natural gas into traditional propane markets has historically been inhibited by the capital costs required to expand distribution and pipeline systems. Although the extension of natural gas pipelines tends to displace propane distribution in the neighborhoods affected, we believe that new opportunities for propane sales arise as more geographically remote neighborhoods are developed.

Propane has historically been less expensive to use than electricity for space heating, water heating and cooking and competes effectively with electricity in the parts of the country where propane is less expensive than electricity on an equivalent BTU basis. Although propane is similar to fuel oil in application, market demand and price, propane and fuel oil have generally developed their own distinct geographic markets. Because residential furnaces and appliances that burn propane will not operate on fuel oil, a conversion from one fuel to the other requires the installation of new equipment. Residential propane customers will have an incentive to switch to fuel oil only if fuel oil becomes significantly less expensive than propane. Conversely, we may be unable to expand our retail customer base in areas where fuel oil is widely used, particularly the northeast United States, unless propane becomes significantly less expensive than fuel oil. However, many industrial customers who use propane as a heating fuel have the capacity to switch to other fuels, such as fuel oil, on the basis of availability or minor variations in price.

### *Competition*

In addition to competing with marketers of other fuels, we compete with other companies engaged in the propane distribution business. Competition within the propane distribution industry stems from two types of participants: the larger, multi-state marketers, including farmers' cooperatives, and the smaller, local independent marketers, including rural electric cooperatives. Based on our propane sales volumes in fiscal 2022, we believe that we are the second largest retail marketer of propane in the United States and a leading national provider of propane by portable tank exchange.

Most of our retail propane distribution locations compete with three or more marketers or distributors, primarily on the basis of reliability of service and responsiveness to customer needs, safety and price. Each retail distribution outlet operates in its own competitive environment because propane marketers typically reside in close proximity to their customers to lower the cost of providing service.

### *Business Strategy*

Our business strategy includes the following:

- expand our market share through disciplined acquisitions and organic growth, as accretive opportunities become available;
- capitalize on our national presence and economies of scale; and
- maximize operating efficiencies through utilization of our technology platform.

*Expand our market share through disciplined acquisitions and organic growth, as accretive opportunities become available*

We expect to continue the expansion of our propane customer base through both the acquisition of other propane distributors and through organic growth. We intend to concentrate on propane acquisition activities in geographical areas within or adjacent to our existing operating areas, and on a selected basis in areas that broaden our geographic coverage. We also intend to focus on acquisitions that can be efficiently

combined with our existing propane operations to provide an attractive return on investment after taking into account the economies of scale and cost savings we anticipate will result from those combinations.

## [Table of Contents](#)

Our goal is to improve the operations and profitability of our propane operations and related equipment sales segment by integrating best practices and leveraging our established national organization and technology platforms to help reduce costs and enhance customer service. We believe that our enhanced operational synergies, improved customer service and ability to better track the financial performance of operations provide us a distinct competitive advantage and better analysis as we consider future opportunities.

We believe that we are positioned to successfully compete for growth opportunities within and outside of our existing operating regions. Our efforts will focus on adding density to our existing customer base, providing propane and complementary services to national accounts and providing other product offerings to existing customer relationships. This continued expansion will give us new growth opportunities by leveraging the capabilities of our operating platforms.

### *Capitalize on our national presence and economies of scale*

We believe our national presence of 795 propane distribution locations in the United States as of July 31, 2022 gives us advantages over our smaller competitors. These advantages include economies of scale in areas such as:

- product procurement;
- transportation;
- fleet purchases;
- propane customer administration; and
- general administration.

We believe that our national presence allows us to be one of the few propane distributors that can competitively serve industrial/commercial and portable tank exchange customers on a nationwide basis, including the ability to serve such propane customers through leading home-improvement centers, mass merchants and hardware, grocery and convenience stores. In addition, we believe that our national presence provides us opportunities to make acquisitions of other propane distribution companies whose operations overlap with ours, providing economies of scale and significant cost savings in these markets.

We also believe that investments in technology similar to ours require both a large scale and a national presence, in order to generate sustainable operational savings to produce a sufficient return on investment. For these reasons, we believe our national presence and economies of scale provide us with an on-going competitive advantage.

### *Maximize operating efficiencies through utilization of our technology platform*

We believe our significant investments in technology give us a competitive advantage to operate more efficiently and effectively at a lower cost compared to most of our competitors. We do not believe that many of our smaller competitors will be able to justify similar investments in the near term. Our technology advantage has resulted from significant investments made in our retail propane distribution operating platform together with our state-of-the-art tank exchange operating platform.

Our technology platform allows us to efficiently route and schedule our customer deliveries, customer administration and operational workflow for the retail sale and delivery of bulk propane. Our service centers are staffed to provide oversight and management to multiple distribution locations, referred to as service units. We operate a retail distribution network, including portable tank exchange operations, using a structure of 49 service centers and 795 service units as of July 31, 2022. The service unit locations utilize hand-held computers and cellular or satellite technology to communicate with management personnel who are typically located at the associated service center. We believe this structure and our technology platform allow us to more efficiently route and schedule customer deliveries and significantly reduce the need for daily on-site management.

The efficiencies gained from operating our technology platform allow us to consolidate our management teams at fewer locations, quickly adjust the sales prices to our customers and manage our personnel and vehicle costs more effectively to meet customer demand.

## [Table of Contents](#)

Our customer support capabilities allow us to accept emergency customer calls 24 hours a day, seven days a week. These combined capabilities provide us cost savings while improving customer service by reducing customer inconvenience associated with multiple, unnecessary deliveries.

### *Governmental Regulation - Environmental and Safety Matters*

Our operations are subject to various federal, state and local environmental, health, safety and transportation laws and regulations governing the storage, distribution and transportation of propane. However, propane is not currently subject to any price or allocation regulation and has not been defined by any federal environmental law as an environmentally hazardous substance.

In connection with all acquisitions of propane distribution businesses that involve the purchase of real property, we conduct a due diligence investigation to attempt to determine whether any substance other than propane has been sold from, stored on or otherwise come into contact with any such real property prior to its purchase. At a minimum, due diligence includes questioning the sellers, obtaining representations and warranties concerning the sellers' compliance with environmental laws and visual inspections of the real property. Nevertheless, if hazardous substances are discovered on or under these properties, we may be responsible for removing or remediating the previously disposed substances. The Comprehensive Environmental Response, Compensation and Liability Act, as amended, which we refer to as CERCLA or the "Superfund" law, and analogous state laws, generally impose liability, without regard to fault or legality of the original conduct, on classes of persons that are considered to be responsible for the release of a "hazardous substance" into the environment. These persons include the current owner or operator of a contaminated facility, a former owner or operator of the facility at the time of contamination, and those persons that disposed or arranged for the disposal of the hazardous substance at the facility. Under CERCLA and comparable state statutes, persons deemed "responsible parties" are subject to strict liability that, in some circumstances, may be joint and several for the costs of removing or remediating previously disposed wastes (including wastes disposed of or released by prior owners or operators) or property contamination (including groundwater contamination), for damage to natural resources and for the costs of certain health studies. In addition, it is not uncommon for neighboring landowners and other third parties to file claims for personal injury and property damage allegedly caused by the hazardous substances released into the environment. Therefore, governmental agencies or third parties may seek to hold us responsible under CERCLA and comparable state statutes for all or part of the costs to clean up sites at which such hazardous substances may have been released.

With respect to the sale and distribution of propane, we are subject to regulations promulgated by the Occupational Safety and Health Administration ("OSHA") under its Hazard Communication Standard ("HCS"), which requires preparation and maintenance of safety data sheets, hazard labeling on products, and other worker protections. In 2012, OSHA promulgated new hazard communications requirements designed to align U.S. HCS standards with those of other countries under a Globally Harmonized System. These hazard labeling and communication changes, which took effect in June 2015, required us and other propane manufacturers and distributors to revise and update our consumer and compliance materials.

With respect to the transportation of propane by truck, we are subject to regulations promulgated under the Federal Motor Carrier Safety Act. These regulations cover the transportation of flammable materials and are administered by the United States Department of Transportation ("DOT"). The National Fire Protection Association Pamphlet No. 58 establishes a national standard for the safe handling and storage of propane. Those rules and procedures have been adopted by us and serve as the industry standard by the states in which we operate.

We believe that we are in material compliance with all governmental regulations and industry standards applicable to environmental and safety matters.

---

## [Table of Contents](#)

### *Governmental Regulation - Climate Change Legislation*

There continues to be concern, both nationally and internationally, about climate change and the contribution of greenhouse gas (“GHG”) emissions, most notably carbon dioxide, to global warming. Because propane is considered a clean alternative fuel under the federal Clean Air Act Amendments of 1990, we anticipate that this will provide us with a competitive advantage over other sources of energy, such as fuel oil and coal, to the extent new climate change regulations become effective. At the same time, increased regulation of GHG emissions, especially in the transportation sector, could impose significant additional costs on us, our suppliers and our customers. In recent years, there has been an increase in state initiatives aimed at regulating GHG emissions. For example, the California Environmental Protection Agency established a Cap & Trade program that requires certain covered entities, including propane distribution companies, to purchase allowances to compensate for the GHG emissions created by their business operations or obtain qualifying offset credits. The impact of new legislation and regulations will depend on a number of factors, including (i) which industry sectors would be impacted, (ii) the timing of required compliance, (iii) the overall GHG emissions cap level, (iv) the allocation of emission allowances to specific sources, and (v) the costs and opportunities associated with compliance.

### **Human Capital Management**

Ferrellgas’ employees are managed by our general partner pursuant to our partnership agreement. Our general partner’s employees are its greatest resource and an integral component to Ferrellgas’ operations. Their health, safety and well-being is a priority for us. We provide competitive compensation and comprehensive benefits, and regularly benchmark our programs to the market. Our commitment to allowing employees in eligible roles to work from home serves to solidify our position as an employer of choice in today’s marketplace. As a matrix organization, in which resources are balanced between both project groups and functional groups, open and frequent communication and teamwork among people throughout Ferrellgas allow us to innovate and support our mission to *Fuel Life Simply*. Under the Ferrellgas’ Employee Stock Ownership Plan (the “ESOP”), employee-owners have a vested interest in our performance through serving our customers.

#### *Employees*

At July 31, 2022, our general partner had 3,919 full-time employees in the following areas:

Propane field operations	3,542
Centralized corporate functions	377
Total	<u><u>3,919</u></u>

Less than one percent of these employees are represented by an aggregate of four different local labor unions, which are all affiliated with the International Brotherhood of Teamsters. Our general partner has not experienced any significant work stoppages or other labor problems.

#### *Diversity and Inclusion*

We treat each other with respect and value each individual’s unique perspective and background. We are committed to a culture where everyone belongs and diversity and inclusion drives business results. Diversity of management is crucial to our ongoing success to manage our business. As of July 31, 2022, females and ethnic groups represented the following:

	Ferrellgas Overall	Ferrellgas Leadership <sup>(1)</sup>
Females	19.6%	25.4%
Ethnic groups	20.6%	9.3%
Total	37.6%	31.7%

(1) Represents all management levels.

## [Table of Contents](#)

### *Safety*

Safety is a part of everything we do. Safety is a priority for our employees, our customers and the public. We follow rules and regulations applicable to the sale and distribution of propane, including those from OSHA and the DOT. The Ferrellgas Safety Program is designed to ensure operations at our facilities adhere to established protocols and safety standards.

### *Employee Recognition and Community Involvement*

Ferrellgas Flame Awards is a peer-to-peer recognition program. Employees receive awards for achievement in the areas of customer service, safety, innovation and leadership.

Employees have the opportunity to participate in numerous volunteer efforts as we strive to give back to the communities we serve. These initiatives include:

- Operation BBQ Relief, an organization which serves communities impacted by natural disasters, supports victims and first responders throughout the United States by supplying the propane to fuel industrial-sized smokers in addition to Blue Rhino tanks;
- a partnership with the International Rhino Foundation, a global wildlife conservation organization, draws attention to conservation efforts; and
- providing resources for a positive long-term environmental effort in the celebration of Earth Day which ranged from planting trees to hosting battery and plastic recycling drives to multiple community service activities.

### *Training and Development*

We believe in investing in our people through coaching, Touchbase Tuesday calls, and frequent roundtables. Ferrellgas University offers online courses available to all employees. Our summer internship program and a rotational Management Development Program (“MDP”) also allow us to build a pipeline of diverse talent. MDP trainees gain broad hands-on experience with our brands, processes and operations to prepare for leadership positions in Ferrellgas.

## **Trademarks and Service Marks**

We market our goods and services under various trademarks and trade names, which we own or have a right to use. Those trademarks and trade names include marks or pending marks before the United States Patent and Trademark Office such as Ferrellgas, Ferrell North America, Ferrellmeter, and Fuel Life Simply. Our general partner has an option to purchase for a nominal value the trade names “Ferrellgas” and “Ferrell North America” and the trademark “Ferrellmeter” that it contributed to us during 1994, if it is removed as our general partner other than “for cause.” If our general partner ceases to serve as our general partner for any reason other than “for cause,” it will have the option to purchase our other trade names and trademarks from us for fair market value.

We believe that the Blue Rhino mark and Blue Rhino’s other trademarks and service marks are an important part of our consistent growth in the tank exchange category. Included in the registered and pending trademarks and service marks are the designations Blue Rhino®, Blue Rhino & Design®, Rhino Design®, Drop, Swap and Go®, Take-A-Tank®, Grab Life by the Horn<sup>SM</sup>, and It’s Not Just Propane. It’s Blue Rhino®.

## [Table of Contents](#)

### **Businesses of Other Subsidiaries**

Ferrellgas Partners Finance Corp. is a Delaware corporation formed in 1996 and is our wholly-owned subsidiary. Ferrellgas Partners Finance Corp. (the “Partners Finance Corp.”) has nominal assets, has no employees other than officers and does not conduct any operations but has previously served and may in the future serve as a co-issuer and co-obligor for debt securities issued by Ferrellgas Partners. Institutional investors that might otherwise be limited in their ability to invest in debt securities of Ferrellgas Partners because it is a partnership may be able to invest in debt securities of Ferrellgas Partners because the Partners Finance Corp. acts as a co-issuer and co-obligor. Because of its structure and pursuant to the reduced disclosure format, a discussion of the results of operations, liquidity and capital resources of the Partners Finance Corp. is not presented in this Annual Report on Form 10-K. See Note B – Contingencies and Commitments – to the Partners Finance Corp.’s financial statements for a discussion of the debt securities with respect to which the Partners Finance Corp. has served as a co-issuer and co-obligor. As of July 31, 2022, Ferrellgas Partners had no debt securities outstanding, and the Partners Finance Corp. therefore was not liable as co-issuer for any such debt securities.

Ferrellgas Finance Corp. (the “Finance Corp.”) is a Delaware corporation formed in 2003 and is a wholly-owned subsidiary of the operating partnership. The Finance Corp. has nominal assets, has no employees other than officers and does not conduct any operations, but serves as a co-issuer and co-obligor for debt securities of the operating partnership. Institutional investors that might otherwise be limited in their ability to invest in debt securities of the operating partnership because it is a partnership may be able to invest in debt securities of the operating partnership because the Finance Corp. acts as a co-issuer and co-obligor. Because of its structure and pursuant to the reduced disclosure format, a discussion of the results of operations, liquidity and capital resources of the Finance Corp. is not presented in this Annual Report on Form 10-K. See Note B – Contingencies and commitments – to the Finance Corp.’s financial statements for a discussion of the debt securities with respect to which the Finance Corp. has served and is serving as a co-issuer and co-obligor.

Prior to the Effective Date, we had agreements to transfer, on an ongoing basis, a portion of our trade accounts receivable through Ferrellgas Receivables, LLC, a consolidated and wholly-owned, qualifying special purpose subsidiary of the operating partnership that maintained an accounts receivable securitization facility. We retained servicing responsibilities for transferred accounts receivable but had no other continuing involvement with the transferred receivables. The accounts receivable securitization facility was terminated as of the Effective Date. See [Note F – Accounts and notes receivable, net](#) – to our consolidated financial statements included elsewhere herein for more information.

### **Available Information**

We file annual, quarterly and current reports and other information with the Securities and Exchange Commission (the “SEC”). You may read and download our SEC filings over the Internet from several commercial document retrieval services as well as at the SEC’s website at [www.sec.gov](http://www.sec.gov). Our SEC filings are also available on our website at [www.ferrellgas.com](http://www.ferrellgas.com) at no cost as soon as reasonably practicable after our electronic filing or furnishing thereof with the SEC. Please note that any Internet addresses provided in this Annual Report on Form 10-K are for informational purposes only and are not intended to be hyperlinks. No information found and/or provided at such Internet addresses is intended or deemed to be incorporated by reference herein.

[Table of Contents](#)

## **ITEM 1A. RISK FACTORS.**

### **Risks Related to our Business and Industry**

*Weather conditions, including warm winters, dry or warm weather in the harvest season and poor weather in the grilling season, may reduce the demand for propane, which could have a material adverse effect on our results of operations, cash flows, financial condition or liquidity.*

Weather conditions have a significant impact on the demand for propane for heating, agricultural, and recreational grilling purposes. Many of our customers rely heavily on propane as a heating fuel. Accordingly, our sales volumes of propane are highest during the five-month winter-heating season of November through March and are directly affected by the temperatures during these months. During fiscal 2022, approximately 56% of our propane sales volume was attributable to sales during the winter-heating season. Actual weather conditions can vary substantially from year to year, which may significantly affect our financial performance or condition. Furthermore, variations in weather in one or more regions in which we operate can significantly affect our total propane sales volume and therefore our financial performance or condition. The agricultural demand for propane is also affected by weather, as dry or warm weather during the harvest season may reduce the demand for propane used in some crop drying applications.

Sales from portable tank exchanges experience higher volumes in the spring and summer, which includes the majority of the grilling season. Sustained periods of poor weather, particularly in the grilling season, can negatively affect our portable tank exchange revenues. In addition, poor weather may reduce consumers' propensity to purchase and use grills and other propane-fueled appliances thereby reducing demand for portable tank exchange.

*Sudden and sharp increases in wholesale propane prices may not be completely passed on to our customers, especially those with which we have contracted pricing arrangements. These contracted pricing arrangements will adversely affect our profit margins if they are not immediately hedged with an offsetting propane purchase commitment and wholesale propane prices do increase. Conversely, sudden and sharp decreases in wholesale propane prices may result in our customers' not fulfilling obligations under contracted pricing arrangements entered into with us. Customer defaults under these higher sales price arrangements may adversely affect our profit margins.*

Gross margin from the retail distribution of propane is primarily based on the cents-per-gallon difference between the sales price we charge our customers and our costs to purchase and deliver propane to our propane distribution locations. Because our profitability is sensitive to changes in wholesale supply costs, we will be adversely affected if we cannot pass on increases in the cost of propane to our customers. We enter into propane sales commitments with a portion of our customers that provide for a contracted price agreement for a specified period of time. A certain percentage of that exposure is hedged with an offsetting propane purchase commitment.

The wholesale propane price per gallon is subject to various market conditions and may fluctuate based on changes in demand, supply and other energy commodity prices. Propane prices tend to partially correlate with crude oil and natural gas prices. Heightened levels of uncertainty related to the ongoing conflict between Russia and Ukraine, in particular, may lead to additional economic sanctions by the U.S. and the international community and could further disrupt financial and commodities markets. We employ risk management activities that attempt to mitigate risks related to the purchasing, storing, transporting and selling of propane. However, sudden and sharp increases in wholesale propane prices cannot be passed on to customers with which we have contracted pricing arrangements. Therefore, we are exposed to the risk of increased wholesale propane prices and reduced profit margins on the percentage of our contractual commitments that are not immediately hedged with an offsetting propane purchase commitment. If we were to experience sudden and sharp propane price decreases, our customers may not fulfill their obligations to purchase propane from us at their previously contracted price per gallon, and we may not be able to sell the related hedged or fixed price propane at a profitable sales price per gallon in the then-current pricing environment.

## [Table of Contents](#)

*We compete with other businesses to attract and retain qualified employees, and labor shortages and increased labor costs could adversely affect our business.*

Our continued success depends on our ability to attract and retain qualified personnel in all areas of our business. We compete with other businesses to attract and retain qualified employees and a tight labor market may cause our labor costs to increase. The pandemic adds challenges in recruiting employees who may be hesitant to work in particular environments or without additional accommodations. A shortage of qualified employees may require us to enhance wage and benefits packages in order to compete effectively in the hiring and retention of employees, increase overtime or hire more expensive temporary employees. No assurance can be given that our labor costs will not increase, or that such increases can be recovered through increased prices charged to customers.

*We are dependent on our principal suppliers, which increases the risks from an interruption in supply and transportation.*

Through our supply procurement activities, we purchased approximately 51% of our propane from ten suppliers during fiscal 2022. During extended periods of colder-than-normal weather, these suppliers or other suppliers in one or more of the areas in which we operate could temporarily run out of propane, necessitating the transportation of propane by truck, rail car or other means from other areas. If supplies from these sources were interrupted, certain suppliers were to default or difficulties in alternative transportation were to arise, the cost of procuring replacement supplies and transporting those supplies from alternative locations might be materially higher and, at least on a short-term basis, our margins could be reduced.

*Our failure or our counterparties' failure to perform on obligations under commodity derivative and financial derivative contracts and increased costs associated with such contracts could materially affect our liquidity, cash flows and results of operations.*

Volatility in the oil and gas commodities sector for an extended period of time or intense volatility in the near term could impair our or our counterparties' ability to meet margin calls, which could cause us or our counterparties to default on commodity and financial derivative contracts. This could have a material adverse effect on our financial position or liquidity or on our ability to procure product at acceptable prices or at all and could increase our costs to procure product.

Legislation and rulemaking associated with parties to derivatives transactions may increase our cost of using derivative instruments to hedge risks associated with our business or may reduce the availability of such instruments or the creditworthiness of derivatives counterparties available to us. While costs imposed directly on us due to regulatory requirements for derivatives such as reporting, recordkeeping and electing the end-user exception from mandatory clearing, are relatively minor, costs imposed upon our counterparties may increase the cost of our doing business in the derivatives markets to the extent such costs are passed on to us.

*Hurricanes and other natural disasters could have a material adverse effect on our business, financial condition and results of operations.*

Hurricanes and other natural disasters can potentially destroy numerous business structures and homes and, if occurring in the Gulf Coast region of the United States, could disrupt the supply chain for oil and gas products. Disruptions in supply could have a material adverse effect on our business, financial condition, results of operations and cash flow. Damage and higher prices caused by hurricanes and other natural disasters could also have an adverse effect on our financial condition due to the impact on the financial condition of our customers. To the extent the frequency or magnitude of significant weather events and natural disasters increases, the resulting increase in disruptions also could have adverse impacts on our business on both the supply and demand side and therefore adversely affect our results of operations and financial condition.

## [Table of Contents](#)

*Epidemic diseases, such as COVID-19, or similar public health crises, illnesses or pandemics, could adversely affect our operations and financial condition.*

COVID-19, and variants thereof, continues to evolve and impact the economy of the United States and other countries around the world. Throughout the pandemic, we have used initiatives to minimize the risk and impact of COVID-19 on our employees and customers such as using staggered start times for drivers, sanitizing company vehicles prior to the start of each shift, using hand sanitizer in vehicles and company offices, and other best practices set forth by the Centers for Disease Control and Prevention and the World Health Organization. Any of the foregoing events or other consequences of public health epidemics may increase our operating expenses and reduce the efficiency of our operations and may have further adverse impacts on U.S. and global economic conditions, including a renewed slowdown in the U.S. economy, which could decrease demand for our products and have a material adverse effect on our results of operations and financial condition.

*The propane distribution business is highly competitive, and competition may negatively affect our sales volumes and therefore our results of operations, cash flows, financial condition and liquidity.*

Our profitability is affected by the competition for customers among all of the participants in the propane distribution business. We compete with a number of large national and regional firms and several thousand small independent firms. Because of the relatively low barriers to entry into the propane market, there is the potential for small independent propane distributors, as well as other companies not previously engaged in propane distribution, to compete with us. Some rural electric cooperatives and fuel oil distributors have expanded their businesses to include propane distribution. As a result, we are subject to the risk of additional competition in the future. Some of our competitors may have greater financial resources or lower costs than we do. Should a competitor attempt to increase market share by reducing prices, our operating margins and customer base may be negatively impacted. Generally, warmer-than-normal weather and increasing wholesale fuel prices further intensify competition.

*The propane distribution industry is a mature one, which may limit our growth.*

The propane distribution industry is a mature one. We foresee no growth or a small decline in total national demand for propane in the near future. Year-to-year industry volumes are primarily impacted by fluctuations in temperatures and economic conditions. Our ability to grow our sales volumes within the propane distribution industry is primarily dependent upon our ability to acquire other propane distributors and integrate those acquisitions into our operations and upon the success of our marketing efforts to acquire new customers organically. If we are unable to compete effectively in the propane distribution business, we may lose existing customers or fail to acquire new customers.

*We may not be successful in making acquisitions, and any acquisitions we make may not result in achievement of our anticipated results. In either case, this failure would potentially limit our growth, limit our ability to compete and impair our results of operations and financial condition.*

We have historically expanded our business through acquisitions. We regularly consider and evaluate opportunities to acquire propane distributors. We may choose to finance these acquisitions through internal cash flow, external borrowings or the issuance of additional Class A Units or other securities. We have substantial competition for acquisitions, and, although we believe there are numerous potential large and small acquisition candidates in our industry, there can be no assurance that we will be able to make any acquisitions on favorable terms or at all. There is also a risk we will not be able to successfully integrate acquired operations or achieve any expected cost savings or other synergies. We may also assume or become subject to known or unknown liabilities, including environmental liabilities, and we may not be protected against any such liabilities by indemnification from the sellers or insurance. There is no assurance that any acquisitions made will not be dilutive to our earnings and distributions and that any additional equity we issue as consideration for an acquisition will not be dilutive to our unitholders or any additional debt we incur to finance an acquisition will not affect the operating partnership's ability to make distributions to Ferrellgas Partners or service our existing debt.

## [Table of Contents](#)

*Our operations, capital expenditures and financial results may be affected by regulatory changes and/or market responses to global climate change, including competition from other energy sources in response to such changes.*

There continues to be concern, both nationally and internationally, about climate change and the contribution of greenhouse gases (“GHG”) emissions, most notably carbon dioxide, to global warming. Because propane is considered a clean alternative fuel under the federal Clean Air Act Amendments of 1990, we anticipate that this will provide us with a competitive advantage over other sources of energy, such as fuel oil and coal, as new climate change laws and regulations become effective. At the same time, increased regulation of GHG emissions, especially in the transportation sector, could impose significant additional costs on us, our suppliers and our customers. Numerous proposals have been made and are likely to continue to be made at the national, regional and state levels of government to monitor and limit GHG emissions. These efforts include cap-and-trade programs, carbon taxes, GHG reporting and tracking programs and regulations that limit GHG emissions from certain sources. The impact of new legislation and regulations will depend on a number of factors, including (i) which industry sectors would be impacted, (ii) the timing of required compliance, (iii) the overall GHG emissions cap level, (iv) the allocation of emission allowances to specific sources, and (v) the costs and opportunities associated with compliance. At this time, we cannot predict the effect that climate change regulation may have on our business, financial condition or operations in the future.

Furthermore, increasing concentrations of GHGs in the Earth’s atmosphere may produce climate changes that have significant physical effects, such as volatility in seasonal temperatures and increased frequency and severity of storms, floods and other climatic events. To the extent weather conditions are affected by climate change or demand is impacted by regulations associated with climate change, customers’ energy use could increase or decrease depending on the duration and magnitude of the changes, leading either to increased investment or decreased revenues.

Propane competes with other sources of energy, some of which can be less costly for equivalent energy value and which also may become more prevalent in response to climate change regulation and other factors. See “Item I. Business – Industry” for additional information on our competition for customers against suppliers of electricity, natural gas and fuel oil.

The U.S. Environmental Protection Agency (the “EPA”) has determined that carbon dioxide and other GHGs are regulated pollutants under the Clean Air Act. In June 2019, the EPA replaced the Clean Power Plan with the Affordable Clean Energy rule. In January 2021, the U.S. Court of Appeals for the District of Columbia Circuit (“D.C. Circuit”) vacated the Affordable Clean Energy rule and remanded the question to the EPA to consider a new regulatory framework to replace the Affordable Clean Energy rule, thereby allowing the incoming administration to implement standards for emissions from the power sector. In June 2022, the U.S. Supreme Court reversed the D.C. Circuit’s decision on the Affordable Clean Energy rule and remanded the case back to the D.C. Circuit. On August 16, 2022, President Biden signed into law the Inflation Reduction Act of 2022 (the “Inflation Reduction Act”). The Inflation Reduction Act contains hundreds of billions of dollars in incentives for the development of renewable energy, clean hydrogen, clean fuels, electric vehicles and supporting infrastructure and carbon capture and sequestration, amongst other provisions. These incentives could further accelerate the transition of the U.S. economy away from the use of fossil fuels towards lower- or zero-carbon emissions alternatives and impact demand for propane. Propane competes with electricity, among other alternative fuels, and to the extent the cost of production and delivery is reduced for electricity and other alternative fuel sources with which we compete, we may experience reduced demand for our propane. The ultimate impact on propane demand and our business is uncertain and may change as implementation of the Inflation Reduction Act moves forward. We cannot predict the effect that the development of alternative energy sources and related laws might have on our financial position or results of operations.

*Economic and political conditions may harm the energy business disproportionately to other industries.*

Deteriorating regional and global economic and political conditions, including U.S. sanctions on Iran oil exports and conflict, unrest and economic instability in oil producing countries and regions, may cause

significant disruptions to commerce throughout the world. If those disruptions occur in areas of the world which are tied to the energy industry, such as the Middle East, it is most likely that our industry will be either affected first or affected to a greater extent than other industries. These conditions or disruptions may impair our ability to effectively market or acquire propane or impair our ability to raise equity or debt capital for acquisitions, capital expenditures or ongoing operations.

## [Table of Contents](#)

*We are subject to operating and litigation risks, and related costs or liabilities may not be covered by insurance.*

We are subject to all operating hazards and risks normally incidental to the handling, storing and delivering of combustible liquids such as propane. These operations face an inherent risk of exposure to general liability claims in the event that they result in injury or destruction of property. As a result, we have been, and are likely to be, a defendant in various legal proceedings arising in the ordinary course of business. Our insurance policies do not cover all losses, costs or liabilities that we may experience, and insurance companies that currently insure companies in our industry or in the energy industry generally may cease to do so or substantially increase premiums. Although we maintain insurance policies with insurers in such amounts and with such coverages and deductibles as we believe are reasonable and prudent, we cannot guarantee that such insurance will be adequate to protect us from all material expenses related to potential future claims for personal injury and property damage or that such levels of insurance will be available in the future at economical prices.

*A significant increase in motor fuel prices may adversely affect our profits.*

Motor fuel is a significant operating expense for us in connection with the purchase and delivery of propane to our customers. The price and supply of motor fuel is unpredictable and fluctuates based on events we cannot control, such as geopolitical developments, including impacts from Russian military actions in Ukraine, supply and demand for oil, gas, and refined fuels, actions by oil and gas producers, actions by motor fuel refiners, conflict, unrest or economic instability in oil producing countries and regions, regional production patterns and weather conditions. We may not be able to pass any increases in motor fuel prices on to our customers. As a result, any increases in these prices may adversely affect our profitability and competitiveness.

*If we are unable to protect our information technology systems against service interruption, misappropriation of data, or breaches of security resulting from cyber security attacks or other events, or we encounter other unforeseen difficulties in the operation of our information technology systems, our operations could be disrupted, our business and reputation may suffer, and our internal controls could be adversely affected.*

In the ordinary course of business, we rely on information technology systems, including the Internet and third-party hosted services, to support a variety of business processes and activities and to store sensitive data, including (i) intellectual property, (ii) our proprietary business information and that of our suppliers and business partners, (iii) personally identifiable information of our customers and employees, and (iv) data with respect to invoicing and the collection of payments, accounting, procurement, and supply chain activities. In addition, we rely on our information technology systems to process financial information and results of operations for internal reporting purposes and to comply with financial reporting, legal, and tax requirements. Despite our security measures, our information technology systems may be vulnerable to attacks by hackers or breached due to employee error, malfeasance, sabotage, or other disruptions.

The efficient execution of our business is dependent upon the proper functioning of our internal systems, and we depend on our management information systems to process orders, manage inventory, manage accounts receivable collections, maintain distributor and customer information, maintain cost-efficient operations and assist in delivering propane on a timely basis. In addition, our staff of management information systems professionals relies heavily on the support of several key personnel and vendors. Any disruption in the operation of those management information systems, including a cyber-security breach or loss of employees knowledgeable about the operation of such systems, termination of our relationship with one or more of these key vendors or failure to continue to modify and upgrade such systems effectively as our business expands could negatively affect our business, financial condition or reputation.

---

## [Table of Contents](#)

*We may incur significant costs in order to comply with privacy and data security laws and regulations, and any failure to comply with such laws and regulations could result in significant penalties or other liabilities or costs.*

There are numerous laws and regulations regarding privacy and the storage, sharing, use, processing, transfer, disclosure and protection of personal data, the scope of which is changing, subject to differing interpretations, and may be inconsistent between jurisdictions. For example, the California Consumer Privacy Act (“CCPA”), which came into effect on January 1, 2020, limits how we may collect and use personal data, in addition to imposing severe statutory damages and providing consumers with a private right of action for certain data breaches. The California Privacy Rights Act (“CPRA”) which amends and expands the CCPA, including providing consumers with additional rights with respect to their personal data, and establishes a regulatory agency dedicated to enforcing compliance, will come into effect on January 1, 2023. Other states, including Virginia, Colorado, Utah and Connecticut, have also enacted or have similar privacy legislation pending, which would be effective in 2023. The effects of the CCPA and CPRA and other states’ data privacy laws are potentially far-reaching, and may require us to modify our data processing practices and policies and incur substantial compliance-related costs and expenses. It remains unclear how various provisions will be interpreted and enforced. Data privacy laws and their interpretations continue to develop and may be inconsistent from jurisdiction to jurisdiction. Non-compliance with these laws could result in penalties or significant legal liability. Although we take reasonable efforts to comply with all applicable laws and regulations, there can be no assurance that we will not be subject to regulatory action, including fines, in the event of an incident. We or our third-party service providers could be adversely affected if legislation or regulations are expanded to require changes in our or our third-party service providers’ business practices or if governing jurisdictions interpret or implement their legislation or regulations in ways that negatively affect our or our third-party service providers’ business, results of operations or financial condition.

*The conduct of our business may infringe the intellectual property rights of others, which may cause us to incur unexpected costs and place restrictions on our operations.*

We cannot be certain that the conduct of our business will not infringe the intellectual property rights of others. We may be subject to legal proceedings and claims in the ordinary course of our business, including claims of alleged infringement of intellectual property rights of third parties by us or our customers in connection with the conduct of our business. Any such claims, whether or not meritorious, could result in costly litigation and divert the efforts of our management and personnel. Moreover, should we be found liable for infringement, we may be required to enter into licensing agreements (if available on acceptable terms or at all) or to pay damages and to cease making or selling certain products or services. Any of the foregoing could cause us to incur significant costs and negatively affect our business, financial condition, or reputation.

*We may incur significant costs in order to comply with environmental, health and safety laws and regulations, and any failure to comply with such laws and regulations could result in significant penalties or other liabilities or costs.*

Our operations are subject to stringent federal, state and local laws and regulations relating to protection of the environment or human health and safety. Compliance with current and future environmental laws and regulations may increase our overall cost of business, including our capital costs to construct, maintain and upgrade equipment and facilities. Failure to comply with these laws and regulations may result in the assessment of significant administrative, civil and criminal penalties, the imposition of investigatory and remedial liabilities, and even the issuance of injunctions that may restrict or prohibit some or all of our operations. Such laws and regulations are subject to change and we cannot provide assurance that the cost of compliance or the consequences of any failure to comply will not have a material adverse effect on our results of operations or financial condition.

---

## [Table of Contents](#)

### **Risks Inherent in an Investment in our Class A or Class B Units or our Debt Securities and Other Risks Related to Our Capital Structure and Financing Arrangements**

*If we are unable to access the financing markets, including through our Credit Facility, it may adversely impact our business and liquidity.*

Market conditions may impact our ability to access the financing markets on terms acceptable to us or at all. In addition, there are limitations on our ability to utilize fully all commitments under our Credit Facility. Availability under our Credit Facility is determined by reference to a borrowing base comprised of a combination of accounts receivable and propane inventory that fluctuates over time and the borrowing base may be further reduced by discretionary actions of the administrative agent under the Credit Facility. See [Note H – Debt](#) to the consolidated financial statements for details. If we are unable to access the financing markets, including through our Credit Facility, we would be required to use cash on hand to fund operations and repay outstanding debt. There is no assurance that we will be able to generate sufficient cash to fund our operations and repay or refinance such debt.

*Our substantial indebtedness and other financial obligations could impair our financial condition and our ability to satisfy our obligations and we may be forced to take other actions to satisfy our obligations under our indebtedness, which may not be successful.*

We have substantial indebtedness and other financial obligations. Our ability to make scheduled payments on or refinance our debt obligations depends on our financial condition and operating performance, which are subject to prevailing economic and competitive conditions and to certain financial, business, legislative, regulatory and other factors beyond our control. We may be unable to maintain a level of cash flows from operating activities sufficient to permit us to pay the principal, premium, if any, and interest on our indebtedness. See [Note H – Debt](#) to the consolidated financial statements included elsewhere herein for more detail. Our long-term debt obligations do not contain any sinking fund provisions, but require aggregate principal payments, without premium, as disclosed in “Management’s Discussion and Analysis of Financial Condition and Results of Operations-Liquidity and Capital Resources-Material Cash Requirements.”

If our cash flows and capital resources are insufficient to fund our debt service obligations, we could face substantial liquidity problems and could be forced to reduce or delay investments and capital expenditures or to dispose of material assets or operations, seek additional debt or equity capital or restructure or refinance our indebtedness. We may not be able to effect any such alternative measures, if necessary, on commercially reasonable terms or at all and, even if successful, those alternative actions may not allow us to meet our scheduled debt service obligations. Our ability to enter leasing transactions at favorable terms could also be impacted. The Indentures, the Credit Agreement and the OpCo LPA Amendment restrict our ability to dispose of assets and use the proceeds from those dispositions and may also restrict our ability to raise debt or equity capital to be used to repay other indebtedness when it becomes due. We may not be able to consummate those dispositions or obtain proceeds in an amount sufficient to meet any debt service obligations then due. For more detail, see [Note H – Debt](#) and [Note I – Preferred units](#) to the consolidated financial statements included elsewhere herein.

*A lowering or withdrawal of the ratings assigned to our debt securities by rating agencies may increase our future borrowing costs and reduce our access to capital.*

The operating partnership has a corporate rating of B1 from Moody’s Investors Service (“Moody’s”). Our senior unsecured notes were assigned a B2 rating by Moody’s. Any rating assigned could be lowered or withdrawn entirely by a rating agency if, in that rating agency’s judgment, future circumstances relating to the basis of the rating, such as adverse changes, so warrant. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of our debt securities. Any future lowering of our ratings likely would make it more difficult or more expensive for us to obtain additional debt financing. If any credit rating initially assigned to the OpCo Notes or other debt securities is subsequently lowered or withdrawn for any reason, you may not be able to resell such debt securities without a substantial discount.

## [Table of Contents](#)

*Restrictive covenants in the Indentures, the Credit Agreement and the agreements governing our other future indebtedness and other financial obligations may reduce our operating flexibility and ability to make cash distributions to holders of Class A Units and Class B Units. The Indentures, the Credit Agreement and the OpCo LPA Amendment contain important exceptions to the covenants.*

The Indentures and the Credit Agreement contain, and any agreement that will govern debt incurred by us in the future may contain, various covenants that limit our ability to take certain actions as described in Note H – Debt to the consolidated financial statements included elsewhere herein. These covenants also limit the ability of the operating partnership to make distributions to Ferrellgas Partners and therefore effectively limit the ability of Ferrellgas Partners to make distributions to its Class A Unitholders and Class B Unitholders. See [Note I – Preferred units](#) for a discussion of limitations related to distributions.

The Indentures and the Credit Agreement contain important exceptions to the covenants, including the covenants that restrict our ability to sell assets and make restricted payments. For example, the Indentures initially permit the operating partnership to make \$60 million plus the amount of the operating partnership’s Available Cash from Operating Surplus (as defined in the Indentures) for the preceding fiscal quarter (so long as the operating partnership’s fixed coverage ratio is at least 1.75x) or \$25 million (if the operating partnership’s fixed coverage ratio is below 1.75x) plus an additional \$25 million, in each case, of restricted payments for any purpose, subject to compliance with applicable conditions, as well as to make additional restricted payments for specified purposes. Furthermore, we may utilize exceptions to sell assets and such asset sales may be on unfavorable terms.

*The operating partnership issued \$700.0 million aggregate initial liquidation preference of Preferred Units, the terms of which restrict us from undertaking certain actions while such Preferred Units are outstanding.*

The Preferred Units are entitled to quarterly distributions in cash or payment in kind and are redeemable at the option of the operating partnership at any time, or at the option of the holders no earlier than ten years after the Effective Date, subject to the terms as described in more detail under Note I – Preferred units to our consolidated financial statements included elsewhere herein.

For so long as at least 20% of the Preferred Units initially issued (without any adjustment for new Preferred Units issued as payment in kind) remain outstanding, holders of the Preferred Units have the right, voting as a separate class, to designate one director onto the board of the general partner, which may not exceed nine directors.

For so long as at least \$35.0 million aggregate liquidation preference of Preferred Units remain outstanding, the partnership agreements of Ferrellgas Partners and the operating partnership limit certain actions, unless agreed by holders of at least 1/3 of the outstanding Preferred Units. Accordingly, the holders of the Preferred Units will have significant influence with respect to our management, business plans and policies. The interests of holders of the Preferred Units may conflict with our interests or the interests of our debtholders or securityholders.

Additionally, upon the occurrence of certain “change of control” transactions, the holders of the Preferred Units will have the option to require the redemption of all or a portion of the Preferred Units in cash in an amount equal to the redemption price; and such a “change of control” will also trigger a “change of control” under the Indentures.

In the event that no Class B Units are outstanding and the outstanding amount of Preferred Units is greater than \$233.3 million after the tenth anniversary of the Effective Date, to the extent the operating partnership fails to redeem all the outstanding Preferred Units, holders of at least 1/3 of the outstanding Preferred Units will have the right to appoint a majority of the members of the board of directors of the general partner and initiate a sale of the operating partnership. These restrictions may limit our flexibility to pursue strategic opportunities.

---

## [Table of Contents](#)

*We may be unable to repurchase the OpCo Notes or repay or repurchase other debt or other securities upon a change of control.*

Upon the occurrence of a “change of control” under the Indentures, we or a third party will be required to make a change of control offer to repurchase the OpCo Notes at 101% of their principal amount, plus accrued and unpaid interest. Additionally, a change of control under the Credit Facility constitutes an event of default that permits the lenders to accelerate the maturity of borrowings under the Credit Agreement and terminate their commitments to lend thereunder. We may not have the financial resources to purchase the OpCo Notes, particularly if a change of control event triggers a similar repurchase requirement for, or results in the acceleration of, other indebtedness, including under our Credit Facility. In addition, the Preferred Units have similar change of control provisions which require us to offer to redeem the Preferred Units at a price equal to the then-current liquidation preference per unit, plus accrued and unpaid distributions. These restrictions could prevent us from satisfying our obligations to purchase such securities unless we are able to refinance the indebtedness or obtain waivers or consents from the holders thereof. Our failure to pay the change of control purchase price or repay borrowings when due would allow the holders to declare such indebtedness be immediately due and payable. The exercise by the holders of our indebtedness under the OpCo Notes or the Credit Agreement of their right to require us to repurchase or repay such indebtedness upon a change of control could cause a default under the agreements governing our other indebtedness or other securities, including future agreements, even if the change of control itself does not, due to the financial effect of such repurchases on us. In the event a repurchase or repayment is required at a time when we are prohibited from purchasing or repaying such indebtedness, we could attempt to refinance the indebtedness that contains such prohibitions. If we do not obtain a consent or repay such indebtedness, our failure to purchase or repay such indebtedness would constitute an event of default which could, in turn, constitute a default under our other indebtedness. Finally, our ability to pay cash to the holders of such indebtedness upon a change of control may be limited by our then existing financial resources.

*We may not be able to clearly establish when a sale of all or substantially all of the assets has occurred under New York law.*

One of the events that may constitute a change of control is a sale of all or substantially all our assets. The meaning of “substantially all” varies according to the facts and circumstances of the subject transaction and has no clearly established meaning under New York law, which governs the Indentures and the Credit Agreement. This ambiguity as to when a sale of substantially all of our assets has occurred may result in uncertainty regarding whether a change of control has occurred and whether an obligation to offer to repurchase or repay under the Indentures or the Credit Agreement has been triggered.

*Our Class A Units are no longer listed on the New York Stock Exchange and are instead traded on the OTC Pink Market. The OTC Pink Market has less liquidity than the NYSE and unitholders may face limited availability of market quotations for our Class A Units, reduced liquidity for the trading of our Class A Units and potentially lower trading prices for our Class A Units.*

We expect our Class A Units to be quoted on the OTC Pink Market for the foreseeable future. Unitholders may face limited availability of market quotations for our Class A Units, reduced liquidity for the trading of our Class A Units and potentially lower trading prices for our Class A Units. In addition, we could experience a decreased ability to issue additional securities and obtain additional financing in the future, and it could impair our ability to provide equity incentives to our employees. There can be no assurance that the trading market for our Class A Units will improve in the future or that any improvement will be sustained.

*There may be no active trading market for our debt securities, which may limit a holder’s ability to sell our debt securities.*

The OpCo Notes are not, and we do not expect any debt securities we may issue in the future to be, listed on any securities exchange quoted through any automated quotation system. An established market for our debt securities may not develop, or if one does develop, it may not be maintained. We cannot assure

a debt holder that a liquid market for the debt securities will develop, or that the holder will be able to sell its debt securities or receive a specific price upon any sale of its debt securities. If a public market for our debt securities did develop, the debt securities could trade at prices that may be higher or lower than their principal amount or purchase price, depending on many factors.

## [Table of Contents](#)

*Subject to certain restrictions, Ferrellgas Partners may dilute existing interests of unitholders by selling additional limited partner interests. Ferrellgas Partners may also dilute existing Class A Units by converting Class B Units to Class A Units.*

The partnership agreement of Ferrellgas Partners generally allows Ferrellgas Partners to issue additional limited partner interests and other equity securities, subject to consent by holders of the Requisite Class B Units (defined as (a) if the holder that initially holds a majority of the Class B Units (the “Initial Class B Majority Holder”) holds at least 50% of the Class B Units, holders of at least 50% of the outstanding Class B Units or (b) if the Initial Class B Majority Holder holds less than 50% of the Class B Units, holders of at least one-third of the outstanding Class B Units). When Ferrellgas Partners issues additional equity securities, a unitholder’s proportionate partnership interest in such class will decrease. Such an issuance could negatively affect the amount of cash distributed to unitholders and the market price of such units. The issuance of additional units will also diminish the relative voting strength of the previously outstanding class of units. In addition, Ferrellgas Partners may issue preferred or other securities that could have a preferred right to distributions or other priority economic terms, which could negatively affect the value of our outstanding units. See [Note J – Equity \(Deficit\)](#) to the consolidated financial statements included elsewhere herein for more information related to the Class B units.

*If Ferrellgas Partners is permitted to make and makes distributions to its partners, while any Class B Units remain outstanding, Class B Unitholders collectively will receive at least approximately 85.7% of the aggregate amount of each such distribution and may receive up to 100% of any such distribution. Accordingly, while any Class B Units remain outstanding, Class A Unitholders may not receive any distributions and, in any case, will not receive collectively more than approximately 14.1% of any distribution.*

See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources” for information on partnership distributions pursuant to the Amended Ferrellgas Partners LPA. For additional discussion of the terms of the Class B Units, see [Note J – Equity \(Deficit\)](#) – in the notes to our consolidated financial statements included elsewhere herein. Although the general partner has not made any decisions or adopted any policy with respect to the allocation of future distributions by Ferrellgas Partners to its partners, the general partner may determine that it is advisable to pay more than the minimum amount of any distribution, up to 100% of the amount of such distribution, to Class B Unitholders.

### **Risks Arising from Our Partnership Structure and Relationship with Our General Partner**

*Ferrellgas Partners is a holding entity and has no material operations or assets, other than its ownership stake in the operating partnership and Ferrellgas Partners Finance Corp. Accordingly, Ferrellgas Partners is dependent on distributions from the operating partnership to service its obligations and pay distributions to its unitholders. These distributions are not guaranteed and are subject to significant limitations.*

Ferrellgas Partners is a holding entity for our subsidiaries, including the operating partnership. Ferrellgas Partners has no material operations and only limited assets. Ferrellgas Partners Finance Corp. is Ferrellgas Partners’ wholly-owned finance subsidiary, acts only as a co-obligor on its debt securities, if any, conducts no business and has nominal assets. Accordingly, Ferrellgas Partners is dependent on cash distributions from the operating partnership and its subsidiaries to service any obligations of Ferrellgas Partners and pay distributions to its unitholders.

*Unitholders have limited voting rights; our general partner manages and operates us, thereby generally precluding the participation of our unitholders in operational decisions.*

Our general partner manages and operates us. Unlike the holders of common stock in a corporation, our unitholders generally have only limited voting rights on matters affecting our business. Holders of Ferrellgas Partners’ Class B Units and the operating partnership’s Preferred Units have certain additional voting rights focused on their respective distribution rights or preferences and their respective protective covenants and other rights under the partnership agreements of Ferrellgas Partners and the operating

partnership. Amendments to the agreement of limited partnership of Ferrellgas Partners may be proposed only by or with the consent of our general partner. Proposed amendments must generally be approved by holders of at least a majority of Ferrellgas Partners' outstanding Class A Units and, in certain cases, holders of Ferrellgas Partners' Class B Units and the operating partnership's Preferred Units.

## [Table of Contents](#)

Class A Unitholders will have no right to elect our general partner or the directors of our general partner on an annual or other continuing basis. See [Note J – Equity \(Deficit\)](#) to the consolidated financial statements included elsewhere herein for Board rights related to the Class B Units. Under certain circumstances, holders of the Preferred Units may have the right to appoint a majority of the Board of Directors of our general partner ten years after the Effective Date. See [Note I – Preferred units](#) to the consolidated financial statements included elsewhere herein.

Our general partner may not be removed except pursuant to the vote of the holders of at least 66 2/3% of the outstanding units entitled to vote thereon, which includes the Class A Units owned by our general partner and its affiliates and upon the election of a successor general partner by the vote of the holders of not less than a majority of the outstanding Class A Units entitled to vote; provided that holders of the Class B Units will have the right to remove the general partner under certain circumstances.

*Unitholders may not have limited liability in specified circumstances and may be liable for the return of distributions.*

The limitations on the liability of holders of limited partner interests for the obligations of a limited partnership have not been clearly established in some states. The limited partners could be held liable in some circumstances for our obligations to the same extent as a general partner if it were determined that we had been conducting business in any state without compliance with the applicable limited partnership statute.

In addition, under some circumstances a unitholder may be liable to us for the amount of a distribution for a period of three years from the date of the distribution. Unitholders will not be liable for assessments in addition to their initial capital investment in our Class A Units. Under Delaware law, we may not make a distribution to our unitholders if the distribution causes all our liabilities to exceed the fair value of our assets. Liabilities to partners on account of their partnership interests and liabilities for which recourse is limited to specific property are not counted for purposes of determining whether a distribution is permitted. Delaware law provides that a limited partner who receives such a distribution and knew at the time of the distribution that the distribution violated the Delaware law will be liable to the limited partnership for the distribution amount for three years from the distribution date. Under Delaware law, an assignee that becomes a substituted limited partner of a limited partnership is liable for the obligations of the assignor to make contributions to the partnership. However, such an assignee is not obligated for liabilities unknown to that assignee at the time such assignee became a limited partner if the liabilities could not be determined from the partnership agreements.

## **Tax Risks**

*The U.S. Internal Revenue Service (the “IRS”) could challenge our classification as a partnership for federal income tax purposes, which, if successful, would result in our being treated as a corporation for federal income tax purposes. Additionally, changes in federal or state laws could subject us to entity-level taxation. Either of these events would substantially reduce the cash available for distribution to our unitholders.*

We believe that, under current law, we have been and will continue to be classified as a partnership for federal income tax purposes; however, we have not requested, and do not plan to request, a ruling from the IRS with respect to our treatment as a partnership for federal income tax purposes. One of the requirements for such classification is that at least 90% of our gross income for each taxable year has been and will be “qualifying income” within the meaning of Section 7704 of the Internal Revenue Code of 1986, as amended (the “Internal Revenue Code”). Whether we will continue to be classified as a partnership depends in part on our ability to meet this qualifying income test in the future.

If we were classified as a corporation for federal income tax purposes, we would pay tax on our income at corporate rates, currently a maximum of 21% at the federal level, and we would probably pay additional state income taxes as well. In addition, distributions would generally be taxable to the recipient as corporate dividends and no income, gains, losses or deductions would flow through to our unitholders.

Because a tax would be imposed upon us at the entity level as a corporation, the cash available for distribution to our unitholders would be substantially reduced. Therefore, treatment of us as a corporation would result in a material reduction in the anticipated cash flow and after-tax return to our unitholders and thus would likely result in a substantial reduction in the value of our units.

## [Table of Contents](#)

*The tax treatment of publicly traded partnerships could be subject to potential legislative, judicial or administrative changes and differing interpretations, possibly on a retroactive basis.*

The present U.S. federal income tax treatment of publicly traded partnerships, including us, may be modified by administrative or judicial interpretation or legislative action at any time. Any modification to the U.S. federal income tax laws and interpretations thereof may or may not be applied retroactively and could make it more difficult or impossible to meet the exception for us to be treated as a partnership for U.S. federal income tax purposes that is not taxable as a corporation, affect or cause us to change our business activities, affect the tax considerations of an investment in us and change the character or treatment of portions of our income. Any such changes could cause us to be treated as an association taxable as a corporation for U.S. federal income tax purposes and thereby subject us to entity-level income taxes, which would cause a material reduction in our anticipated cash flows and adversely affect the value of our units.

*A successful IRS contest of the federal income tax positions we take may reduce the market value of our units and the costs of any contest will be borne by us and therefore indirectly by our unitholders and our general partner.*

The IRS may adopt positions that differ from those expressed herein or from the positions we take. It may be necessary to resort to administrative or court proceedings in an effort to sustain some or all of the positions we take, and some or all of these positions ultimately may not be sustained. Any successful IRS contest may materially reduce the market value of our units and the prices at which our units trade. In addition, our costs of any contest with the IRS will be borne by us and therefore indirectly by our unitholders and our general partner.

*Unitholders may be required to pay taxes on their share of our taxable income even if they do not receive cash distributions from us.*

Unitholders may be required to pay federal income taxes and, in some cases, state and local income taxes on their share of our taxable income, including our taxable income associated with a disposition of property or cancellation of debt, whether or not they receive any cash distributions from us. Unless we are able to pay and actually pay cash distributions on our Class A Units, Class A Unitholders will not receive any cash from us to cover any such tax liabilities, and, if we do pay cash distributions in the future, such cash distributions may not be equal to unitholders' share of our taxable income or even equal to the actual tax liability which results from that income.

We continue to pursue a strategy to normalize our capital structure. As part of this strategy, we may engage in transactions that could have significant adverse tax consequences to our unitholders. For example, we may sell some of our assets and use the proceeds to fund capital expenditures or a redemption or conversion of our Class B Units or Preferred Units rather than distributing the proceeds to our unitholders, and some or all of our unitholders may be allocated substantial taxable income and gain resulting from the sale without receiving a cash distribution. We may also engage in transactions to reduce our existing debt or debt service costs, such as debt exchanges, debt repurchases, or modifications of our existing debt, that could result in cancellation of indebtedness income, or other income, being allocated to our unitholders as taxable income. This may cause a unitholder to be allocated taxable income with respect to our units with no corresponding distribution of cash to fund the payment of the unitholder's resulting tax liability. The ultimate effect of any such allocations will depend on the unitholder's individual tax position with respect to its units. Unitholders are encouraged to consult their tax advisors with respect to the consequences to them of this income.

## [Table of Contents](#)

*Our unitholders may be subject to limitations on their ability to deduct interest expense incurred by us.*

In general, our Class A Unitholders are entitled to a deduction for the interest we have paid or accrued on indebtedness properly allocable to our business during our taxable year. However, under the Tax Cuts and Jobs Act of 2017 (the “Tax Act”), for taxable years beginning after December 31, 2017, the deductibility of net interest expense is limited to the sum of our business interest income and 30% (or 50% for 2020, as amended by the CARES Act) of our “adjusted taxable income”. For tax years beginning after December 31, 2017 and before January 1, 2022, the Tax Act calculates adjusted taxable income using an EBITDA-based calculation. For tax years beginning January 1, 2022 and thereafter, the calculation of adjusted taxable income will not add back depreciation or amortization. Any business interest expense disallowed at the partnership level is then generally carried forward and may be deducted in a succeeding taxable year by a unitholder, in accordance with the unitholder’s applicable tax laws. These limitations might cause interest expense to be deducted by our unitholders in a later period than recognized in the GAAP financial statements.

*There are limits on the deductibility of losses.*

In the case of unitholders subject to the passive loss rules (generally, individuals, closely held corporations and regulated investment companies), any losses generated by us will only be available to offset our future income and cannot be used to offset income from other activities, including passive activities or investments. Unused losses may be deducted when the unitholder disposes of its entire investment in us in a fully taxable transaction with an unrelated party. A unitholder’s share of our net passive income may be offset by unused losses carried over from prior years, but not by losses from other passive activities, including losses from other publicly-traded partnerships.

*Tax gain or loss on the disposition of our Class A Units could be different than expected.*

If a unitholder sells its Class A Units, the unitholder will recognize a gain or loss equal to the difference between the amount realized and its tax basis in those Class A Units. Prior distributions in excess of the total net taxable income the unitholder was allocated for a Class A Unit, which decreased its tax basis in that Class A Unit, will, in effect, become taxable income to the unitholder if the Class A Unit is sold at a price greater than its tax basis in that Class A Unit, even if the price received is less than its original cost. A substantial portion of the amount realized, whether or not representing a gain, will likely be ordinary income to that unitholder. Should the IRS successfully contest certain positions we take, a selling unitholder could recognize more gain on the sale of units than would be the case under those positions, without the benefit of decreased taxable income in prior years. In addition, if a unitholder sells its units, the unitholder may incur a tax liability in excess of the amount of cash that unitholder receives from the sale.

*Tax-exempt entities, regulated investment companies, and foreign persons face unique tax issues from owning Class A Units that may result in additional tax liability or reporting requirements for them.*

An investment in Class A Units by tax-exempt entities, such as employee benefit plans, individual retirement accounts, regulated investment companies, generally known as mutual funds, and non-U.S. persons, raises issues unique to them. For example, virtually all of our income allocated to organizations exempt from federal income tax, including individual retirement accounts and other retirement plans, will be unrelated business taxable income and thus will be taxable to them. Net income from a “qualified publicly-traded partnership” is qualifying income for a regulated investment company, or mutual fund. However, no more than 25% of the value of a regulated investment company’s total assets may be invested in the securities of one or more qualified publicly-traded partnerships. We expect to be treated as a qualified publicly-traded partnership. Distributions, if any, made to non-U.S. persons will be reduced by withholding taxes, at the highest effective tax rate applicable to individuals, and non-U.S. persons will be required to file federal income tax returns and generally pay tax on their share of our taxable income.

---

## [Table of Contents](#)

*Reporting of partnership tax information is complicated and subject to audits; we cannot guarantee conformity to IRS requirements. As a result of investing in our units, a unitholder will likely be subject to state and local taxes and return filing requirements in jurisdictions in which it is not domiciled. Additionally, unitholders may have negative tax consequences if we default on our debt or sell assets.*

We will furnish each unitholder with a Schedule K-1 that sets forth that unitholder's allocable share of income, gains, losses and deductions. In preparing these schedules, we will use various accounting and reporting conventions and adopt various depreciation and amortization methods. We cannot guarantee that these schedules will yield a result that conforms to statutory or regulatory requirements or to administrative pronouncements of the IRS. If any of the information on these schedules is successfully challenged by the IRS, the character and amount of items of income, gain, loss or deduction previously reported by unitholders might change, and unitholders might be required to adjust their tax liability for prior years and incur interest and penalties with respect to those adjustments.

We may be audited by the IRS and tax adjustments could be made. The rights of a unitholder owning less than a 1% interest in us to participate in the income tax audit process are very limited. Further, any adjustments in our tax returns may lead to adjustments in unitholders' tax returns and may lead to audits of unitholders' tax returns and adjustments of items unrelated to us. A unitholder will bear the cost of any expenses incurred in connection with an examination of its personal tax return.

Pursuant to the Bipartisan Budget Act of 2015, if the IRS makes audit adjustments to our income tax returns for tax years beginning after 2017, it may collect any resulting taxes (including any applicable penalties and interest) directly from us. We will generally have the ability to shift any such tax liability to our general partner and our unitholders in accordance with their interests in us during the year under audit, but there can be no assurance that we will be able to do so under all circumstances. If we are required to make payments of taxes, penalties and interest resulting from audit adjustments, our cash available for distribution to our unitholders might be substantially reduced.

In addition to federal income taxes, unitholders will likely be subject to other taxes, such as state and local taxes, unincorporated business taxes and estate, inheritance or intangible taxes that are imposed by the various jurisdictions in which we do business or own property. A unitholder will likely be required to file state and local income tax returns and pay state and local income taxes in some or all of the various jurisdictions in which we do business or own property and may be subject to penalties for failure to comply with those requirements. We currently conduct business in all 50 states, the District of Columbia and Puerto Rico. It is each unitholder's responsibility to file all required federal, state and local tax returns.

If we default on any of our debt, the holders will have the right to sue us for non-payment. That action could cause an investment loss and negative tax consequences for our unitholders through the realization of taxable income by unitholders without a corresponding cash distribution. Likewise, if we were to dispose of assets and realize a taxable gain while there is substantial debt outstanding and proceeds of the sale were applied to the debt, our unitholders could have increased taxable income without a corresponding cash distribution.

*A unitholder whose Class A Units are the subject of a securities loan (e.g., a loan to a "short seller" to cover a short sale of Class A Units) may be deemed to have disposed of those Class A Units. If so, the unitholder would no longer be treated for tax purposes as a partner with respect to those Class A Units during the period of the loan and may recognize gain or loss from the disposition.*

Because there are no specific rules governing the U.S. federal income tax consequences of loaning a partnership interest, a unitholder whose Class A Units are the subject of a securities loan may be deemed to have disposed of the loaned units. In that case, the unitholder may no longer be treated for tax purposes as a partner with respect to those Class A Units during the period of the loan and the unitholder may recognize gain or loss from such disposition. Moreover, during the period of the loan, any of our income, gain, loss or deduction with respect to those Class A Units may not be reportable by the unitholder and any cash distributions received by the unitholder as to those Class A Units could be fully taxable as ordinary income. Unitholders desiring to assure their status as partners and avoid the risk of gain recognition from a loan to a

short seller should modify any applicable brokerage account agreements to prohibit their brokers from borrowing their Class A Units.

## [Table of Contents](#)

### **Conflicts of Interest**

Conflicts of interest could arise as a result of the relationships between us, on the one hand, and our general partner and its affiliates, on the other. The directors and officers of our general partner have fiduciary duties to manage our general partner in a manner beneficial to our general partner and its stockholder. At the same time, our general partner has a contractual good faith duty of care to manage us in a manner the general partner reasonably believes to be in, or not inconsistent with, our best interests. The contractual duties of our general partner to us and our unitholders, therefore, may conflict with the fiduciary duties of the directors and officers of our general partner to our general partner and its stockholder.

Matters in which, and reasons that, such conflicts of interest may arise include:

- we do not have any employees and rely solely on employees of our general partner and its affiliates;
- under the terms of the partnership agreements of Ferrellgas Partners and the operating partnership, we must reimburse our general partner and its affiliates for costs incurred in managing and operating us, including costs incurred in providing employees to the operating partnership and rendering corporate staff and support services to us;
- our general partner is not restricted from causing us to pay it or its affiliates for any services rendered on terms that are fair and reasonable to us or causing us to enter into additional contractual arrangements with any of such entities;
- neither the partnership agreements of Ferrellgas Partners and the operating partnership nor any of the other agreements, contracts and arrangements between us, on the one hand, and our general partner and its affiliates, on the other, are or will be the result of arm's-length negotiations;
- whenever possible, our general partner limits our liability under contractual arrangements to all or a portion of our assets, with the other party thereto having no recourse against our general partner or its assets;
- the partnership agreements of Ferrellgas Partners and the operating partnership permit our general partner to make these limitations even if we could have obtained more favorable terms if our general partner had not limited its liability;
- any agreements between us and our general partner or its affiliates will not grant to our unitholders, separate and apart from us, the right to enforce the obligations of our general partner or such affiliates in favor of us; therefore, our general partner will be primarily responsible for enforcing those obligations against itself or such affiliates;
- our general partner may exercise its limited right to call for and purchase Class A Units as provided in the partnership agreement of Ferrellgas Partners or assign that right to one of its affiliates or to us;
- our partnership agreements provide that it will not constitute a breach of our general partner's fiduciary duties to us for its affiliates to engage in activities of the type conducted by us, other than retail propane sales to end users in the continental United States in the manner engaged in by our general partner immediately prior to our initial public offering, even if these activities are in direct competition with us;
- our general partner and its affiliates have no obligation to present business opportunities to us;
- our general partner selects the attorneys, accountants and others who perform services for us, and these persons may also perform services for our general partner and its affiliates; however, our general partner is authorized to retain separate counsel for us or our unitholders, depending on the nature of the conflict that arises; and
- James E. Ferrell is the Chief Executive Officer and President of our general partner and the Chairman of the Board of Directors of our general partner. Mr. Ferrell also owns other companies with whom we may, from time to time, conduct transactions in the ordinary course of our business. Mr. Ferrell's ownership of these entities may conflict with his duties as an officer or

director of our general partner, including with respect to our relationship and conduct of business with any of Mr. Ferrell's companies.

[Table of Contents](#)

## **Fiduciary Responsibilities**

Unless otherwise provided for in a partnership agreement, Delaware law generally requires a general partner of a Delaware limited partnership to adhere to fiduciary duty standards under which it owes its limited partners the highest duties of good faith, fairness and loyalty and which generally prohibit the general partner from taking any action or engaging in any transaction as to which it has a conflict of interest. The partnership agreements of both Ferrellgas Partners and the operating partnership, as permitted by Delaware law, unconditionally eliminate the default fiduciary duty standards and require the general partner to adhere to the contractual good faith duty of care set forth in those agreements. Specifically, the general partner need only take actions that it, as general partner, reasonably believes to be in, or not inconsistent with, the best interest of Ferrellgas Partners and the operating partnership. Thus, neither the general partner nor Ferrellgas Partners owes traditional fiduciary duties to the unitholders.

The partnership agreements of Ferrellgas Partners and the operating partnership expressly permit our general partner to resolve conflicts of interest between itself or its affiliates, on the one hand, and us or our unitholders, on the other, and to consider, in resolving such conflicts of interest, the interests of other parties in addition to the interests of our unitholders. In addition, the partnership agreement of Ferrellgas Partners provides that a purchaser of Class A Units is deemed to have consented to specified conflicts of interest and actions of our general partner and its affiliates that might otherwise be prohibited, including those described above, and to have agreed that such conflicts of interest and actions do not constitute a breach by our general partner of any duty stated or implied by law or equity. Our general partner will not be in breach of its obligations under the partnership agreements of Ferrellgas Partners or the operating partnership or its duties to us or our unitholders if the resolution of such conflict is fair and reasonable to us. Under the partnership agreements, any conflict of interest and any resolution thereof will conclusively be deemed fair and reasonable to us if it is (i) approved by the audit committee of our general partner, or (ii) on terms no less favorable to us than those generally being provided to or available from unrelated third parties or (iii) fair to us, taking into account the totality of the relationships between the parties involved (including other transactions that may be particularly favorable or advantageous to us). The latitude given in the partnership agreements to our general partner in resolving conflicts of interest may significantly limit the ability of a unitholder to challenge what might, in the absence of the partnership agreement provisions eliminating default fiduciary duties be a breach of fiduciary duty.

The partnership agreements of Ferrellgas Partners and the operating partnership expressly limit the liability of our general partner by providing that our general partner, its affiliates and their respective officers and directors will not be liable for monetary damages to us, our unitholders or assignees thereof for errors of judgment or for any acts or omissions if our general partner and such other persons acted in good faith. In addition, we are required to indemnify our general partner, its affiliates and their respective officers, directors, employees, agents and trustees to the fullest extent permitted by law against liabilities, costs and expenses incurred by our general partner or such other persons if our general partner or such persons acted in good faith and in a manner it or they reasonably believed to be in, or (in the case of a person other than our general partner) not opposed to, the best interests of us and, with respect to any criminal proceedings, had no reasonable cause to believe the conduct was unlawful.

## **ITEM 1B. UNRESOLVED STAFF COMMENTS.**

None.

[Table of Contents](#)

**ITEM 2. PROPERTIES.**

We own or lease the following transportation equipment at July 31, 2022:

	<u>% Owned</u>	<u>% Leased</u>	<u>Approximate Total</u>
Truck tractors	45 %	55 %	110
Propane transport trailers	100 %	— %	170
Portable tank delivery trucks	37 %	63 %	640
Portable tank exchange delivery trailers	90 %	10 %	310
Bulk propane delivery trucks	46 %	54 %	1,500
Pickup and service trucks	56 %	44 %	960
Passenger vehicles	38 %	62 %	160
Other trailers	100 %	— %	200
Railroad tank cars	— %	100 %	29

The propane transport trailers have an average capacity of approximately 10,000 gallons. The bulk propane delivery trucks are generally fitted with tanks ranging in size from 2,600 to 3,500 gallons. Each railroad tank car has a capacity of approximately 30,000 gallons.

We typically manage our propane distribution locations using a structure where one location, referred to as a service center, is staffed to provide oversight and management to multiple distribution locations, referred to as service units. At July 31, 2022, our propane distribution locations were comprised of 49 service centers and 795 service units. The service unit locations utilize hand-held computers and cellular or satellite technology to communicate with management typically located in the associated service center. We believe this structure together with our technology platform allows us to more efficiently route and schedule customer deliveries and significantly reduces the need for daily on-site management.

We also distributed propane for portable tank exchanges from 128 company-owned distributors and 4 independently-owned distributors at July 31, 2022. In addition, we had 12 company-owned portable tank exchange production facilities at July 31, 2022.

We owned approximately 48.1 million gallons of propane storage capacity at our propane distribution locations at July 31, 2022. We owned our land and buildings in the local markets of approximately 63% of our operating locations and leased the remaining facilities on terms customary in the industry at July 31, 2022.

We owned approximately 0.8 million propane tanks at July 31, 2022, most of which are located on customer property and rented to those customers. We also owned approximately 4.5 million portable propane cylinders at July 31, 2022, most of which are used by us to deliver propane to our portable tank exchange customers and to deliver propane to our industrial/commercial customers.

At July 31, 2022, we leased approximately 41.7 million gallons of propane storage capacity located at underground storage facilities and pipelines at various locations around the United States.

At July 31, 2022, we leased 54,691 square feet of office space at our corporate headquarters in the Kansas City metropolitan area.

We believe that we have satisfactory title to or valid rights to use all of our material properties. Although some of those properties may be subject to liabilities and leases, liens for taxes not yet currently due and payable and immaterial encumbrances, easements and restrictions, we do not believe that any such burdens will materially interfere with the continued use of such properties in our business. We believe that we have obtained, or are in the process of obtaining, all required material approvals. These approvals include authorizations, orders, licenses, permits, franchises, consents of, registrations, qualifications and filings with, the various state and local governmental and regulatory authorities which relate to our ownership of properties to our operations.

[Table of Contents](#)

**ITEM 3. LEGAL PROCEEDINGS.**

For information regarding legal proceedings, see [Note P – Contingencies and commitments](#) - to the consolidated financial statements appearing in this Annual Report on Form 10-K.

**ITEM 4. MINE SAFETY DISCLOSURES.**

Not applicable.

**PART II**

**ITEM 5. MARKET FOR REGISTRANTS' COMMON EQUITY, RELATED UNITHOLDER AND STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.**

**Market Information for Ferrellgas Partners**

Our Class A Units represent limited partner interests in Ferrellgas Partners and are listed and traded on the OTC Pink Market under the symbol “FGPR.” Any over-the-counter market quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission, and may not necessarily represent actual transactions.

As of August 31, 2022, we had 363 Class A Unitholders of record. That Class A Unitholder figure does not include a substantially greater number of holders who are “street name” or beneficial holders and whose units are held of record by banks, brokers, and other institutions.

**Distributions by Ferrellgas Partners**

We have not paid any cash distributions to Class A Unitholders or the general partner during fiscal 2022, 2021 or 2020. Ferrellgas Partners made aggregate cash distributions of approximately \$100.0 million to its Class B Unitholders during the year ended July 31, 2022.

For a discussion of considerations related to distributions by Ferrellgas Partners, including the requirements for and limitations on distributions under our partnership agreements and the agreements governing our indebtedness, see Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources – Financing Activities – Distributions.”

**Recent Sales of Unregistered Equity Securities**

There were none during fiscal 2022.

**Purchases of Equity Securities**

There were none during the fourth quarter of fiscal 2022.

**Ferrellgas Partners Tax Matters**

Ferrellgas Partners is a master limited partnership and thus not subject to federal income taxes. Instead, our Class A and Class B Unitholders are required to report for income tax purposes their allocable share of our income, gains, losses, deductions and credits, regardless of whether we make distributions to our Unitholders. Accordingly, each Unitholder should consult its own tax advisor in analyzing the federal, state, and local tax consequences applicable to its ownership or disposition of our Class A and Class B Units. Ferrellgas Partners reports its tax information on a calendar year basis, while financial reporting is based on a fiscal year ending July 31.

## [Table of Contents](#)

### **Common Equity of Other Registrants**

There is no established public trading market for the common equity of the operating partnership, Partners Finance Corp. or Finance Corp. Our general partner owns all of the general partner interest, and Ferrellgas Partners owns all of the limited partner interest (other than the limited partner interests represented by the Preferred Units), in the operating partnership. All of the common equity of Partners Finance Corp. is held by Ferrellgas Partners and all of the common equity of Finance Corp. is held by the operating partnership. There are no equity securities of the operating partnership, Partners Finance Corp. or Finance Corp. authorized for issuance under any equity compensation plan. During fiscal 2022, there were no issuances of equity securities of the operating partnership, Partners Finance Corp. or Finance Corp.

Neither Partners Finance Corp. nor Finance Corp. declared or paid any cash dividends on its common equity during fiscal 2022, 2021 or 2020. For information regarding distributions by the operating partnership to its partners see Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources – Financing Activities – Distributions” and Note I – Preferred units and Note J– Equity (Deficit) – in the notes to the consolidated financial statements included elsewhere herein.

### **Equity Compensation Plan Information**

None.

### **ITEM 6. RESERVED.**

### **ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**

#### **Overview**

Our management’s discussion and analysis of financial condition and results of operations relates to Ferrellgas Partners and the operating partnership.

Ferrellgas Partners is a holding entity that conducts no operations and has two direct subsidiaries, the operating partnership and Partners Finance Corp. Both Partners Finance Corp. and Finance Corp. have nominal assets, do not conduct any operations and have no employees other than officers. Our activities are primarily conducted through the operating partnership. Partners Finance Corp. has served as co-issuer and co-obligor for debt securities of Ferrellgas Partners, while Finance Corp., a subsidiary of the operating partnership, serves as co-issuer and co-obligor for debt securities of the operating partnership. Accordingly, and due to the reduced disclosure format, a discussion of the results of operations, liquidity and capital resources of Partners Finance Corp. and Finance Corp. is not presented in this section.

The following is a discussion of our historical financial condition and results of operations and should be read in conjunction with our audited historical consolidated financial statements and accompanying notes thereto included elsewhere in this Annual Report on Form 10-K.

The discussions set forth in the “Results of Operations” and “Liquidity and Capital Resources” sections generally refer to Ferrellgas Partners and its consolidated subsidiaries. However, in these discussions there existed two material differences between Ferrellgas Partners and the operating partnership:

- Ferrellgas Partners had outstanding \$357.0 million aggregate principal amount of 8.625% senior unsecured notes due June 2020 (the “Ferrellgas Partners Notes”) and, accordingly, had interest expense that the operating partnership did not have. On March 30, 2021 (the “Effective Date”), by operation of the *Second Amended Prepackaged Joint Chapter 11 Plan of Reorganization of*

*Ferrellgas Partners, L.P. and Ferrellgas Partners Finance Corp.* confirmed by the U.S. Bankruptcy Court for the District of Delaware, the Ferrellgas Partners Notes were discharged and cancelled.

## [Table of Contents](#)

- On January 8, 2021, Ferrellgas Partners entered into a term loan credit agreement with the operating partnership, pursuant to which the operating partnership extended to Ferrellgas Partners an unsecured, non-amortizing term loan in the aggregate principal amount of \$19.9 million. The term loan, which had a maturity date of July 1, 2022, bore interest at a rate of 20% per annum, and all interest on the term loan was added to the outstanding principal amount. During July 2021, Ferrellgas Partners made an optional prepayment of \$9.0 million principal amount on the term loan. On May 16, 2022, Ferrellgas Partners repaid the operating partnership the full amount of the term loan of \$15.3 million, which represented the outstanding principal and accrued interest. Additionally, Ferrellgas Partners paid the operating partnership \$3.9 million for separate intercompany receivables related to expense incurred from the 2021 debt transactions.

## **Recent Developments**

### *COVID-19*

COVID-19, and variants thereof, which has been declared by the World Health Organization as a “Public Health Emergency of International Concern,” continues to evolve and impact the economy of the United States and other countries around the world. We are continuing to assess the impact that COVID-19 may have on our results of operations and financial condition and cannot at this time accurately predict what effects these conditions will have on our operations and sales due to uncertainties relating to the ultimate geographic spread of the virus, the severity of the disease, the duration of the outbreak and the length of the travel restrictions and business closures imposed by governments in different jurisdictions. Additionally, initiatives we have implemented or may implement to slow and/or reduce the impact of COVID-19, such as using staggered start times for drivers, may increase our operating expenses and reduce the efficiency of our operations.

## **How We Evaluate Our Operations**

We evaluate our overall business performance based primarily on a metric we refer to as “Adjusted EBITDA,” which is not defined by GAAP and should not be considered an alternative to earnings measures defined by GAAP. We do not utilize depreciation, depletion and amortization expense in our key measures because we focus our performance management on cash flow generation and our revenue generating assets have long useful lives. For the definition of Adjusted EBITDA and a reconciliation of Adjusted EBITDA to net earnings (loss) attributable to Ferrellgas Partners, L.P., the most directly comparable GAAP measure, see the subheading “Non-GAAP Financial Measures” below.

### *Propane operations and related equipment sales*

Based on our propane sales volumes in fiscal 2022, we believe that we are the second largest retail marketer of propane in the United States and a leading national provider of propane by portable tank exchange. We serve residential, industrial/commercial, portable tank exchange, agricultural, wholesale and other customers in all 50 states, the District of Columbia and Puerto Rico. Our operations primarily include the retail distribution and sale of propane and related equipment and supplies with concentrations in the Midwest, Southeast, Southwest and Northwest regions of the United States.

We use information on temperatures to understand how our results of operations are affected by temperatures that are warmer or colder than normal. Normal temperatures computed by us are the average of the last 10 years of information published by the National Oceanic and Atmospheric Administration. Based on this information we calculate a ratio of actual heating degree days to normal heating degree days. Heating degree days are a general indicator of weather impacting propane usage.

## [Table of Contents](#)

Weather conditions have a significant impact on demand for propane for heating purposes primarily during the months of November through March (the “winter heating season”). Accordingly, the volume of propane used by our customers for this purpose is directly affected by the severity of the winter weather in the regions we serve and can vary substantially from year to year. In any given region, sustained warmer-than-normal temperatures will tend to result in reduced propane usage, while sustained colder-than-normal temperatures will tend to result in greater usage. Although there is a strong correlation between weather and customer usage, general economic conditions in the United States and the wholesale price of propane can have a significant impact on this correlation. Additionally, there is a natural time lag between the onset of cold weather and increased sales to customers. If the United States were to experience a cooling trend, we could expect nationwide demand for propane to increase which could lead to greater sales, income and liquidity availability. Conversely, if the United States were to experience a continued warming trend, we could expect nationwide demand for propane for heating purposes to decrease which could lead to a reduction in our sales, income and liquidity availability as well as impact our ability to maintain compliance with our debt covenants.

We employ risk management activities that attempt to mitigate price risks related to the purchase, storage, transport and sale of propane generally in the contract and spot markets from major domestic energy companies. We attempt to mitigate these price risks through the use of financial derivative instruments and forward propane purchase and sales contracts. We enter into propane sales commitments with a portion of our customers that provide for a contracted price agreement for a specified period of time. These commitments can expose us to product price risk if not immediately hedged with an offsetting propane purchase commitment.

Our open financial derivative propane purchase commitments are designated as hedges primarily for fiscal 2022 and 2023 sales commitments and, as of July 31, 2022, we have experienced net mark-to-market gains of approximately \$38.3 million. Because these financial derivative purchase commitments qualify for hedge accounting treatment, the resulting asset, liability and related mark-to-market gains or losses are recorded on the consolidated balance sheets as “Prepaid expenses and other current assets,” “Other assets, net,” “Other current liabilities,” “Other liabilities” and “Accumulated other comprehensive income,” respectively, until settled. Upon settlement, realized gains or losses on these contracts will be reclassified to “Cost of sales-propane and other gas liquid sales” in the consolidated statements of operations as the underlying inventory is sold. These financial derivative purchase commitment net gains are expected to be offset by increased margins on propane sales commitments that qualify for the normal purchase normal sale exception. At July 31, 2022, we estimate 82% of currently open financial derivative purchase commitments, the related propane sales commitments and the resulting gross margin will be realized into earnings during the next twelve months.

### **Summary Discussion of Results of Operations:**

#### ***For the years ended July 31, 2022 and 2021***

During fiscal 2022, we recognized net earnings attributable to Ferrellgas Partners, L.P. of \$148.0 million, compared to a net loss attributable to Ferrellgas Partners, L.P. of \$68.4 million during fiscal 2021. This increase was primarily driven by \$104.8 million in “Loss on extinguishment of debt” and \$10.4 million of “Reorganization expense – professional fees,” both of which were recorded in the prior year period. The remainder of the increase was attributable to a \$68.4 million increase in “Gross margin,” a decrease of \$73.5 million in “Interest expense,” an \$8.4 million increase in “(Gain) loss on asset sales and disposals” and a \$7.3 million decrease in “General and administrative expense.” These increases were partially offset by a \$54.8 million increase in “Operating expenses – personnel, vehicle, plant and other.”

The increase in gross margin consists of a \$57.0 million increase in “Gross margin – Propane and other gas liquid sales” and an \$11.4 million increase in “Gross margin – Other.”

“Interest expense” for Ferrellgas Partners decreased \$73.5 million primarily due to (i) a decrease in interest on the Ferrellgas Partners Notes and (ii) lower interest expense in 2022 as a result of the March 30, 2021 refinancing transactions.

Distributable cash flow attributable to equity investors increased to \$226.8 million in fiscal 2022 compared to \$135.7 million in fiscal 2021. This increase of \$91.1 million was primarily due to a \$60.8 million decrease in net cash interest expense, a \$22.0 million increase in our Adjusted EBITDA and a \$9.1 million decrease in maintenance capital expenditures.

[Table of Contents](#)

Distributable cash flow excess decreased to \$57.0 million in fiscal 2022 as compared to \$108.9 million in fiscal 2021, primarily due to \$100.0 million in distributions paid to Class B unitholders in fiscal 2022 and a \$41.3 million increase in distributions accrued or paid to preferred unitholders, partially offset by the \$91.1 million increase in distributable cash flow attributable to equity investors noted above.

### Consolidated Results of Operations

<i>(amounts in thousands)</i>	Year ended July 31,	
	2022	2021
Total revenues	\$ 2,114,540	\$ 1,754,310
Total cost of sales	1,186,513	894,664
Operating expense - personnel, vehicle, plant and other	520,603	465,816
Depreciation and amortization expense	89,897	85,382
General and administrative expense	52,780	60,065
Operating expense - equipment lease expense	23,094	27,062
Non-cash employee stock ownership plan compensation charge	3,170	3,215
(Gain) loss on asset sales and disposals	(6,618)	1,831
Operating income	245,101	216,275
Interest expense	(100,093)	(173,616)
Loss on extinguishment of debt	—	(104,834)
Other income, net	4,833	4,246
Reorganization expense - professional fees	—	(10,443)
Earnings (loss) before income taxes	149,841	(68,372)
Income tax expense	981	741
Net earnings (loss)	148,860	(69,113)
Net earnings (loss) attributable to noncontrolling interest	867	(702)
Net earnings (loss) attributable to Ferrellgas Partners, L.P.	\$ 147,993	\$ (68,411)

### Non-GAAP Financial Measures

In this Annual Report we present the following non-GAAP financial measures: Adjusted EBITDA, Distributable cash flow attributable to equity investors, Distributable cash flow attributable to Class A and B Unitholders, and Distributable cash flow excess.

*Adjusted EBITDA.* Adjusted EBITDA for Ferrellgas Partners is calculated as net earnings (loss) attributable to Ferrellgas Partners, L.P., plus the sum of the following: income tax expense, interest expense, depreciation and amortization expense, non-cash employee stock ownership plan compensation charge, loss on extinguishment of debt, (gain) loss on asset sales and disposals, other income, net, reorganization expense – professional fees, severance costs, legal fees and settlements related to non-core businesses, provision for doubtful accounts related to non-core businesses, and net earnings (loss) attributable to noncontrolling interest. Management believes the presentation of this measure is relevant and useful because it allows investors to view the partnership's performance in a manner similar to the method management uses, adjusted for items management believes make it easier to compare its results with other companies that have different financing and capital structures. Adjusted EBITDA, as management defines it, may not be comparable to similarly titled measurements used by other companies. Items added into our calculation of Adjusted EBITDA that will not occur on a continuing basis may have associated cash payments. This method of calculating Adjusted EBITDA should be viewed in conjunction with measurements that are computed in accordance with GAAP.

---

[Table of Contents](#)

*Distributable Cash Flow Attributable to Equity Investors.* Distributable cash flow attributable to equity investors is calculated as Adjusted EBITDA minus net cash interest expense, maintenance capital expenditures and cash paid for income taxes, plus proceeds from certain asset sales. Management considers distributable cash flow attributable to equity investors a meaningful measure of Ferrellgas' ability to declare and pay quarterly distributions to equity investors, including holders of the operating partnership's Preferred Units. Distributable cash flow attributable to equity investors, as management defines it, may not be comparable to similarly titled measurements used by other companies. Items added into our calculation of distributable cash flow attributable to equity investors that will not occur on a continuing basis may have associated cash payments. Distributable cash flow attributable to equity investors should be viewed in conjunction with measurements that are computed in accordance with GAAP.

*Distributable Cash Flow Attributable to Class A and B Unitholders.* Distributable cash flow attributable to Class A and B Unitholders is calculated as Distributable cash flow attributable to equity investors minus distributions accrued or paid to Preferred Unitholders and distributable cash flow attributable to general partner and noncontrolling interest. Management considers Distributable cash flow attributable to Class A and B Unitholders a meaningful measure of the partnership's ability to declare and pay quarterly distributions to Class A and B Unitholders. Distributable cash flow attributable to Class A and B Unitholders, as management defines it, may not be comparable to similarly titled measurements used by other companies. Items added into our calculation of distributable cash flow attributable to Class A and B Unitholders that will not occur on a continuing basis may have associated cash payments. Distributable cash flow attributable to Class A and B Unitholders should be viewed in conjunction with measurements that are computed in accordance with GAAP.

*Distributable Cash Flow Excess.* Distributable cash flow excess is calculated as Distributable cash flow attributable to Class A and B unitholders minus Distributions paid to Class A and B unitholders. Distributable cash flow excess, if any, is retained to establish reserves, to reduce debt, to fund capital expenditures and for other partnership purposes, and any shortage is funded from previously established reserves, cash on hand or borrowings under our Credit Facility or, previously, under our terminated accounts receivable securitization facility. Management considers Distributable cash flow excess a meaningful measure of the partnership's ability to effectuate those purposes. Distributable cash flow excess, as management defines it, may not be comparable to similarly titled measurements used by other companies. Items added into our calculation of distributable cash flow excess that will not occur on a continuing basis may have associated cash payments. Distributable cash flow excess should be viewed in conjunction with measurements that are computed in accordance with GAAP.

[Table of Contents](#)

The following table reconciles Adjusted EBITDA, Distributable cash flow attributable to equity investors, Distributable cash flow attributable to Class A and B Unitholders and Distributable cash flow excess to Net earnings (loss) attributable to Ferrellgas Partners, L.P., the most directly comparable GAAP measure, for the fiscal years indicated:

<i>(amounts in thousands)</i>	Year ended July 31,	
	2022	2021
Net earnings (loss) attributable to Ferrellgas Partners, L.P.	\$ 147,993	\$ (68,411)
Income tax expense	981	741
Interest expense	100,093	173,616
Depreciation and amortization expense	89,897	85,382
<b>EBITDA</b>	<b>338,964</b>	<b>191,328</b>
Non-cash employee stock ownership plan compensation charge	3,170	3,215
Loss on extinguishment of debt	—	104,834
(Gain) loss on asset sales and disposals	(6,618)	1,831
Other income, net	(4,833)	(4,246)
Reorganization expense - professional fees	—	10,443
Severance costs	578	1,761
Legal fees and settlements related to non-core businesses	7,938	10,129
Provision for doubtful accounts related to non-core businesses	—	(500)
Net earnings (loss) attributable to noncontrolling interest	867	(702)
<b>Adjusted EBITDA</b>	<b>340,066</b>	<b>318,093</b>
Net cash interest expense <sup>(a)</sup>	(99,366)	(160,153)
Maintenance capital expenditures <sup>(b)</sup>	(17,019)	(26,168)
Cash paid for income taxes	(1,018)	(706)
Proceeds from certain asset sales	4,113	4,588
Distributable cash flow attributable to equity investors	226,776	135,654
Less: Distributions accrued or paid to preferred unitholders	65,287	24,024
Distributable cash flow attributable to general partner and non-controlling interest	(4,536)	(2,713)
Distributable cash flow attributable to Class A and B unitholders	156,953	108,917
Less: Distributions paid to Class A and B unitholders <sup>(c)</sup>	99,996	—
<b>Distributable cash flow excess</b>	<b>\$ 56,957</b>	<b>\$ 108,917</b>

- 
- (a) Net cash interest expense is the sum of interest expense less non-cash interest expense and other income, net. This amount includes interest expense related to the terminated accounts receivable securitization facility.
- (b) Maintenance capital expenditures include capitalized expenditures for betterment and replacement of property, plant and equipment, and may from time to time include the purchase of assets that are typically leased.
- (c) The Company did not pay any distributions to Class A unitholders during fiscal 2022 or 2021.

Adjusted EBITDA	<u>\$ 340,066</u>	<u>\$ 318,093</u>	<u>\$ 21,973</u>	<u>7 %</u>

NM - Not meaningful

- (a) Gross margin for “Other Gas Sales” is allocated to Gross margin “Retail - Sales to End Users” and “Wholesale - Sales to Resellers” based on the volumes in each respective category.
- (b) “Other” primarily includes various customer fee income and to a lesser extent appliance and material sales.
- (c) Gross margin from “Propane and other gas liquids sales” represents “Revenues - Propane and other gas liquids sales” less “Cost of sales - Propane and other gas liquids sales” and does not include depreciation and amortization.
- (d) “Operating, general and administrative expense” above includes both the “Operating expense – personnel, vehicle, plant and other” and “General and administrative expense” captions in the consolidated statement of operations.

## Table of Contents

Propane sales volumes during fiscal 2022 decreased 3%, or 29.3 million gallons, compared to fiscal 2021. This decrease was largely attributable to decreased sales to tank exchange customers and other wholesale customers. Retail volume was relatively flat with 624.3 million gallons sold in fiscal 2022 compared to 632.1 million gallons sold in fiscal 2021.

Weather in the more highly concentrated geographic areas we serve for fiscal 2022 was approximately 5% warmer than normal and 4.9% warmer than fiscal 2021, which we believe was the primary factor for the decreases in retail and other wholesale customer propane sales during the year.

Our wholesale sales price per gallon partially correlates to the change in the wholesale market price of propane. The wholesale market price at major supply points in Mt. Belvieu, Texas during fiscal 2022 averaged 64% more than fiscal 2021, while at the Conway, Kansas major supply point prices averaged 66% more than fiscal 2021. The wholesale market price at Mt. Belvieu, Texas averaged \$1.25 and \$0.76 per gallon during fiscal 2022 and fiscal 2021, respectively, while the wholesale market price at Conway, Kansas averaged \$1.23 and \$0.74 per gallon during fiscal 2022 and fiscal 2021, respectively. This increase in the wholesale cost of propane contributed to our increase in sales price per gallon and therefore revenues.

### Revenues

Retail sales increased \$322.9 million or 29% in fiscal 2022 compared to fiscal 2021. This increase resulted primarily from an increase in sales price per gallon. Revenues from retail customers saw increases in all areas, with significant increases noted in our industrial/commercial, residential and agricultural customer bases.

Wholesale sales increased \$32.5 million or 6% in fiscal 2022 compared to fiscal 2021. This increase in sales was primarily due to an increase in sales price per gallon, as discussed above, and was partially offset by a decline in gallons sold to wholesale customers due to warmer weather in fiscal 2022 compared to fiscal 2021.

Other gas sales decreased \$6.3 million or 22% in fiscal 2022 compared to fiscal 2021 primarily due to the volume decrease noted above.

Other revenues increased \$11.2 million or 13% in fiscal 2022 compared to fiscal 2021 primarily due to increased miscellaneous fees billed to customers and increased tank rental income.

### Gross margin - Propane and other gas liquids sales

Gross margin increased \$57.0 million primarily due to increased retail gross margin of \$69.2 million, which was driven by an increase in sales price per gallon, partially offset by a decrease of \$12.2 million in wholesales gross margin, which was primarily driven by the declines in volume noted above. See above discussion.

### Gross margin - other

Gross margin increased \$11.4 million in fiscal 2022 compared to fiscal 2021, primarily due to increased miscellaneous fees billed to customers and increased tank rental income.

### Operating income

Operating income increased \$28.8 million primarily due to a \$57.0 million increase in "Gross margin - Propane and other gas liquid sales" and an \$11.4 million increase in "Gross margin – other," both as discussed above. Other positive factors contributing to the increase in operating income were an \$8.4 million increase in "(Gain) loss on asset sales and disposals" and a \$4.0 million decrease in "Operating expense – equipment lease expense." These increases were partially offset by a \$47.5 million increase in

“Operating, general and administrative expense” and a \$4.5 million increase in “Depreciation and amortization expense.”

## Table of Contents

The \$8.4 million increase in “(Gain) loss on asset sales and disposals primarily related to the derecognition of a lease liability and the related asset of a non-core business. The \$4.0 million decrease in “Operating expense – equipment lease expense” was due to our entering into more finance leases instead of operating leases, resulting in less lease expense and greater interest expense and amortization expense.

“Operating, general and administrative expense” increased due to a \$54.8 million increase in “Operating expense – personnel, vehicle, plant and other,” partially offset by a \$7.3 million decrease in “General and administrative expense.” The increase in “Operating expense – personnel, vehicle, plant and other” was primarily due to increases of \$20.5 million in vehicle repairs and maintenance and fuel costs, \$19.4 million in selling and other costs and \$14.9 million in personnel costs. The decrease in “General and administrative expense” was primarily due to a \$3.5 million decrease in personnel expense and a \$3.5 million decrease in legal costs associated with non-core business.

The \$4.5 million increase in “Depreciation and amortization expense” primarily relates to an increase in depreciation related to “Tanks, cylinders and customer equipment.” See [Note E – Supplemental financial statement information](#) in the notes to consolidated financial statements for more information. The cost for tanks, cylinders and related components has risen due to increases in the price of steel. In addition, these assets have shorter depreciable lives which increase the amount of depreciation expense recognized during the period.

### Adjusted EBITDA

Adjusted EBITDA increased \$22.0 million or 7% due to the \$28.8 million increase in operating income and a \$4.5 million increase in “Depreciation and amortization expense,” both as discussed above, partially offset by an \$8.4 million increase in “(Gain) loss on asset sales and disposals,” a \$2.2 million decrease in legal fees and settlements related to non-core businesses and a \$1.2 million decrease for nonrecurring severance costs.

## Liquidity and Capital Resources

### General

Our primary sources of liquidity and capital resources are cash flows from operating activities, our Credit Facility and funds received from sales of debt and equity securities. On the Effective Date, the operating partnership, the general partner and certain of the operating partnership’s subsidiaries entered into a credit agreement (the “Credit Agreement”), which provides for a four-year revolving credit facility (the “Credit Facility”) in an aggregate principal amount of up to \$350.0 million, including a sublimit not to exceed \$200.0 million for the issuance of letters of credit. For additional discussion, see [Note H – Debt](#) in the notes to our consolidated financial statements.

As of July 31, 2022, our total liquidity was \$401.0 million, which was comprised of \$147.5 million in unrestricted cash and \$253.5 million of availability under our Credit Facility. These sources of liquidity and short-term capital resources are intended to fund our working capital requirements, acquisitions and capital expenditures. As of July 31, 2022, letters of credit outstanding totaled \$87.6 million. Our access to long-term capital resources, to the extent needed to refinance debt or for other purposes, may be affected by our ability to access the capital markets, covenants in our debt agreements and other financial obligations, unforeseen demands on cash, or other events beyond our control.

As of July 31, 2022, we had \$11.2 million of restricted cash for a cash deposit made with the administrative agent under our prior senior secured credit facility that was terminated in April 2020.

Our working capital requirements are subject to, among other things, the price of propane, delays in the collection of receivables, volatility in energy commodity prices, liquidity imposed by insurance providers, downgrades in our credit ratings, decreased trade credit, significant acquisitions, the weather, customer retention and purchasing patterns and other changes in the demand for propane. Relatively colder

weather or higher propane prices during the winter heating season are factors that could significantly increase our working capital requirements.

## [Table of Contents](#)

Our ability to satisfy our obligations is dependent upon our future performance, which will be subject to prevailing weather, economic, financial and business conditions and other factors, many of which are beyond our control. Due to the seasonality of the retail propane distribution business, a significant portion of our propane operations and related products cash flows from operations is generated during the winter heating season. Our net cash provided by operating activities primarily reflects earnings from our business activities adjusted for depreciation and amortization and changes in our working capital accounts. Historically, we generate significantly lower net cash from operating activities in our first and fourth fiscal quarters as compared to the second and third fiscal quarters due to the seasonality of our propane operations and related equipment sales operations.

During periods of high volatility, our risk management activities may expose us to the risk of counterparty margin calls in amounts greater than we have the capacity to fund. Likewise, our counterparties may not be able to fulfill their margin calls from us or may default on the settlement of positions with us.

We believe that the liquidity available from cash flows from operating activities, unrestricted cash and the Credit Facility will be sufficient to meet our capital expenditure, working capital and letter of credit requirements for the foreseeable future.

### **Distributable Cash Flow**

Distributable cash flow attributable to equity investors is reconciled to net earnings (loss) attributable to Ferrellgas Partners, L.P., the most directly comparable GAAP measure, in this Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations –Non-GAAP Financial Measures" above. A comparison of distributable cash flow attributable to equity investors to cash distributions accrued or paid to equity investors for the year ended July 31, 2022 to the year ended July 31, 2021 is as follows (in thousands):

	<b>Distributable cash flow attributable to equity investors</b>	<b>Cash reserves approved by our General Partner</b>	<b>Cash distributions accrued or paid to equity investors</b>	<b>DCF ratio <sup>(a)</sup></b>
Year ended July 31, 2022	\$ 226,776	\$ 161,489	\$ 65,287	3.5x
Year ended July 31, 2021	135,654	111,630	24,024	5.6x
Increase	<u>\$ 91,122</u>	<u>\$ 49,859</u>	<u>\$ 41,263</u>	<u>2.2x</u>

(a) DCF ratio is calculated as Distributable cash flow attributable to equity investors divided by Cash distributions accrued or paid to equity investors.

For fiscal 2022, Distributable cash flow attributable to equity investors increased \$91.1 million compared to fiscal 2021, primarily due to a \$60.8 million decrease in net cash interest expense, a \$22.0 million increase in Adjusted EBITDA and a \$9.1 million decrease in maintenance capital expenditures.

Quarterly distributions aggregating to \$63.4 million were paid in cash to holders of Preferred Units during the year ended July 31, 2022. This included \$0.9 million of Additional Amounts (as defined in Note I – Preferred units) payable to certain holders of Preferred Units related to the side letters outlined in the OpCo LPA Amendment. As of July 31, 2022, the Quarterly Distribution accrued was \$17.5 million with \$15.4 million paid in cash to holders of Preferred Units on August 15, 2022. The remaining Quarterly Distribution accrual of \$2.1 million represents Additional Amounts payable to certain holders of Preferred Units pursuant to the side letters.

As of April 30, 2021, the Quarterly Distribution accrued was \$8.0 million, reflecting a prorated distribution amount for the period from the Effective Date to April 30, and the Quarterly Distribution in that amount was paid in cash to holders of Preferred Units on May 17, 2021. As of July 31, 2021, the aggregate Quarterly Distribution and Additional Amounts accrued was \$16.0 million, and \$15.7 million of that amount was paid in cash to holders of Preferred Units on August 16, 2021.

## [Table of Contents](#)

We did not pay any cash distributions to our Class A Unitholders or the general partner during fiscal 2022 or fiscal 2021. Ferrellgas Partners made aggregate cash distributions of approximately \$100.0 million to its Class B Unitholders during the year ended July 31, 2022. See [Note R – Net loss per unitholders' interest](#) for additional information. Thus, cash reserves, which we utilize to meet future anticipated expenditures, were \$161.5 million and \$111.6 million, respectively, for the years ended July 31, 2022 and 2021.

### **Operating Activities**

#### Ferrellgas Partners

##### Fiscal 2022 v Fiscal 2021

Net cash provided by operating activities was \$160.5 million for fiscal 2022, compared to net cash provided by operating activities of \$206.4 million for fiscal 2021. The decrease in cash provided by operating activities was primarily due to a \$123.8 million increase in requirements for other current liabilities, a \$31.7 million outflow associated with other assets and liabilities, and a \$3.9 million increase in working capital requirements. These changes were partially offset by a \$106.8 million increase in cash flow from operations, a decrease of \$14.3 million in requirements for prepaid expenses and a \$7.7 million decrease in accrued interest expense related to the timing and nature of the March 2021 restructuring transactions.

The \$123.8 million increase related to other current liabilities was primarily driven by changes in the broker margin deposit liability. The increase in working capital requirements for fiscal 2022 compared to fiscal 2021 was primarily due to an \$11.1 million increase in inventory requirements and a \$4.6 million increase in requirements for accounts payable. These increases were partially offset by a decrease of \$11.8 million in requirements for accounts and notes receivable, net.

The increase in cash flow from operations was primarily due to a decrease in “Interest expense” of \$73.5 million, a \$68.4 million increase in gross profit, an \$8.4 million gain on asset sales and disposals, a \$7.3 million decrease in “General and administrative expense” and a \$4.0 million decrease in “Operating expense – equipment lease expense.” These changes were partially offset by an increase in “Operating expense - personnel, vehicle, plant and other” of \$54.8 million.

#### The operating partnership

##### Fiscal 2022 v Fiscal 2021

Net cash provided by operating activities was \$179.7 million for fiscal 2022, compared to net cash provided by operating activities of \$217.0 million for fiscal 2021. This decrease in net cash provided by operating activities was primarily due to a \$123.6 million increase in requirements for other current liabilities, a \$12.5 million outflow associated with other assets and liabilities, a \$6.0 million increase in accrued interest expense related to the timing and nature of the March 2021 restructuring transactions, and a \$3.9 million increase in working capital requirements. These changes were partially offset by an \$82.3 million increase in cash flow from operations and a decrease of \$14.3 million in requirements for prepaid expenses.

The \$123.6 million increase related to other current liabilities was primarily driven by changes in the broker margin deposit liability. The increase in working capital requirements for fiscal 2022 compared to fiscal 2021 was primarily due to an \$11.1 million increase in inventory requirements and a \$4.6 million increase in requirements for accounts payable. These increases were partially offset by a decrease of \$11.8 million in requirements for accounts and notes receivable, net.

The increase in cash flow from operations was primarily due to a \$68.4 million increase in gross profit, a net decrease in “Interest expense” of \$59.8 million, an \$8.4 million gain on asset sales and disposals, a \$7.0 million decrease in “General and administrative expense” and a \$4.0 million decrease in “Operating

expense – equipment lease expense.” These increases were partially offset by an increase in “Operating expense - personnel, vehicle, plant and other” of \$54.8 million and a \$4.5 million increase in depreciation and amortization expense.

## Table of Contents

### **Investing Activities**

#### Ferrellgas Partners

##### Capital Requirements

Our business requires continual investments to upgrade or enhance existing operations and to ensure compliance with safety and environmental regulations. Capital expenditures for our business consist primarily of:

- Maintenance capital expenditures. These capital expenditures include expenditures for betterment and replacement of property, plant and equipment, and may from time to time include the purchase of assets that are typically leased, rather than to generate incremental distributable cash flow. Examples of maintenance capital expenditures include a routine replacement of a worn-out asset or replacement of major vehicle components; and
- Growth capital expenditures. These expenditures are undertaken primarily to generate incremental distributable cash flow. Examples include expenditures for purchases of both bulk and portable propane tanks and other equipment to facilitate expansion of our customer base and operating capacity.

##### Fiscal 2022 v Fiscal 2021

Net cash used in investing activities was \$111.8 million for fiscal 2022, compared to net cash used in investing activities of \$61.0 million for fiscal 2021. This increase in net cash used in investing activities was primarily due to a \$35.8 million increase in "Capital expenditures" and a \$13.1 million increase in "Business acquisitions, net of cash acquired," partially offset by a \$2.4 million decrease in "Proceeds from sale of assets."

The increase in "Capital expenditures" during fiscal 2022 was primarily due to increases related to growth capital expenditures. The Company had three acquisitions in fiscal 2022 compared to one in fiscal 2021.

Due to the mature nature of our operations we do not anticipate significant fluctuations in maintenance capital expenditures, with the exception of future decisions regarding lease versus buy financing options. However, future fluctuations in growth capital expenditures could occur due to the opportunistic nature of these projects.

#### The operating partnership

The investing activities discussed above also apply to the operating partnership, other than the net activity of the term loan credit agreement with Ferrellgas Partners described below under "—Disclosures about Effects of Transactions with Related Parties."

### **Financing Activities**

#### Ferrellgas Partners

##### Fiscal 2022 v Fiscal 2021

Net cash used in financing activities was \$171.9 million for fiscal 2022, compared to net cash used in financing activities of \$197.3 million for fiscal 2021. This decrease in cash flow used in financing activities was primarily due to financing costs related to fiscal 2021 debt transactions (as discussed further in Note H – Debt), partially offset by \$100.0 million in fiscal 2022 distributions to Class B unitholders and an increase of \$55.3 million in preferred unit distributions.

Letters of credit outstanding at July 31, 2022 and July 31, 2021 totaled \$87.6 million and \$107.7 million, respectively, and were used to secure insurance arrangements, product purchases and commodity hedges. As of July 31, 2022, we had available borrowing capacity under our Credit Facility of \$253.5 million.

## [Table of Contents](#)

### *Distributions*

#### *Partnership distributions*

The Sixth Amended and Restated Agreement of Limited Partnership of Ferrellgas Partners, L.P. (the “Amended Ferrellgas Partners LPA”) requires Ferrellgas Partners to make quarterly cash distributions of all of its “available cash”. Available cash is defined in the Amended Ferrellgas Partners LPA as, generally, the sum of Ferrellgas’ Partners cash receipts less consolidated cash disbursements and net changes in reserves established by our general partner for future requirements. In general, the amount of Ferrellgas Partners’ available cash depends primarily on whether and the extent to which Ferrellgas Partners receives cash distributions from the operating partnership, as such distributions generally would be Ferrellgas Partners’ only significant cash receipts.

The Fifth Amended and Restated Agreement of Limited Partnership of Ferrellgas, L.P. (the “Amended OpCo LPA”), which amended and restated in its entirety the Fourth Amended and Restated Agreement of Limited Partnership of Ferrellgas L.P., and a First Amendment to the Amended OpCo LPA (the “OpCo LPA Amendment”), sets forth the preferences, rights, privileges and other terms of the Preferred Units.

Pursuant to the Amended Ferrellgas Partners LPA, while any Class B Units remain outstanding, any distributions by Ferrellgas Partners to its partners must be made such that the ratio of (i) the amount of distributions made to holders of Class B Units to (ii) the amount of distributions made to holders of Class A Units and the general partner is not less than 6:1. The Amended Ferrellgas Partners LPA permits Ferrellgas Partners, in the general partner’s discretion, to make distributions to the Class B Unitholders in a greater proportion than the minimum 6:1 ratio, including paying 100% of any such distribution Class B Unitholders. The Class B Units will not be convertible into Class A Units until Class B Unitholders receive distributions in the aggregate amount of \$357.0 million (which was the outstanding principal amount of the Ferrellgas Partners Notes), and the rate at which Class B Units will convert into Class A Units increases annually. Additionally, the price at which Ferrellgas Partners may redeem the Class B Units during the first five years after the Effective Date is based on the Class B Unitholders’ receipt of a specified internal rate of return in respect of their Class B Units. This specified internal rate of return in respect of the Class B Units is 15.85%, but that amount increases under certain circumstances, including if the operating partnership paid distributions on the Preferred Units in-kind rather than in cash for a certain number of quarters. Accordingly, distributing cash to the Class B Unitholders in a greater proportion than the minimum 6:1 ratio could result in the Class B Units becoming convertible into Class A Units more quickly or at a lower conversion rate or reduce the redemption price for the Class B Units. For additional discussion of the terms of the Class B Units, see [Note J – Equity \(Deficit\)](#) in the notes to our consolidated financial statements.

For these reasons, although the general partner has not made any decisions or adopted any policy with respect to the allocation of future distributions by Ferrellgas Partners to its partners, the general partner may determine that it is advisable to pay more than the minimum amount of any distribution, up to 100% of the amount of such distribution, to Class B Unitholders. On October 8, 2021 and July 8, 2022, Ferrellgas Partners made cash distributions aggregating in total to approximately \$100.0 million entirely to the Class B Unitholders, without making any distribution to Class A Unitholders and the general partner. See “Risk Factors—Risks Inherent in an Investment in our Class A or Class B Units or our Debt Securities and Other Risks Related to Our Capital Structure and Financing Arrangements—If Ferrellgas Partners is permitted to make and makes distributions to its partners, while any Class B Units remain outstanding, Class B Unitholders collectively will receive at least approximately 85.7% of the aggregate amount of each such distribution and may receive up to 100% of any such distribution. Accordingly, while any Class B Units remain outstanding, Class A Unitholders may not receive any distributions and, in any case, will not receive collectively more than approximately 14.1% of any distribution.”

## [Table of Contents](#)

The ability of Ferrellgas Partners to make cash distributions to its Class A Unitholders and Class B Unitholders is dependent on the receipt by Ferrellgas Partners of cash distributions from the operating partnership. For so long as any Preferred Units remain outstanding, the amount of cash that otherwise would be available for distribution by the operating partnership to Ferrellgas Partners will be reduced by the amount of cash distributions and other payments made by the operating partnership in respect of the Preferred Units, including payments to redeem Preferred Units. Further, the indentures governing the \$650.0 million aggregate principal amount of 5.375% senior notes due 2026 (the “2026 Notes”) and \$825.0 million aggregate principal amount of 5.875% senior notes due 2029 (the “2029 Notes” and, together with the 2026 Notes, the “OpCo Notes”), the Credit Agreement and the OpCo LPA Amendment governing the Preferred Units contain covenants that limit the ability of the operating partnership to make distributions to Ferrellgas Partners and therefore effectively limit the ability of Ferrellgas Partners to make distributions to its Class A Unitholders and Class B Unitholders. See [Note H – Debt](#) and [Note I – Preferred units](#) for a discussion of these limitations. See also “Risk Factors— Risks Inherent in an Investment in our Class A or Class B Units or our Debt Securities and Other Risks Related to Our Capital Structure and Financing Arrangements - Our ability to make cash distributions to holders of Class A Units and Class B Units is dependent on the receipt by Ferrellgas Partners of cash distributions from the operating partnership, which are limited by our obligations under the Indentures, the Credit Agreement and the OpCo LPA Amendment and may be limited by a variety of other factors. Accordingly, we may be unable to make cash distributions to holders of Class A Units and Class B Units.”

### *Preferred unit distributions*

Pursuant to the OpCo LPA Amendment, the operating partnership is required to pay to the holders of each Preferred Unit a cumulative, quarterly distribution (the "Quarterly Distribution") at the Distribution Rate (as defined below) on the unit purchase price of such Preferred Unit, which is \$1,000 per unit.

"Distribution Rate" means, for the first five years after March 30, 2021, a rate per annum equal to 8.956%, with certain increases in the Distribution Rate on each of the 5th, 6th and 7th anniversaries of March 30, 2021, subject to a maximum rate of 11.125% and certain other adjustments and exceptions.

The Quarterly Distribution may be paid in cash or, at the election of the operating partnership "in kind" through the issuance of additional Preferred Units ("PIK Units") at the quarterly Distribution Rate plus an applicable premium that escalates each year from 75 bps to 300 bps so long as the Preferred Units remain outstanding. In the event the operating partnership fails to make any Quarterly Distribution in cash, such Quarterly Distribution will automatically be paid in PIK Units.

The Distribution Rate on the Preferred Units will increase upon violation of certain protective provisions for the benefit of Preferred Unit holders notwithstanding the cap mentioned above.

Quarterly distributions aggregating to \$63.4 million were paid in cash to holders of Preferred Units during fiscal 2022. This included \$0.9 million of Additional Amounts payable to certain holders of Preferred Units related to the side letters outlined in the OpCo LPA Amendment. As of July 31, 2022, the Quarterly Distribution accrued was \$17.5 million with \$15.4 million paid in cash to holders of Preferred Units on August 15, 2022. The remaining Quarterly Distribution accrual of \$2.1 million represents Additional Amounts payable to certain holders of Preferred Units pursuant to side letters.

During fiscal 2021, Quarterly Distributions paid to holders of the Preferred Units totaled \$8.0 million. As of July 31, 2021, an additional aggregate Quarterly Distribution and Additional Amounts was accrued for \$16.0 million, and \$15.7 million of that amount was paid in cash to holders of Preferred Units on August 16, 2021.

## [Table of Contents](#)

### *Preferred unit tax distributions*

For any quarter in which the operating partnership makes a Quarterly Distribution in PIK Units in lieu of cash, it shall make a subsequent cash tax distribution for such quarter in an amount equal to the (i) the lesser of (x) 25% and (y) the highest combined federal, state and local tax rate applicable for corporations organized in New York, multiplied by (ii) the excess (if any) of (A) one-fourth (1/4th) of the estimated taxable income to be allocated to the holders of Preferred Units for the year in which the Quarterly Tax Payment Date (which refers to certain specified dates that next follow a Quarterly Distribution date on which PIK Units were issued) occurs, over (B) any cash paid on the Quarterly Distribution date immediately preceding the Quarterly Tax Payment Date on which a quarterly tax amount would otherwise be paid (such amount, the "Tax Distribution"). Tax Distributions are treated as advances against, and reduce, future cash distributions for any reason, including payments in redemption of Preferred Units or PIK Units, or payments to the holders in their capacity as such pursuant to any side letter or other agreement.

### *Cash distributions paid*

On October 8, 2021 and July 8, 2022, Ferrellgas Partners paid cash distributions to holders of the Class B Units in the amount of \$38.46 per Class B Unit or approximately \$100.0 million in the aggregate for fiscal 2022. As permitted by the Amended Ferrellgas LPA as described above, Ferrellgas Partners made this distribution solely to Class B Unitholders without any contemporaneous distribution to Class A Unitholders and the general partner. Ferrellgas Partners did not pay any cash distributions to its Class A or Class B Unitholders during fiscal 2021 or fiscal 2020.

The operating partnership paid cash distributions during fiscal 2022 and fiscal 2021 in respect to its Preferred Units as discussed above under "—Preferred unit distributions."

The operating partnership paid cash distributions to Ferrellgas Partners of approximately \$100.0 million in the aggregate during fiscal 2022, which Ferrellgas Partners used to make the October 8, 2021 and July 8, 2022 distributions to Class B Unitholders described above.

### *The operating partnership*

The financing activities discussed above also apply to the operating partnership except for distributions by Ferrellgas Partners, fees paid in connection with the Class B Unit exchange and other amounts related to the Ferrellgas Partners Notes, and proceeds received by Ferrellgas Partners pursuant to the term loan credit agreement described below under "—Disclosures about Effects of Transactions with Related Parties."

### **Disclosures about Effects of Transactions with Related Parties**

We have no employees and are managed and controlled by our general partner. Pursuant to our partnership agreements, our general partner is entitled to reimbursement for all direct and indirect expenses incurred or payments it makes on our behalf, and all other necessary or appropriate expenses allocable to us or otherwise reasonably incurred by our general partner in connection with operating our business. These reimbursable costs, which totaled \$304.3 million for fiscal 2022, include operating expenses such as compensation and benefits paid to employees of our general partner who perform services on our behalf as well as related general and administrative expenses.

## [Table of Contents](#)

### *Term loan credit agreement between Ferrellgas Partners and the operating partnership*

As discussed in Note O – Transactions with related parties in the notes to the consolidated financial statements of the operating partnership, on January 8, 2021 Ferrellgas Partners entered into a term loan credit agreement with the operating partnership, pursuant to which the operating partnership extended to Ferrellgas Partners an unsecured, non-amortizing term loan in the aggregate principal amount of \$19.9 million. The term loan bore interest at a rate of 20% per annum, and all interest on the term loan was added to the outstanding principal amount of the term loan. The term loan was scheduled to mature on July 1, 2022. During July 2021, Ferrellgas Partners made an optional prepayment of \$9.0 million principal amount of the term loan. On May 16, 2022, Ferrellgas Partners repaid the operating partnership the full amount of the term loan of \$15.3 million, which represented the outstanding principal and accrued interest. Additionally, Ferrellgas Partners paid the operating partnership \$3.9 million for separate intercompany receivables related to expenses incurred during the 2021 debt transactions.

### *Related party Class A Unitholders*

Related party Class A Unitholder information consisted of the following:

	<b>Class A Unit ownership at <u>July 31, 2022</u></b>	<b>Distributions (in thousands) paid during the year ended <u>July 31, 2022</u></b>
Ferrell Companies <sup>(1)</sup>	1,126,468	\$ —
FCI Trading Corp. <sup>(2)</sup>	9,784	—
Ferrell Propane, Inc. <sup>(3)</sup>	2,560	—
James E. Ferrell <sup>(4)</sup>	238,172	—

- (1) Ferrell Companies is the owner of the general partner and is an approximate 23% direct owner of Class A Units and thus a related party. Ferrell Companies also beneficially owns 9,784 and 2,560 Class A Units held by FCI Trading Corp. (“FCI Trading”) and Ferrell Propane, Inc. (“Ferrell Propane”), respectively, bringing Ferrell Companies’ beneficial ownership to 23.4% at July 31, 2022.
- (2) FCI Trading is an affiliate of the general partner and thus a related party.
- (3) Ferrell Propane is controlled by the general partner and thus a related party.
- (4) James E. Ferrell is the Chief Executive Officer and President of our general partner; and is the Chairman of the Board of Directors of our general partner and a related party. JEF Capital Management owns 237,942 of these Class A Units and is owned by the James E. Ferrell Revocable Trust Two and other family trusts, all of which James E. Ferrell and/or his family members are trustees and beneficiaries. James E. Ferrell holds all voting common stock of JEF Capital Management. The remaining 230 Class A Units are held by Ferrell Resources Holdings, Inc., which is wholly-owned by the James E. Ferrell Revocable Trust One, for which James E. Ferrell is the trustee and sole beneficiary.

[Table of Contents](#)

## Material Cash Requirements

The following table summarizes our future material cash requirements as of July 31, 2022:

(in thousands)	Payment or settlement due by fiscal year				
	2023	2024-2025	2026-2027	Thereafter	Total
Long-term debt, including current portion <sup>(1)</sup>	\$ 1,517	\$ 1,764	\$ 650,535	\$ 826,188	\$ 1,480,004
Fixed rate interest obligations <sup>(2)</sup>	83,406	166,812	131,875	96,938	479,031
Operating lease obligations <sup>(3)</sup>	28,487	38,067	8,586	15,322	90,462
Finance lease obligations <sup>(4)</sup>	8,886	16,917	12,487	295	38,585
Pension withdrawal liability <sup>(5)</sup>	284	568	284	3,380	4,516
Product purchase commitments <sup>(6)</sup>	53,423	—	—	—	53,423
<b>Total</b>	<b>\$ 176,003</b>	<b>\$ 224,128</b>	<b>\$ 803,767</b>	<b>\$ 942,123</b>	<b>\$ 2,146,021</b>
Underlying product purchase volume commitments (in gallons)	\$ 46,200	\$ —	\$ —	\$ —	\$ 46,200

- (1) We have long and short-term payment obligations under agreements such as the indentures governing our senior notes. Amounts shown in the table represent our scheduled future maturities of long-term debt (including current maturities thereof) for the periods indicated. For additional information regarding our debt obligations, see [Note H – Debt](#) to our consolidated financial statements
- (2) Fixed rate interest obligations represent the amount of interest due on fixed rate long-term debt.
- (3) We lease certain property, plant and equipment under noncancelable and cancelable operating leases. Amounts shown in the table represent minimum lease payment obligations under our third-party operating leases for the periods indicated.
- (4) We lease certain property, plant and equipment under noncancelable and cancelable financing leases. Amounts shown in the table represent minimum lease payment obligations under our third-party financing leases for the periods indicated.
- (5) These payments relate to a liability incurred in connection with the withdrawal from certain pension plans.
- (6) We define a purchase obligation as an agreement to purchase goods or services that is enforceable and legally binding (unconditional) on us that specifies all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transactions. We have long and short-term product purchase obligations for propane and energy commodities with third-party suppliers. These purchase obligations are entered into at either variable or fixed prices. The purchase prices that we are obligated to pay under variable price contracts approximate market prices at the time we take delivery of the volumes. Our estimated future variable price contract payment obligations are based on the July 31, 2022 market price of the applicable commodity applied to future volume commitments. Actual future payment obligations may vary depending on market prices at the time of delivery. The purchase prices that we are obligated to pay under fixed price contracts are established at the inception of the contract. Our estimated future fixed price contract payment obligations are based on the contracted fixed price under each commodity contract. Quantities shown in the table represent our volume commitments and estimated payment obligations under these contracts for the periods indicated.

The components of other noncurrent liabilities included in our consolidated balance sheets principally consist of property and casualty liabilities and the fair value of derivatives in connection with our risk management activity. These liabilities are not included in the table above because they are estimates of future payments and not contractually fixed as to timing or amount.

### The operating partnership

The cash requirements discussed above also apply to the operating partnership.

## **Adoption of New Accounting Standards**

### Recently adopted accounting pronouncements

No new accounting standards were adopted during the year ended July 31, 2022.

## [Table of Contents](#)

### Recently issued accounting pronouncements not yet adopted

There were no recently issued accounting standards that could have a material impact to our financial position, results of operations, cash flows, or notes to the consolidated financial statements upon their adoption.

### **Critical Accounting Estimates**

The preparation of financial statements in conformity with GAAP requires us to establish accounting policies and make estimates and assumptions that affect our reported amounts of assets and liabilities at the date of the consolidated financial statements. These financial statements include some estimates and assumptions that are based on informed judgments and estimates of management. We evaluate our policies and estimates on an on-going basis and discuss the development, selection and disclosure of critical accounting policies with the Audit Committee of the Board of Directors of our general partner. Predicting future events is inherently an imprecise activity and as such requires the use of judgment. Our consolidated financial statements may differ based upon different estimates and assumptions.

We discuss our significant accounting policies in Note B – Summary of significant accounting policies – to our consolidated financial statements. Our significant accounting policies are subject to judgments and uncertainties that affect the application of such policies. We believe these financial statements include the most likely outcomes with regard to amounts that are based on our judgment and estimates. Our financial position and results of operations may be materially different when reported under different conditions or when using different assumptions in the application of such policies. In the event estimates or assumptions prove to be different from the actual amounts, adjustments are made in subsequent periods to reflect more current information. We believe the following accounting policies are critical to the preparation of our consolidated financial statements due to the estimation process and business judgment involved in their application:

#### *Depreciation of property, plant and equipment*

We calculate depreciation on property, plant and equipment using the straight-line method based on the estimated useful lives of the assets ranging from two to 30 years. Changes in the estimated useful lives of our property, plant and equipment could have a material effect on our results of operations. The estimates of the assets' useful lives require our judgment regarding assumptions about the useful life of the assets being depreciated. When necessary, the depreciable lives are revised and the impact on depreciation is treated on a prospective basis. There were no material revisions to depreciable lives in fiscal 2022.

#### *Residual value of customer and storage tanks*

We use an estimated residual value when calculating depreciation for our customer and bulk storage tanks. Customer and bulk storage tanks are classified as property, plant and equipment on our consolidated balance sheets. The depreciable basis of these tanks is calculated using the original cost less the residual value. Depreciation is calculated using straight-line method based on the tanks' estimated useful life of 30 years. Changes in the estimated residual value could have a material effect on our results. The estimates of the tanks' residual value require our judgment of the value of the tanks at the end of their useful life or retirement. When necessary, the tanks' residual values are revised and the impact on depreciation is treated on a prospective basis. There were no such revisions to residual values in fiscal 2022, 2021 or 2020.

#### *Valuation methods, amortization methods and estimated useful lives of intangible assets*

The specific, identifiable intangible assets of a business enterprise depend largely upon the nature of its operations. Potential intangible assets include intellectual property such as trademarks and trade names, customer lists and relationships, and non-compete agreements, permits, favorable lease arrangements as well as other intangible assets. The approach to the valuation of each intangible asset will vary depending upon the nature of the asset, the business in which it is utilized, and the economic returns it is generating or

is expected to generate. During fiscal 2022 or 2021, we did not find it necessary to adjust the valuation methods used for any acquired intangible assets.

## [Table of Contents](#)

Our recorded intangible assets primarily include the estimated value assigned to certain customer-related and contract-based assets representing the rights we own arising from the acquisition of propane distribution companies and related contractual agreements. A customer-related or contract-based intangible with a finite useful life is amortized over its estimated useful life, which is the period over which the asset is expected to contribute directly or indirectly to the future cash flows of the entity. We believe that trademarks and trade names have an indefinite useful life due to our intention to utilize all acquired trademarks and trade names indefinitely. When necessary, the intangible assets' useful lives are revised and the impact on amortization will be reflected on a prospective basis. The determination of the fair market value of the intangible asset and the estimated useful life are based on an analysis of all pertinent factors including (1) the use of widely-accepted valuation approaches, the income approach or the cost approach, (2) the expected use of the asset by the entity, (3) the expected useful life of related assets, (4) any legal, regulatory or contractual provisions, including renewal or extension periods that would cause substantial costs or modifications to existing agreements, (5) the effects of obsolescence, demand, competition, and other economic factors and (6) the level of maintenance required to obtain the expected future cash flows.

If the underlying assumption(s) governing the amortization of an intangible asset were later determined to have significantly changed (either favorably or unfavorably), then we may be required to adjust the amortization period of such asset to reflect any new estimate of its useful life. Such a change would increase or decrease the annual amortization charge associated with the asset at that time. During fiscal 2022 or 2021, we did not find it necessary to adjust the valuation method, estimated useful life or amortization period of any of our intangible assets.

Should any of the underlying assumptions indicate that the value of the intangible asset might be impaired, we may be required to reduce the carrying value and may also be required to reduce the subsequent useful life of the asset. Any such write-down of the value and any unfavorable change in the useful life (i.e., amortization period) of an intangible asset would increase operating expense at that time.

We did not recognize any impairment losses related to our intangible assets during fiscal 2022. For additional information regarding our intangible assets, see [Note B – Summary of significant accounting policies](#) and [Note G – Goodwill and intangible assets, net](#) - to our consolidated financial statements.

### *Accounting for risk management activities and derivative financial instruments*

We enter into commodity forward, futures, swaps and options contracts involving propane to hedge exposures to price risk. We may also enter into commodity forward, futures, swaps and options contracts involving diesel, gasoline and related products to hedge exposures to price risk. These derivative contracts are reported in the consolidated balance sheets at fair value with changes in fair value recognized in cost of sales and operating expenses in the consolidated statements of operations or in other comprehensive income in the consolidated statement of partners' capital. We utilize published settlement prices for exchange-traded contracts, quotes provided by brokers and estimates of market prices based on daily contract activity to estimate the fair value of these contracts. Changes in the methods used to determine the fair value of these contracts could have a material effect on our consolidated balance sheets and consolidated statements of operations. For further discussion of derivative commodity and interest rate contracts, see Item 7A. "Quantitative and Qualitative Disclosures about Market Risk," Note B – Summary of significant accounting policies, Note M – Fair value measurements and Note N – Derivative instruments and hedging activities – to our consolidated financial statements. We do not anticipate future changes in the methods used to determine the fair value of these derivative contracts.

### *Litigation accruals and environmental liabilities*

Our operations are subject to all operating hazards and risks normally incidental to handling, storing, transporting and otherwise providing for use by consumers of combustible liquids such as propane and, prior to the sales of midstream operations in fiscal 2018, crude oil. As a result, at any given time, we can be threatened with or named as a defendant in various lawsuits arising in the ordinary course of business, and we are a party to several legal proceedings as described in Note P – Contingencies and commitments to our audited consolidated financial statements. It is not possible to determine the ultimate disposition of these

matters; however, management is of the opinion that there are no known claims or contingent claims that are reasonably expected to have a material adverse effect on our consolidated financial condition, results of operations and cash flows.

## [Table of Contents](#)

We are involved in litigation regarding pending claims and legal actions that arise in the normal course of business and may own sites at which hazardous substances may be present. In accordance with GAAP, we establish reserves for pending claims and legal actions or environmental remediation liabilities when it is probable that a liability exists and the amount or range of amounts can be reasonably estimated. Reasonable estimates involve management judgments based on a broad range of information and prior experience. These judgments are reviewed quarterly as more information is received and the amounts reserved are updated as necessary. Such estimated reserves may differ materially from the actual liability and such reserves may change materially as more information becomes available and estimated reserves are adjusted.

### *Goodwill impairment*

We record goodwill as the excess of the cost of acquisitions over the fair value of the related net assets at the date of acquisition. Goodwill recorded is not deductible for income tax purposes. We have determined that we have one reporting unit for goodwill impairment testing purposes. As of July 31, 2022, this reporting unit contains goodwill that is subject to at least an annual goodwill impairment test. In the first step of the test, the carrying value of the reporting unit is determined by assigning the assets and liabilities, including existing goodwill and intangible assets, to the reporting unit as of the date of evaluation. To the extent a reporting unit's carrying value exceeds its fair value, the reporting unit's goodwill is impaired. The amount of impairment would be equal to the lesser of the excess of reporting unit carrying value over its fair value and the reporting unit's recorded amount of goodwill.

### *Class B Units*

Our Class B Units are a hybrid financial instrument with an equity host and were measured at fair value at issuance. We utilized a Monte Carlo simulation model and option pricing model to compute an estimated fair value of the Class B Units. This valuation technique required a number of inputs, some of which required an estimate to be made by management. Significant estimates included the forecasted operating results and the forecasted available cash flow available for the paydown of our Class B units. The significant assumptions used in the Monte Carlo simulation model included the cash flow volatility, equity volatility, expected term, and risk-free interest rates. We estimated the equity volatility based on the historical stock price volatility of comparable publicly-traded companies in our industry group. We estimated the expected term of the Class B Units based on the various conversion or redemption scenarios. The risk-free rate was determined using a U.S. Treasury rate for the period that coincided with the expected term.

## **ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.**

We did not enter into any risk management trading activities during fiscal 2022. Our remaining market risk sensitive instruments and positions have been determined to be "other than trading."

### *Commodity price risk management*

Our risk management activities primarily attempt to mitigate price risks related to the purchase, storage, transport and sale of propane generally in the contract and spot markets from major domestic energy companies. We attempt to mitigate these price risks through the use of financial derivative instruments and forward propane purchase and sales contracts.

Our risk management strategy involves taking positions in the forward or financial markets that are equal and opposite to our positions in the physical products market in order to minimize the risk of financial loss from an adverse price change. This risk management strategy is successful when our gains or losses in the physical product markets are offset by our losses or gains in the forward or financial markets. Propane related financial derivatives are designated as cash flow hedges.

## [Table of Contents](#)

Our risk management activities include the use of financial derivative instruments including, but not limited to, price futures, swaps, options and basis swaps to seek protection from adverse price movements and to minimize potential losses. We enter into these financial derivative instruments with brokers who are clearing members with the Intercontinental Exchange or the Chicago Mercantile Exchange and, to a lesser extent, directly with third parties in the over-the-counter market. We also enter into forward propane purchase and sales contracts with counterparties. These forward contracts qualify for the normal purchase normal sales exception within GAAP guidance and are therefore not recorded on our financial statements until settled.

### *Transportation Fuel Price Risk*

From time to time, our risk management activities also attempt to mitigate price risks related to the purchase of gasoline and diesel fuel for use in the transport of propane from retail fueling stations. When employed, we attempt to mitigate these price risks through the use of financial derivative instruments.

When employed, our risk management strategy involves taking positions in the financial markets that are not more than the forecasted purchases of fuel for our internal use in the retail and supply propane delivery fleet in order to minimize the risk of decreased earnings from an adverse price change. This risk management strategy locks in our purchase price and is successful when our gains or losses in the physical product markets are offset by our losses or gains in the financial markets. Our transport fuel financial derivatives are not designated as cash flow hedges.

### *Risk Policy and Sensitivity Analysis*

Market risks associated with energy commodities are monitored daily by senior management for compliance with our commodity risk management policy. This policy includes an aggregate dollar loss limit and limits on the term of various contracts. We also utilize volume limits for various energy commodities and review our positions daily where we remain exposed to market risk, so as to manage exposures to changing market prices.

We have prepared a sensitivity analysis to estimate the exposure to market risk of our energy commodity positions. Forward contracts, futures, swaps and options outstanding as of July 31, 2022 and 2021, that were used in our risk management activities were analyzed assuming a hypothetical 10% adverse change in prices for the delivery month for all energy commodities. The potential loss in future earnings from these positions due to a 10% adverse movement in market prices of the underlying energy commodities was estimated at \$20.6 million and \$30.1 million as of July 31, 2022 and 2021, respectively. The preceding hypothetical analysis is limited because changes in prices may or may not equal 10%, thus actual results may differ. Our sensitivity analysis does not include the anticipated transactions associated with these transactions, which we anticipate will be 100% effective.

### *Credit risk*

We maintain credit policies with regard to our counterparties that we believe significantly reduce overall credit risk. These policies include evaluating and monitoring counterparties' financial condition (including credit ratings), and entering into agreements with counterparties that govern credit guidelines.

Our other counterparties principally consist of major energy companies that are suppliers, marketers, wholesalers, retailers and end users and major U.S. financial institutions. The overall impact due to certain changes in economic, regulatory and other events may impact our overall exposure to credit risk, either positively or negatively in that counterparties may be similarly impacted. Based on our policies, exposures, credit and other reserves, management does not anticipate a material adverse effect on financial position or results of operations as a result of counterparty performance.

As described elsewhere in this Annual Report on Form 10-K, Bridger entered into a ten-year transportation and logistics agreement (the "Jamex TLA") with Jamex Marketing, LLC ("Jamex") pursuant to which Jamex would be responsible for certain payments to Bridger and also for sourcing crude oil

volumes for Bridger's largest customer at that time. On September 1, 2016, Bridger, Jamex, Ferrellgas Partners, L.P. and certain other affiliated parties entered into a group of agreements that terminated the Jamex TLA.

[Table of Contents](#)

On January 27, 2021 we reached an agreement with Mr. Ballengee pursuant to which he would execute a \$2.5 million promissory note secured by his assets, and pay \$1.5 million in cash to us. The \$1.5 million cash payment was received on February 1, 2021. In light of these developments, we released \$0.5 million of reserve in our second fiscal quarter of 2021. The \$2.5 million promissory note is fully reserved as of July 31, 2022.

*Interest Rate Risk*

At July 31, 2022, we had no variable rate indebtedness outstanding under our Credit Facility and had no collateralized note payable borrowings, as we terminated our accounts receivable securitization facility on the Effective Date. Our results of operations, cash flows and financial condition could be materially adversely affected by significant increases in interest rates to the extent that we have variable rate indebtedness (including any disbursements or payments related to letters of credit) outstanding under our Credit Facility.

**ITEM 8. FINANCIAL STATEMENTS.**

Our consolidated financial statements and the Independent Registered Public Accounting Firm's Reports thereon listed on the accompanying Index to Financial Statements and Financial Statement Schedules are hereby incorporated by reference.

**ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.**

None.

**ITEM 9A. CONTROLS AND PROCEDURES.**

An evaluation was performed by the management of Ferrellgas Partners, L.P., Ferrellgas Partners Finance Corp., Ferrellgas, L.P., and Ferrellgas Finance Corp., with the participation of the principal executive officer and principal financial officer of our general partner, of the effectiveness of our disclosure controls and procedures. Based on that evaluation, our management, including our principal executive officer and principal financial officer, concluded that our disclosure controls and procedures, as defined in Rules 13a-15(e) or 15d-15(e) under the Exchange Act, were effective as of July 31, 2022.

The management of Ferrellgas Partners, L.P., Ferrellgas Partners Finance Corp., Ferrellgas, L.P., and Ferrellgas Finance Corp. does not expect that our disclosure controls and procedures will prevent all errors and all fraud. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Based on the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the above mentioned partnerships and corporations have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple errors or mistakes. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events. Therefore, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Our disclosure controls and procedures are designed to provide such reasonable assurances of achieving our desired control objectives, and the principal executive officer and principal financial officer of our general partner have concluded, as of July 31, 2022, that our disclosure controls and procedures are effective in achieving that level of reasonable assurance.

## [Table of Contents](#)

### **Management's Report on Internal Control Over Financial Reporting**

The management of Ferrellgas Partners, L.P., Ferrellgas Partners Finance Corp., Ferrellgas, L.P. and Ferrellgas Finance Corp. is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) or 15d-15(f) of the Exchange Act. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in 2013 *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in 2013 *Internal Control – Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of July 31, 2022.

During the most recent fiscal quarter ended July 31, 2022, there have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) or Rule 15d-15(f) of the Exchange Act) that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

### **ITEM 9B. OTHER INFORMATION.**

On September 28, 2022, the general partner and Mr. Ferrell entered into an Executive Employment Agreement (the “Employment Agreement”) and an Executive Confidentiality and Restrictive Covenants Agreement (the “Confidentiality and Restrictive Covenants Agreement”), both effective as of January 1, 2023 (the “Commencement Date”), pursuant to which Mr. Ferrell will continue to serve as President and Chief Executive Officer of the general partner. Mr. Ferrell will continue to serve as the principal executive officer for purposes of the Exchange Act.

Pursuant to the Employment Agreement, Mr. Ferrell will report to the board of directors of the general partner. As compensation for Mr. Ferrell’s services he will be paid an annual base salary of \$955,000 and be eligible to participate in any of the general partner’s incentive plans as such plans are implemented. The Employment Agreement further provides that Mr. Ferrell will be included, to the extent eligible under the terms and conditions, in all of the general partner’s plans providing benefits for its employees.

Pursuant to the terms of the Employment Agreement, Mr. Ferrell will continue to serve as President and Chief Executive Officer for a period beginning on the Commencement Date and continuing for two years, unless earlier terminated by Mr. Ferrell or the general partner as provided for in the Employment Agreement, with the Employment Agreement automatically terminating on December 31, 2024, unless either party provides no less than 90-days advance written notice prior to expiration. Mr. Ferrell will be entitled to receive the base salary, and participation in any incentive plans and benefits as permitted by the terms and conditions thereof, as well as certain severance benefits in the event of termination based on the nature of such termination. Upon termination for Cause (as defined in the Employment Agreement), or upon resignation without Good Reason (as defined in the Employment Agreement), death or disability, Mr. Ferrell will be entitled to receive: (i) all accrued unpaid base salary through the date of termination; (ii) all accrued but unused vacation days; and (iii) any properly documented reimbursable business expenses (collectively, the “Accrued Obligations”).

If Mr. Ferrell’s employment is terminated by the general partner without Cause or if Mr. Ferrell parts with the general partner for Good Reason, Mr. Ferrell will be entitled to receive: (i) the Accrued Obligations; (ii) a lump sum payment of any amounts remaining under the Employment Agreement; and (iii) subject to Mr. Ferrell’s election of and qualification for continuation coverage, for a period of 12 consecutive months following termination of employment, premium costs for certain insurance benefits in the monthly amount the general partner was paying toward Mr. Ferrell’s general partner-provided group health plan insurance coverage immediately prior to his cessation of employment.

[Table of Contents](#)

The Employment Agreement also requires that Mr. Ferrell comply with the obligations in the Confidentiality and Restrictive Covenants Agreement, pursuant to which Mr. Ferrell covenants not to compete with the general partner or any of its subsidiaries and affiliates, or solicit members of senior leadership or business partners, during his employment and for five years thereafter. The Confidentiality and Restrictive Covenants Agreement also contains customary confidentiality and non-disclosure covenants.

The foregoing description is not a complete description of the Employment Agreement or the Confidentiality and Restrictive Covenants Agreement, and is qualified in its entirety by reference to the full text of such agreements, both of which are attached hereto as Exhibit 10.33.

## PART III

### ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE.

#### Directors and Executive Officers of our General Partner

The following table sets forth certain information with respect to the directors and executive officers of our general partner as of September 30, 2022. Officers are appointed to their respective office or offices either annually or as needed. Except for two directors designated by certain securityholders as described below, our directors are appointed to their respective office or offices annually.

Name	Age	Director Since	Executive Officer Since	Position
James E. Ferrell	82	1984	2016	Chief Executive Officer and President; Chairman of the Board of Directors
Wendel Parks	50	N/A	2021	Corporate Controller (Principal Financial and Accounting Officer)
Tamria A. Zertuche	51	N/A	2019	Chief Operating Officer
Jordan B. Burns	39	N/A	2018	VP & General Counsel
Pamela A. Breuckmann	46	2013	N/A	Director
Stephen M. Clifford	62	2015	N/A	Director
Carney Hawks	48	2021	N/A	Director
A. Andrew Levison	66	1994	N/A	Director
Michael F. Morrissey	80	1999	N/A	Director
Edward Newberry	60	2021	N/A	Director
Craig Snyder	41	2021	N/A	Director

*James E. Ferrell* – Mr. Ferrell was appointed by the Board of Directors of Ferrellgas, Inc. as Interim Chief Executive Officer and President on September 27, 2016 and as Chief Executive Officer and President on December 31, 2020. Mr. Ferrell has been with Ferrell Companies or its predecessors and its affiliates in various executive capacities since 1965, including Chairman of the Board of Directors of Ferrellgas, Inc. Under his leadership, Ferrellgas has grown from a small, independently owned propane company to one of the nation’s largest propane retailers. Mr. Ferrell is a past President of the World LP Gas Association and a former Chairman of the Propane Vehicle Council. Mr. Ferrell brings to the Company significant experience in propane and midstream operations and valuable knowledge of the Company’s operating history.

*Wendel Parks* – Mr. Parks assumed the principal financial officer responsibilities for the registrants effective December 15, 2021. Mr. Parks joined Ferrellgas as Corporate Controller in November 2021. Before joining Ferrellgas, Mr. Parks served as Controller and Director of Finance at Hubbell Incorporated for approximately three years, and prior to that he served as Division Controller at Danaher Corporation for approximately five years. Mr. Parks earned an MBA in Finance and a Bachelor’s in Accounting from the University of North Carolina at Charlotte.

## [Table of Contents](#)

*Tamria A. Zertuche* – Ms. Zertuche joined Ferrellgas in 2004 when the Company acquired Blue Rhino, where she was employed as Senior Director of IT. In 2010, she was promoted to the leadership team for the Blue Rhino brand. Ms. Zertuche was promoted again to VP of Information Technology in 2016 and to SVP of Business Operations and Chief Information Officer in 2019. In August 2020, Ms. Zertuche was promoted to Chief Operating Officer. Prior to joining the Company, Ms. Zertuche served in various roles in the financial services and retail industries. Ms. Zertuche graduated from UW-Whitewater with a Bachelor of Business Administration in Management Computer Systems. She also holds a Master of Business Administration from Colorado State University, and she is currently completing a Doctoral program in Organizational Learning, Performance, and Change at the same institution.

*Jordan B. Burns* – Mr. Burns joined the Ferrellgas legal team in 2018 and was promoted to Vice President, General Counsel and Corporate Secretary in December 2018. Prior to joining Ferrellgas, Mr. Burns served as outside counsel to Ferrellgas on a national basis. He attended the University of Kansas, where he earned degrees in both Business Administration and Finance. After working as a Series 7 licensed financial analyst, Mr. Burns attended the University of Missouri-Kansas City School of Law.

*Pamela A. Breuckmann* – Ms. Breuckmann was elected to the Board of Directors in 2013 and is a member of the Audit Committee and is a member of the Corporate Governance and Nominating Committee. In addition, during 2018, Ms. Breuckmann was appointed a co-plan administrator of the Ferrell Companies, Inc. Employee Stock Ownership Plan, by the Board of Directors of Ferrell Companies, Inc. Since 2011, Ms. Breuckmann has served as the President and since January 2015, Chief Executive Officer of Ferrell Capital, Inc., a company established in 1998 to manage the financial, business and personal affairs of the Ferrell family. Prior to becoming President of Ferrell Capital, she served as the Chief Financial Officer of the organization from 2007 to 2011. In addition to her role at Ferrell Capital, during 2018, Ms. Breuckmann became the President and member of the Board of Mosaic, LLC, the private family trust company for the Ferrell family, registered under the Banking regulations in the State of Tennessee. During 2009-2019, she was also the President and Chief Operating Officer of Samson Capital Management, LLC. This SEC registered investment advisory business specialized in managing Master Limited Partnership securities for investors. The blend of Ms. Breuckmann's investment experience, accounting background and finance roles give her a unique perspective that serves the Board of Directors well. She began her career in 1998 as an auditor at Deloitte & Touche, LLP. We consider Ms. Breuckmann to be a financial expert. Ms. Breuckmann graduated from the University of Kansas with Bachelor of Science degrees in Business Administration and Accounting. She also holds a Master of Accounting and Information Systems degree from the University of Kansas and has been a Certified Public Accountant since 2000.

*Stephen M. Clifford* – Mr. Clifford joined the Board of Directors in 2015 and is the chairman of the Corporate Governance and Nominating Committee and is a member of the Audit Committee. Mr. Clifford has served as Chief Executive Officer of PBI Gordon Companies, Inc. since October 2020 and as Chief Operating Officer since July 2018. Mr. Clifford retired from Ernst & Young in July 2015 after having served as the Managing Partner of Ernst & Young's Kansas City, Missouri office from 1999 until his retirement. His career at Ernst & Young spanned a total of 32 years, including 19 years as an assurance partner and 30 years as a Certified Public Accountant. During his tenure as the Managing Partner of the Kansas City office, Mr. Clifford was also a member of the executive committee for Ernst & Young's Midwest Area, which was responsible for nearly 4,000 professionals across the Midwest. In addition to his role as the Managing Partner, Mr. Clifford served as the coordinating partner responsible for external audit engagements for numerous clients ranging from Fortune 500 to high growth, private equity-backed companies. Mr. Clifford is the past Chairman of the Board for the Leukemia and Lymphoma Society, a member of the Board of Directors and Chair of the audit committee for the Archdiocese of Northeast Kansas, and the past Chair of the Board of Directors for Cristo Rey High School of Kansas City. Mr. Clifford brings to the Board many years of experience as a leader and assurance partner of a major accounting firm and extensive experience in developing and executing growth strategies, acquisitions, and capital transactions. We consider Mr. Clifford to be an audit committee financial expert. Mr. Clifford obtained his Bachelor of Science and Business Administration, Finance & Accounting degree from Texas Christian University.

## [Table of Contents](#)

*Carney Hawks* – Mr. Hawks was appointed to the Board of Directors in April of 2021. Mr. Hawks is the Chairman and CEO of Hawks Acquisition Corp, a \$230 million SPAC he launched in October 2021. Prior to that, Mr. Hawks was a Founding Partner of Brigade Capital Management, a multi-billion dollar asset management firm, from its inception in 2007 until his retirement from the firm in December 2019. At Brigade, Mr. Hawks was Head of Special Situations, sat on the firm’s Investment Committee and managed two energy-focused funds for the firm. Prior to Brigade, Mr. Hawks was a Managing Director at Mackay Shields in its High Yield Group. Mr. Hawks serves on the board of the Children’s Cardiomyopathy Foundation and is on the Advisory Board to the McIntire School of Commerce at the University of Virginia where he earned a Bachelor of Science in Commerce with Distinction.

*A. Andrew Levison* – Mr. Levison has served on the Board of Directors since 1994 and is a member of the Board’s Compensation Committee and was a member of the Board’s Corporate Governance and Nominating Committee until October 2021. For the past five years Mr. Levison has served as the Managing Partner of Southfield Capital Advisors, LLC, a Greenwich, Connecticut-based, private merchant banking firm and serves on the Boards of Protos Security Holdings LLC, a private Southfield portfolio company, Fortress Transportation and Infrastructure Investors LLC, a NYSE traded public company, the Levison/Present Foundation at Mount Sinai Hospital and NYU/Langone MSK Board. Mr. Levison obtained his Bachelor of Science degree in Finance from Babson College. Mr. Levison founded Levison & Co., the predecessor of Southfield Capital Advisors, LLC, in 2002.

*Michael F. Morrissey* – Mr. Morrissey has served on the Board of Directors since 1999 and chairs the Board’s Audit Committee, serves on the Board’s Compensation Committee as of October 2021 and previously served on the Board’s Corporate Governance and Nominating Committee. Mr. Morrissey has been selected as the presiding director for non-management executive sessions of the Board. Mr. Morrissey retired as the Managing Partner of Ernst & Young’s Kansas City, Missouri office in 1999. Throughout his tenure, Mr. Morrissey has served as a board member on the boards of directors of various companies.

Mr. Morrissey served as a partner of Ernst & Young for seventeen years. Prior to that, Mr. Morrissey worked for twelve years for two major accounting firms, one of which was Ernst & Young (for seven years). Mr. Morrissey has been a Certified Public Accountant since 1972. Mr. Morrissey brings to the Board substantial experience as the Chairman of the audit committees of public companies, many years of experience as an audit partner of a major accounting firm and extensive experience as a director of other large private and public companies. We consider Mr. Morrissey to be an audit committee financial expert. Mr. Morrissey has a high level of understanding of the Board’s role and responsibilities based on his service on other company boards. Mr. Morrissey obtained his Bachelor of Business Administration degree in Accounting from the University of Notre Dame and obtained his Master of Business Administration degree in Finance from Temple University.

*Edward Newberry* – Mr. Newberry was elected to the Board of Directors on September 13, 2021 and was appointed Chairman of the Compensation Committee and a member of the Corporate Governance and Nominating Committee as of October 14, 2021. Mr. Newberry is the Global Managing Partner of the Public Policy Practice, Investigatory and Regulatory Solutions practice groups and is a member of the firm’s Executive Leadership Group at Squire Patton Boggs (US) LLP. Mr. Newberry is widely recognized as one of the leading lawyer-lobbyists in Washington DC. He is ranked as a Leading Lawyer by The Legal 500, which has noted he “is one of the most talented lawyers in Washington,” as well as “an excellent strategic thinker and tactician.”

Before assuming his current role as global managing partner, Mr. Newberry served as managing partner of Patton Boggs, LLP, and led the firm’s merger with Squire Sanders to create Squire Patton Boggs, LLP, ranked 12th in Law360’s ranking of the Most Global law firms. Mr. Newberry is active in a variety of not-for-profit organizations, including as a member of the Atlantic Council Board of Directors and a director of the Ogunquit Museum of American Art. He has also served on the George Mason University Board of Visitors, by appointment of Virginia Governor Tim Kaine; served as Vice Chairman of the Kennedy Center Corporate Board; and as a member of the Board of Trustees of the National Building Museum. Mr. Newberry holds a J.D. from Georgetown University Law Center and B.A. and B.S, with recognition and distinction from George Mason University.

## [Table of Contents](#)

*Craig Snyder* – Mr. Snyder is a Partner and Co-Portfolio Manager of Special Opportunities in the Ares Private Equity Group, where he focuses on investing across the various Ares fund platforms in the public and private markets. Mr. Snyder serves as a member of the Ares Private Equity Group's Special Opportunities Investment Committee and the Ares Insurance Solutions Investment Committee. Mr. Snyder also serves on the board of Convene Global Holdings. Prior to joining Ares in 2017, Mr. Snyder was a Managing Director at GSO Capital Partners/Blackstone where he was Global Head of Trading for the GSO platform and served as a Portfolio Manager and Investment Committee member for its special situations funds focusing on both the public and private markets. Previously, he was a Senior Investment Professional for the investment firm Kingstreet Capital. In addition, Mr. Snyder was an Investment Professional at Caxton Associates. He holds a B.A. from Bucknell University in Political Science.

Messrs. Hawks and Snyder were appointed to the Board on April 9, 2021. Mr. Hawks' appointment to the Board was made in accordance with the terms of the Amended Ferrellgas Partners LPA, our general partner's bylaws, and a voting agreement dated as of the Effective Date among our general partner, Ferrell Companies and the holders of Class B Units, pursuant to which holders of such Class B Units are permitted to designate one independent director to the Board. Mr. Snyder's appointment to the Board was made in accordance with the terms of the Amended OpCo LPA, as amended by the OpCo LPA Amendment, our general partner's bylaws, and a voting agreement dated as of the Effective Date among our general partner, FCI and the purchasers of the Preferred Units, pursuant to which the Preferred Unitholders are permitted, subject to certain conditions, to designate one independent director to the Board.

## **Corporate Governance**

The limited partnership agreements of Ferrellgas Partners and the operating partnership provide for each partnership to be governed by a general partner rather than a board of directors. Through these partnership agreements, Ferrellgas, Inc. acts as the general partner of both Ferrellgas Partners and the operating partnership and thereby manages and operates the activities of Ferrellgas Partners and the operating partnership. Ferrellgas, Inc. anticipates that its activities will be limited to the management and operation of the partnerships. Neither Ferrellgas Partners nor the operating partnership directly employs any of the persons responsible for the management or operations of the partnerships; rather, these individuals are employed by the general partner.

The Board of Directors of our general partner has adopted a set of Corporate Governance Guidelines for the Board and charters for its Audit Committee, Corporate Governance and Nominating Committee and Compensation Committee. A current copy of these Corporate Governance Guidelines and charters, each of which were adopted and approved by the entire Board, are available, free of charge, to our security holders and other interested parties on our website at [www.ferrellgas.com](http://www.ferrellgas.com) (under the caption "Corporate Governance" within "Investor Information") and are also available in print to any unitholder or other interested parties who request it. Requests for print copies should be directed to:

Ferrellgas, Inc.  
Attention: Investor Relations  
One Liberty Plaza  
Liberty, Missouri 64068  
816-792-1600  
[investors@ferrellgas.com](mailto:investors@ferrellgas.com).

Please note that the information and materials found on our website, except for SEC filings expressly incorporated by reference herein, are not part of this report and are not incorporated by reference into this report.

## [Table of Contents](#)

Although our Class A Units are no longer listed on the NYSE and we therefore are not subject to the corporate governance listing standards of the NYSE or any other securities exchange, our corporate governance guidelines and committee charters continue to refer with respect to certain matters to requirements of the NYSE listing standards, and, among other matters, the Board has continued to evaluate the independence of directors in accordance with NYSE standards. The Board has affirmatively determined that Ms. Breuckmann, Mr. Clifford, Mr. Hawks, Mr. Levison, Mr. Newberry, Mr. Morrissey, and Mr. Snyder, who constitute a majority of its Directors are “independent” as described by the NYSE’s corporate governance rules. In conjunction with regular Board meetings, these non-management directors also meet in a regularly scheduled executive session without members of management present. A non-management director presides over each executive session of non-management directors. Mr. Morrissey has been selected as the presiding director for non-management executive sessions. If Mr. Morrissey is not present then the other non-management directors shall select the presiding director. Additional executive sessions may be scheduled by a majority of the non-management directors in consultation with the presiding director and the Chairman of the Board.

### **Audit Committee**

The Board has a designated Audit Committee comprised of Ms. Breuckmann, Mr. Clifford and Mr. Morrissey. Mr. Morrissey is the Chairman of the Audit Committee. Ms. Breuckmann, Mr. Clifford and Mr. Morrissey each has been determined by the Board to be an “audit committee financial expert.” The Audit Committee charter requires that members of the Audit Committee satisfy “independence” requirements as set out by the NYSE and the SEC. The Board has determined that all of the members of the Audit Committee are “independent” as described under the relevant standards.

The Audit Committee charter requires the Audit Committee to pre-approve all engagements with any independent registered public accounting firm, including all engagements regarding the audit of the financial statements of each of Ferrellgas Partners, L.P., Ferrellgas, L.P., Ferrellgas Partners Finance Corp., and Ferrellgas Finance Corp. and all permissible non-audit engagements with the independent registered public accounting firm. Additionally, the Audit Committee oversees the internal audit function for each of Ferrellgas Partners, L.P., Ferrellgas, L.P., Ferrellgas Partners Finance Corp., and Ferrellgas Finance Corp., and such other duties as directed by the Board. The Audit Committee charter is available on the Company’s website.

### **Limitation on Directors Participating on Audit Committees**

The Board has adopted a policy limiting the number of public company audit committees its directors may serve on to three at any point in time. If a director desires to serve on more than three public company audit committees, he or she must first obtain the written permission of the Board.

### **Corporate Governance and Nominating Committee**

The Board has a designated Corporate Governance and Nominating Committee, which is comprised of Ms. Breuckmann, Mr. Clifford and Mr. Newberry. Mr. Clifford is the Chairman of the Corporate Governance and Nominating Committee. The Corporate Governance and Nominating Committee charter requires that members of the Corporate Governance and Nominating Committee satisfy particular “independence” requirements. The Board has determined that all of the members of the Corporate Governance and Nominating Committee are “independent” as described under relevant standards. The Corporate Governance and Nominating Committee charter is available on the Company’s website.

[Table of Contents](#)

**Compensation Committee**

The Board has a designated Compensation Committee, which is comprised of Mr. Levison, Mr. Morrissey and Mr. Newberry. Mr. Newberry is the Chairman of the Compensation Committee. The Compensation Committee charter requires that members of the Compensation Committee satisfy particular “independence” requirements. The Board has determined that all of the members of the Compensation Committee are “independent” as described under relevant standards. The Compensation Committee has the authority to assist the Board of Directors in fulfilling its responsibility to effectively compensate the senior management of the general partner in a manner consistent with the growth strategy of the general partner. Toward that end, the Compensation Committee oversees the review process of all compensation, equity and benefit plans of Ferrellgas. In discharging this oversight role, the Compensation Committee has full power to consult with, retain and compensate independent legal, financial and/or other advisers as it deems necessary or appropriate. The Compensation Committee charter is available on the Company’s website.

**Disclosure about our Security Holders’ and Interested Parties’ Ability to Communicate with the Board of Directors of our General Partner**

The Board of Directors of our general partner has a process by which security holders and interested parties can communicate with it. Security holders and interested parties can send communications to the Board, the presiding director or the independent directors as a group by contacting our Investor Relations department by mail, telephone or e-mail at:

Ferrellgas, Inc.  
Attention: Investor Relations  
One Liberty Plaza  
Liberty, Missouri 64068  
816-792-1600  
[investors@ferrellgas.com](mailto:investors@ferrellgas.com).

Any communications directed to the Board of Directors from employees or others that concern complaints regarding accounting, internal controls or auditing matters will be handled in accordance with procedures adopted by the Audit Committee. All other communications directed to the Board of Directors are initially reviewed by the Investor Relations Department. The Chairman of the Corporate Governance and Nominating Committee is advised promptly of any such communication that alleges misconduct on the part of management or raises legal, ethical or compliance concerns about the policies or practices of the general partner. On a periodic basis, the Chairman of the Corporate Governance and Nominating Committee receives updates on other communications that raise issues related to our affairs but do not fall into the two prior categories. The Chairman of the Corporate Governance and Nominating Committee determines which of these communications require further review. The Corporate Secretary maintains a log of all such communications that is available for review for one year upon request of any member of the Board. Typically, the general partner does not forward to the Board of Directors communications from unitholders or other parties which are of a personal nature or are not related to the duties and responsibilities of the Board, including junk mail, customer complaints, job inquiries, surveys and polls, and business solicitations.

## [Table of Contents](#)

### **Code of Ethics for Principal Executive and Financial Officers and Code of Business Conduct and Ethics**

The Board has adopted a Code of Ethics for our general partner's principal executive officer, principal financial officer, principal accounting officer or those persons performing similar functions. Additionally, the Board has adopted a general Code of Business Conduct and Ethics for all of our general partner's directors, officers and employees. These codes, which were adopted and approved by the entire Board, are available to our security holders and other interested parties at no charge on our website at [www.ferrellgas.com](http://www.ferrellgas.com) (under the caption "Corporate Governance" within "Investor Information") and are also available in print to any security holder or other interested parties who requests it. Requests for print copies should be directed to:

Ferrellgas, Inc.  
Attention: Investor Relations  
One Liberty Plaza  
Liberty, Missouri 64068  
816-792-1600  
[investors@ferrellgas.com](mailto:investors@ferrellgas.com).

Please note that the information and materials found on our website, except for SEC filings expressly incorporated by reference herein, are not part of this report and are not incorporated by reference into this report.

We intend to disclose, within four business days, any amendment to the Code of Business Conduct and Ethics and the Code of Ethics for Principal Executive and Financial Officer on our website. Any waivers from the Code of Ethics for Principal Executive and Financial Officer will also be disclosed on our website.

### **Compensation of our General Partner**

Our general partner receives no management fee or similar compensation in connection with its management of our business and receives no remuneration other than:

- (1) distributions on its combined approximate 2% general partner interest in Ferrellgas Partners and the operating partnership; and
- (2) reimbursement for:
  - all direct and indirect costs and expenses incurred on our behalf;
  - all selling, general and administrative expenses incurred by our general partner on our behalf; and
  - all other expenses necessary or appropriate to the conduct of our business and allocable to us.

The selling, general and administrative expenses reimbursed include specific employee benefits and incentive plans for the benefit of the executive officers and employees of our general partner.

### **Delinquent Section 16(a) Reports**

Section 16(a) of the Exchange Act requires officers and directors of an issuer that has a class of equity securities registered under Section 12 of the Exchange Act, and persons who beneficially own more than 10% of any such class of equity securities, to file reports of beneficial ownership and changes in beneficial ownership of equity securities of such class with the SEC. These forms include Forms 3, 4 and 5 and any amendments thereto. As result of the delisting of our common units from the NYSE, we no longer have a class of equity securities registered under Section 12 of the Exchange Act, and the officers and directors of our general partner and 10% beneficial owners of our Class A Units are not subject to the reporting requirements of Section 16(a) of the Exchange Act.

## [Table of Contents](#)

However, since the delisting of our common stock, to our knowledge, the officers and directors of our general partner and 10% beneficial owners of our Class A Units generally have continued to file the reports that would be required by Section 16(a) if the Class A Units were registered under Section 12 of the Exchange Act. To our knowledge, based solely on its review of the copies of such Section 16(a) forms and, to the extent applicable, written representations from certain reporting persons that no Annual Statement of Changes in Beneficial Ownership of Securities on Form 5 were required to be filed by those persons, our general partner believes that during fiscal 2022 all Section 16(a) filing requirements that would have been applicable to the officers and directors of our general partner and beneficial owners of more than 10% of our Class A Units (if the Class A Units were registered under Section 12 of the Exchange Act) were met in a timely manner.

## **ITEM 11. EXECUTIVE COMPENSATION.**

### **Risks Related to Compensation Policies and Practices**

Management conducted a risk assessment of our compensation policies and practices for fiscal 2022. Based on its evaluation, management does not believe that any such policies or practices create risks that are reasonably likely to have a material adverse effect on Ferrellgas Partners.

#### ***Overview of Executive Officer Compensation***

Throughout this section, each person who served as the Principal Executive Officer (“PEO”) during fiscal 2022 and the two most highly compensated executive officers other than the PEO serving at July 31, 2022 are referred to as the Named Executive Officers (“NEOs”). We do not directly employ our NEOs. Rather, we are managed by our general partner who serves as the employer of our NEOs. We reimburse our general partner for all NEO compensation.

#### **Named Executive Officers**

James E. Ferrell, Chief Executive Officer and President; Chairman of the Board of Directors

Tamria A. Zertuche, Chief Operating Officer

Jordan B. Burns, VP & General Counsel

#### ***Compensation Objectives***

We believe an effective executive compensation package should link total compensation to overall financial performance and to the achievement of both short and long term strategic, operational and financial goals. The elements of our compensation program are intended to provide a total reward package to our NEOs that (i) provides competitive compensation opportunities, (ii) recognizes and rewards individual contribution, (iii) attracts, motivates and retains highly-talented executives, and (iv) aligns executive performance toward the creation of sustained unitholder value rather than the achievement of short-term goals that might be inconsistent with the creation of long-term unitholder value.

#### ***Role of Management***

Our Chief Executive Officer formulates preliminary compensation recommendations for all NEOs, including himself. These recommendations are subject to review and approval by the Compensation Committee. Our Chief Executive Officer and the Compensation Committee utilized market compensation survey data provided in fiscal 2022, which is used to create salary range benchmarks for each NEO’s compensation.

Our compensation philosophy includes benchmarking executive positions using national market data from companies of similar revenue size to us. Data used to compare executive compensation is derived from the survey data obtained from Mercer, LLC. (“Mercer”), a human resourcing consulting firm, using its United States Mercer benchmark database (the “Mercer database”) and the Global Total Compensation

Measurement survey provided by Aon Hewitt. Data obtained was used to compare NEOs' current base salaries and total direct compensation and set salary ranges. Mercer and Aon Hewitt did not provide any formal consulting services.

## [Table of Contents](#)

### ***Components of Named Executive Officer Compensation***

During fiscal 2022, elements of compensation for our NEOs consisted of the following:

- base salary;
- discretionary bonus;
- equity-based incentive compensation plan;
- short term incentive plan;
- employee stock ownership plan; and
- deferred compensation plans.

#### ***Base Salary***

Our Chief Executive Officer formulates preliminary base salary recommendations for all NEOs, including himself. These recommendations are subject to review and approval by the Compensation Committee. To assist our Chief Executive Officer and the Compensation Committee compensation survey data is utilized to provide market data that is used to create benchmarks for each NEO's base salary. These benchmarks refer to the high and low end of the ranges, rather than a specific point within the range. The following table identifies the low and high ends of the base salary range included in the market data:

	<u>Low Point</u>	<u>High Point</u>
Chief Executive Officer	\$772,550	\$1,002,600
Chief Operating Officer	506,700	821,300
VP & General Counsel	318,800	458,400

Additionally, other factors such as performance and other executive responsibilities are taken into consideration when determining the base salaries of our NEOs.

The amount of each NEO's most recent salary during fiscal 2022 is displayed in the table below. The amount of salary paid to each NEO during fiscal 2022 is displayed in the "Salary" column of the Summary Compensation Table.

<u>Named Executive Officer</u>	<u>2022 Annual Base Salary</u>
James E. Ferrell	\$ 900,000
Tamria A. Zertuche	669,500
Jordan B. Burns	341,700

#### ***Discretionary Bonus***

Our Chief Executive Officer has the authority to recommend for Compensation Committee review and approval, discretionary cash bonuses to any NEO, including himself. These awards are designed to reward performance by a NEO that our Chief Executive Officer believes exceeded expectations in operational or strategic objectives during the last fiscal year. The discretionary bonus paid to each NEO for fiscal 2022 is included in the "Bonus" column of the Summary Compensation Table below.

## [Table of Contents](#)

### ***Equity-based Incentive Compensation Plan***

We have an equity-based incentive compensation plan, the Ferrell Companies Incentive Compensation Plan (the “ICP”), in which our NEOs are permitted to participate. The ICP was established by Ferrell Companies to allow upper-middle and senior level managers, including NEOs, and directors of our general partner to participate in the equity growth of Ferrell Companies. Pursuant to this ICP, eligible participants may be granted stock options to purchase shares of common stock of Ferrell Companies, stock appreciation rights (“SARs”), performance shares or other equity-linked incentives payable in cash or in stock. Neither Ferrellgas Partners nor the operating partnership contributes, directly or indirectly, to the ICP. Options granted under the ICP vest ratably over periods ranging from zero to 10 years or 100% upon a change of control of Ferrell Companies, or upon the death, disability or retirement at the age of 65 of the participant. All awards expire ten years from the date of issuance.

Options or SARs are granted under the ICP periodically throughout the year at strike prices equal to the most recently published semi-annual valuation by an independent third-party valuation firm that is performed on Ferrell Companies, which is a privately held company, for the purposes of the ESOP (as defined below). All other terms of these awards granted to the NEOs, including the quantity awarded, vesting life and expiration date of awards are discretionary and must be approved by the ICP Option Committee, which includes our Chief Executive Officer. Awards granted to NEOs must also be approved by the Compensation Committee. No stock option awards, SARs, performance shares or other incentives payable in cash or in stock were granted under the ICP to NEOs in fiscal 2022 or 2021.

### ***Short Term Incentive Plan***

Effective August 1, 2020, we established a cash-based short-term incentive plan, the Ferrellgas, Inc. Short Term Incentive Plan (the “STIP”), in which certain employees in critical positions, including NEOs, are permitted to participate if selected by the Board of Directors. The STIP was established by our general partner to allow certain employees to participate in the success of Ferrellgas. The amount of compensation cost related to the STIP incurred for each NEO is displayed in the “Non-Equity Incentive Plan Compensation” column of the Summary Compensation Table. However, no payments were made under the STIP during fiscal 2022 or 2021.

Target STIP payouts are established by the Board as a percentage of the participant’s annual base pay as of August 1 of each year. The target levels are determined on an individual basis and communicated to such employees by the end of each October. Target incentive levels are discretionary and are determined solely by the Board.

Ferrellgas must achieve at least 80% of its budgeted EBITDA target to trigger incentive payouts unless the Chief Executive Officer exercises discretion to make an exception. At 100% goal attainment, the STIP pool will be funded 100%, and if goal attainment is above or below 100%, the pool will be funded in certain increments above or below 100% as further described in the STIP. Individual payouts for each participant are determined by individual performance against the participant’s individual objectives.

Payments are normally made by November 15 following the plan year, which aligns with our fiscal year, and participants must be employed by Ferrellgas on the payment date to be eligible to receive such payment. Employees who become participants after the start of the plan year but prior to the start of the last fiscal quarter are eligible to receive a pro-rated bonus. The Board may amend or discontinue the STIP at any time in its sole discretion.

### ***Employee Stock Ownership Plan***

On July 17, 1998, pursuant to the Ferrell Companies, Inc. Employee Stock Ownership Plan (the “ESOP”), an employee stock ownership trust purchased all of the outstanding common stock of Ferrell Companies. The purpose of the ESOP is to provide all employees of our general partner, including NEOs, an opportunity for ownership in Ferrell Companies, and indirectly, in us. Ferrell Companies makes contributions to the ESOP, which allows a portion of the shares of Ferrell Companies owned by the ESOP

to be allocated to employees' accounts over time. The value of the shares allocated to each NEO for compensation related to fiscal 2022 and 2021 is included in the "All Other Compensation" column of the Summary Compensation Table.

---

## [Table of Contents](#)

Twice per year and in accordance with the ESOP, each NEO's ESOP account receives an allocation of Ferrell Companies shares. This allocation, as determined by the ESOP, is based on the following: a) the relative percentage of the NEO's base salary, discretionary bonus, and corporate incentive plan payment made during the period to all eligible employee compensation (if applicable), subject to certain limitations under Section 415 of the Internal Revenue Code, and b) shares owned from previous allocations. NEOs vest in their account balances as follows:

Number of Completed Years of Service	Vested Percent
Less than 3 years	— %
3 years	20 %
4 years	40 %
5 years	60 %
6 years	80 %
7 years or more	100 %

NEOs are entitled to receive a distribution for the vested portion of their accounts at specified times in accordance with the ESOP for normal or late retirement, disability, death, resignation, or dismissal.

### ***Deferred Compensation Plans and Retirement Savings Plans***

Two deferred compensation plans are available for participation by our NEOs, the “401(k) Investment Plan,” a tax-qualified retirement plan, and the “Supplemental Savings Plan,” a non-qualified deferred compensation plan. The amount of company match related to these plans credited to each NEO’s account during fiscal 2022 and 2021 is included in the “All Other Compensation” column of the Summary Compensation Table.

*401(k) Investment Plan* – The Ferrell Companies, Inc. 401(k) Investment Plan (“401(k) Plan”) is a qualified defined contribution plan, which includes both employee contributions and employer matching contributions. All employees of our general partner or any of its direct or indirect wholly-owned subsidiaries, including NEOs, who are not part of a collective bargaining agreement are eligible to participate in the 401(k) Plan. The 401(k) Plan has a 401(k) feature allowing all eligible employees to specify a portion of their pre-tax and/or after-tax compensation to be contributed to the 401(k) Plan. It also provides for matching contributions under a cash or deferred arrangement based upon participant salaries and employee contributions to the 401(k) Plan.

Due to Internal Revenue Code “Highly Compensated Employee” rules and regulations, NEOs may only contribute up to approximately 6% of their eligible compensation to the 401(k) Plan. We will provide a 50% matching contribution of the first 8% of all eligible contributions made to the 401(k) Plan and the SSP (as defined below) combined. Employee contributions are 100% vested, while the Company’s matching contributions vest ratably over the first five years of employment. Employee and our matching contributions can be directed, at the employee’s option, to be invested in a number of investment options that are offered by the 401(k) Plan.

*Supplemental Savings Plan* – The Ferrell Companies, Inc. Supplemental Savings Plan (“SSP”) was established in order to provide certain management or highly compensated employees with supplemental retirement income which is approximately equal in amount to the retirement income that such employees would have received under the terms of the 401(k) feature of the above 401(k) Plan based on such employee’s deferral elections thereunder, but which could not be provided under the 401(k) feature of the 401(k) Plan due to the application of certain “Highly Compensated Employee” IRS rules and regulations.

This non-qualified plan is available to all employees who have been designated as “Highly Compensated” as defined in the Internal Revenue Code. NEOs are allowed to make, subject to Internal Revenue Code limitations, pre-tax contributions to the SSP of up to 25% of their eligible compensation. We provide a 50% matching contribution of the first 8% of all eligible contributions made to the SSP and the above 401(k) Plan combined. Employee contributions are 100% vested, while our matching contributions vest ratably over the first 5 years of employment. Employee and our matching contributions can be

directed, at the employee's option, to be invested in a number of investment options that are identical to the investment options offered under the 401(k) Plan.

## Summary Compensation Table

The following table sets forth the compensation of our NEOs for the last two fiscal years:

Name and Principal Position	Fiscal Year	Salary (\$)	Bonus (\$)	All Other Compensation (\$)	Total (\$)
James E. Ferrell <sup>(1)</sup>	2022	900,000	900,000	200,000	2,000,000
Chief Executive Officer and President	2021	491,588	3,500,000	200,000	4,191,588
Tamria A. Zertuche	2022	668,750	1,557,500	12,367	2,238,617
Chief Operating Officer	2021	630,769	—	14,975	645,744
Jordan B. Burns	2022	341,442	167,500	11,483	520,425
Vice President and General Counsel	2021	335,290	—	9,780	345,070

(1) Mr. Ferrell was appointed by the Board of Directors as Chief Executive Officer on December 31, 2020. Pursuant to the terms of his employment agreement, Mr. Ferrell received a \$2,000,000 sign-on bonus on December 31, 2020. Additionally, on December 30, 2020, the Compensation Committee of the Board of Directors awarded Mr. Ferrell a one-time bonus of \$1,500,000. On September 28, 2022, Mr. Ferrell signed an employment agreement for an additional two-year term effective January 1, 2023.

The “All Other Compensation” column of the Summary Compensation Table above consisted of the following:

Name	Year	ESOP Allocations (\$)	401(k) Plan Match (\$)	SSP Match (\$)	Other (\$)	Total All Other Compensation (\$)
James E. Ferrell <sup>(1)</sup>	2022	—	—	—	200,000	200,000
	2021	—	—	—	200,000	200,000
Tamria A. Zertuche	2022	4,653	7,714	—	—	12,367
	2021	4,778	10,197	—	—	14,975
Jordan B. Burns	2022	4,653	6,830	—	—	11,483
	2021	3,074	6,706	—	—	9,780

(1) Mr. Ferrell received \$200,000 of fees paid in cash in respect of his service on the Board during fiscal 2022 and 2021.

## Potential Payments Upon Termination or Change in Control

During fiscal 2022, there were no agreements, plans, or arrangements in effect obligating us to make payments to a NEO upon termination or change in control other than the ICP described above under “Equity-based Incentive Compensation Plan.” Had a change in control of Ferrell Companies occurred on July 31, 2022, the last business day of fiscal 2022, all SARs issued under the ICP were valued at zero and, accordingly, no payment thereunder would have been due to any of our NEOs.

## Compensation of Non-Employee Directors

We believe the compensation package for the non-employee members of the Board of Directors of our general partner should compensate our non-employee directors in a manner that is competitive within the marketplace. Our compensation package includes a combination of annual director fees and SAR awards.

Total compensation awarded to our non-employee directors varies depending upon their level of activity within the Board. All directors are paid a base fee, plus additional fees depending on their level of activity. The base fee as of July 31, 2022 was \$125,000 per year. Participation in and chairing of committees within the Board will increase the level of compensation paid to an individual Board member. The respective Chairman of the Audit Committee, Compensation Committee, and Corporate Governance and Nominating Committee received an additional \$17,500, \$11,250, and \$11,250, respectively. Several directors also received a cash bonus in fiscal 2022 as noted in the table below.

---

## [Table of Contents](#)

Our Chief Executive Officer formulates preliminary annual director fee and SAR awards recommendations for each Board member. These recommendations are subject to review and approval by the Compensation Committee. To assist our Chief Executive Officer and the Compensation Committee, publicly available board of director compensation data within our industry is reviewed to provide market data that is used to create benchmarks for each director's annual director fee and total compensation package.

SAR awards for non-employee members of the Board are determined utilizing competitive compensation data that is gathered on an annual basis. Annually we compare the compensation of our Board with the compensation levels and practices of companies that are of similar size and operate in similar industries. We utilize that data to analyze the compensation of our non-employee members of the Board and ensure that we are competitive in the marketplace for compensating our Board. SAR awards are one element of that compensation, and the actual awards that are granted are determined on a discretionary basis. All SAR awards granted to our non-employee directors have an exercise price equal to the most recently published semi-annual valuation that is performed on Ferrell Companies for the purposes of the ESOP. No SAR awards were granted to our non-employee directors during fiscal 2022.

The following table sets forth the compensation of our non-employee directors for fiscal 2022. Mr. Ferrell, who serves as the Chairman of the Board of Directors of our general partner, is also the Chief Executive Officer and President of our general partner, and all compensation for his service on the Board of Directors of our general partner is included in the Summary Compensation Table above.

Name	Fees Paid in Cash (\$)	Option Awards (\$)	All Other Compensation (\$) <sup>(1)</sup>	Total (\$)
A. Andrew Levison <sup>(2)</sup>	137,500	—	75,000	212,500
John R. Lowden <sup>(2)(3)</sup>	61,763	—	—	61,763
Michael F. Morrissey <sup>(4)</sup>	155,000	—	75,000	230,000
Pamela A. Breuckmann <sup>(5)</sup>	137,500	—	350,000	487,500
Stephen M. Clifford <sup>(6)</sup>	148,752	—	—	148,752
Carney Hawks	125,000	—	—	125,000
Craig Snyder	125,000	—	—	125,000
Edward Newberry <sup>(7)</sup>	85,413	—	—	85,413

(1) These directors received a cash bonus related to their assistance with the fiscal 2021 debt restructuring.

(2) At July 31, 2022, this director had 90,000 SAR awards outstanding.

(3) Mr. Lowden retired from the Board on October 14, 2021.

(4) At July 31, 2022, this director had 109,000 SAR awards outstanding.

(5) At July 31, 2022, this director had 33,000 SAR awards outstanding.

(6) At July 31, 2022, this director had 50,000 SAR awards outstanding.

(7) Mr. Newberry was elected as a director on September 13, 2021

## **ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED UNITHOLDER MATTERS.**

The following table sets forth certain information as of September 30, 2022, regarding the beneficial ownership of our Class A Units by:

- persons that own more than 5% of our Class A Units;
- persons that are directors, nominees or named executive officers of our general partner; and

- all directors and executive officers of our general partner as a group.

Other than those persons listed below, our general partner knows of no other person beneficially owning more than 5% of our Class A Units.

[Table of Contents](#)

**Ferrellgas Partners, L.P.**

Title of class	Name and address of beneficial owner <sup>(1)</sup>	Units beneficially owned	Percentage of class
<b>Class A Units</b>			
	Ferrell Companies, Inc. Employee Stock Ownership Trust 125 S. LaSalle Street, 17th floor Chicago, IL 60603	1,138,812	23.4
	James E. Ferrell	238,172	4.9
	Tamria A. Zertuche	—	*
	Jordan B. Burns	—	*

	Edward Newberry	924	*
	Craig Snyder	—	*
	All Directors and Executive Officers as a Group in fiscal 2022	272,420	5.6

\* Less than one percent

(1) Unless otherwise noted, the business address of each of the following entities or individuals is: One Liberty Plaza, Liberty, Missouri 64068.

Beneficial ownership for the purposes of the foregoing table is defined by Rule 13d-3 under the Exchange Act. Under that rule, a person is generally considered to be the beneficial owner of a security if he has or shares the power to vote or direct the voting thereof, and/or to dispose or direct the disposition thereof, or has the right to acquire either of those powers within 60 days.

All common stock of Ferrell Companies, Inc. (“FCI shares”) held in the Ferrell Companies, Inc. Employee Stock Ownership Trust (the “Trust”) is ultimately voted by the appointed trustee. The current independent trustee (the “Trustee”) of the Trust is James Urbach. Each participant in the Ferrell Companies, Inc. Employee Stock Ownership Plan (the “ESOP”) may be entitled to direct the Trustee as to the exercise of any voting rights attributable to FCI shares allocated to their ESOP account, but only to the extent required by the Internal Revenue Code. The ESOP plan administrator directs the Trustee how to vote both FCI shares not allocated to plan participants (i.e., held in a Trust suspense account) and any allocated FCI shares in the Trust as to which no voting instructions have been received from participants. In all cases, the Trustee may vote the shares as it determines is necessary to fulfill its fiduciary duties under ERISA.

The Class A Units beneficially owned by the Trust at September 30, 2022 include 1,126,468 Class A Units owned by Ferrell Companies which is 100% owned by the Trust, 9,784 Class A Units owned by FCI Trading Corp., a wholly-owned subsidiary of Ferrell Companies and 2,560 Class A Units owned by Ferrell Propane, Inc., a wholly-owned subsidiary of our general partner.

**Securities Authorized for Issuance under Equity Compensation Plan**

None.

**ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE.**

**Related Party Transactions**

Our written Code of Business Conduct and Ethics applies to our directors, officers and employees. It deals with conflicts of interest, confidential information, use of company assets, business dealings, and other similar topics. The Code prohibits any transaction that raises questions of possible ethical or legal conflict between Ferrellgas' interests and an employee's personal interests.

## [Table of Contents](#)

The Board of Directors maintains policies that govern specific related party transactions. Each of these policies contains guidelines on what entities or natural persons are considered related parties or an affiliate and the related procedures that are to be followed if transactions occur with these parties. On a quarterly basis, or more frequently if required by the policies, management provides the Board with a discussion of any related party or affiliate trading transactions. Annually, these policies are reviewed by the Board's Corporate Governance and Nominating Committee and considered for approval by the Board of Directors.

Our directors and officers are required each year to respond to a detailed questionnaire. The questionnaire requires each director and officer to identify every non-Ferrellgas organization of any type of which they or any of their family members (as defined by the SEC) are a director, partner, member, trustee, officer, employee, representative, consultant or significant shareholder. The questionnaire also requires disclosure of any transaction, relationship or arrangement with Ferrellgas. The information obtained from these questionnaires is then evaluated to determine the nature and amount of any transactions or relationships. If significant, the results are provided to the Corporate Governance and Nominating Committee and Board for their use in determining director and officer independence and related party disclosure obligations.

We have no employees and are managed and controlled by our general partner. Pursuant to our partnership agreement, our general partner is entitled to reimbursement for all direct and indirect expenses incurred or payments it makes on our behalf, and all other necessary or appropriate expenses allocable to us or otherwise reasonably incurred by our general partner in connection with operating our business. These reimbursable costs, which totaled \$304.3 million for fiscal 2022, include operating expenses such as compensation and benefits paid to employees of our general partner who perform services on our behalf, as well as related general and administrative expenses.

Related party Class A Unitholder information consisted of the following:

	<u>Class A Unit ownership at July 31, 2022</u>	<u>Distributions paid during the year ended July 31, 2022</u> (in thousands)
Ferrell Companies <sup>(1)</sup>	1,126,468	\$ —
James E. Ferrell <sup>(2)</sup>	238,172	—
FCI Trading Corp. <sup>(3)</sup>	9,784	—
Ferrell Propane, Inc. <sup>(4)</sup>	2,560	—

- (1) Ferrell Companies is the owner of the general partner and an approximate 23% direct owner of Class A Units and thus a related party. Ferrell Companies also beneficially owns 9,784 and 2,560 Class A Units held by FCI Trading Corp. ("FCI Trading") and Ferrell Propane, Inc. ("Ferrell Propane"), respectively, bringing Ferrell Companies' total beneficial ownership to 23.4%.
- (2) James E. Ferrell is the Chief Executive Officer and President of our general partner; and is the Chairman of the Board of Directors of our general partner. JEF Capital Management owns 237,942 of these Class A Units and is owned by the James E. Ferrell Revocable Trust Two and other family trusts, all of which James E. Ferrell and/or his family members are the trustees and beneficiaries. James E. Ferrell holds all voting common stock of JEF Capital Management. The remaining 230 Class A Units are held by Ferrell Resources Holdings, Inc., which is wholly-owned by the James E. Ferrell Revocable Trust One, for which James E. Ferrell is the trustee and sole beneficiary.
- (3) FCI Trading is an affiliate of the general partner and thus a related party.
- (4) Ferrell Propane, Inc. is controlled by the general partner and thus a related party.

During fiscal 2022, neither Ferrellgas Partners nor the operating partnership paid any distributions to the general partner.

Mr. Snyder is a Partner and Co-Portfolio Manager of Special Opportunities in the Ares Private Equity Group ("Ares"). Pursuant to the Investment Agreement, certain affiliated funds, investment vehicles and/or

managed accounts of Ares severally purchased an aggregate of \$246 million of Preferred Units on the Effective Date.

## [Table of Contents](#)

Mr. Newberry is the Global Managing Partner of the Public Policy Practice, Investigatory and Regulatory Solutions practice groups at Squire Patton Boggs (US) LLP, which serves as outside counsel for various Ferrellgas matters. Ferrellgas paid aggregate fees of \$0.9 million and \$7.7 million, respectively, to Squire Patton Boggs (US) LLP for legal services rendered to Ferrellgas and its affiliates during fiscal 2022 and 2021, respectively.

### **Indebtedness of Management**

None.

### **Transactions with Promoters**

None.

### **Director Independence**

The Board has affirmatively determined that Ms. Breuckmann, Mr. Clifford, Mr. Hawks, Mr. Levison, Mr. Morrissey, Mr. Newberry, and Mr. Snyder, who constitute a majority of its Directors, are “independent” as described by the NYSE’s corporate governance rules.

## **ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES.**

The following table presents fees for professional services rendered by Grant Thornton LLP for the audit of the Company’s annual financial statements for the years ended July 31, 2022 and July 31, 2021 and fees billed for other services rendered by Grant Thornton LLP for such years, unless otherwise noted:

(in thousands)	2022	2021
Audit fees <sup>(1)</sup>	\$ 1,225	\$ 1,275
Audit-related fees <sup>(2)</sup>	37	92
Tax fees <sup>(3)</sup>	—	—
All other fees <sup>(4)</sup>	—	—
Total	<u>\$ 1,262</u>	<u>\$ 1,367</u>

- 
- (1) Audit fees consist of the aggregate fees billed for each of the last two fiscal years for professional services rendered by Grant Thornton LLP in connection with the audit of our annual financial statements and the review of financial statements included in our quarterly reports on Form 10-Q. In addition, these fees also covered those services that are normally provided by an accountant in connection with statutory and regulatory filings or engagements and services related to accounting consultations, consents, comfort letters and assistance with and review of documents filed with the SEC.
- (2) Audit-related fees consist of the aggregate fees billed in each of the last two fiscal years for assurance and related services by Grant Thornton LLP that we believe are reasonably related to the performance of the audit or review of our financial statements and that would not normally be reported under Item 9(e)(1) of Schedule 14A. These services generally consisted of financial accounting and reporting consultations not classified as audit fees, due diligence related to mergers and acquisitions and audits of our benefit plans.
- (3) Tax fees, which there were none in fiscal 2022 and fiscal 2021, represent fees for professional tax services provided by Grant Thornton.
- (4) All other fees, which were none in fiscal 2022 and fiscal 2021, represent the aggregate fees billed for products and services provided by Grant Thornton, other than Audit fees, Audit-related fees and Tax fees.

The Audit Committee of our general partner reviewed and approved all audit and non-audit services provided to us by Grant Thornton LLP during fiscal 2022 and 2021, respectively, prior to the commencement of such services. See “Item 10. Directors and Executive Officers of the Registrants—Audit Committee” for a description of the Audit Committee’s pre-approval policies and procedures related to the engagement by us of an independent registered public accounting firm.

### **Opinion on the financial statements**

We have audited the accompanying consolidated balance sheets of Ferrellgas Partners, L.P. (a Delaware limited partnership) and subsidiaries (the “Partnership”) as of July 31, 2022 and 2021, the related consolidated statements of operations, comprehensive income (loss), deficit, and cash flows for each of the three years in the period ended July 31, 2022, and the related notes and financial statement schedule included under Item 15(a) (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Partnership as of July 31, 2022 and 2021, and the results of its operations and its cash flows for each of the three years in the period ended July 31, 2022, in conformity with accounting principles generally accepted in the United States of America.

### **Basis for opinion**

These financial statements are the responsibility of the Partnership’s management. Our responsibility is to express an opinion on the Partnership’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Partnership in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Partnership is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Partnership’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

### **Critical audit matters**

Critical audit matters are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. We determined that there are no critical audit matters.

/s/ GRANT THORNTON LLP

We have served as the Partnership’s auditor since 2012.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

Board of Directors and Partners  
Ferrellgas, L.P.

**Opinion on the financial statements**

We have audited the accompanying consolidated balance sheets of Ferrellgas, L.P. (a Delaware limited partnership) and subsidiaries (the “Partnership”) as of July 31, 2022 and 2021, the related consolidated statements of operations, comprehensive income (loss), partners’ deficit, and cash flows for each of the three years in the period ended July 31, 2022, and the related notes and financial statement schedule included under Item 15(a) (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Partnership as of July 31, 2022 and 2021, and the results of its operations and its cash flows for each of the three years in the period ended July 31, 2022, in conformity with accounting principles generally accepted in the United States of America.

**Basis for opinion**

These financial statements are the responsibility of the Partnership’s management. Our responsibility is to express an opinion on the Partnership’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Partnership in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Partnership is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Partnership’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

**Critical audit matters**

Critical audit matters are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. We determined that there are no critical audit matters.

**FERRELLGAS PARTNERS, L.P. AND SUBSIDIARIES**

**FERRELLGAS, L.P. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(Dollars in thousands, except per unit data, unless otherwise designated)

**A. Partnership organization and formation**

**Ferrellgas Partners**

Ferrellgas Partners, L.P. (“Ferrellgas Partners”) was formed on April 19, 1994, and is a publicly traded limited partnership. Ferrellgas Partners is a holding entity that conducts no operations and has two direct subsidiaries, Ferrellgas Partners Finance Corp. and Ferrellgas, L.P. (the “operating partnership”). Ferrellgas Partners was formed to acquire and hold a limited partner interest in the operating partnership. Ferrellgas Partners owns a 100% equity interest in Ferrellgas Partners Finance Corp., whose only business activity is to act as the co-issuer and co-obligor of any debt securities issued by Ferrellgas Partners. Our activities are primarily conducted through the operating partnership. Ferrellgas Partners and the operating partnership, collectively referred to as “Ferrellgas,” are both Delaware limited partnerships and are governed by their respective partnership agreements. These agreements contain specific provisions for the allocation of net earnings and loss to each of the partners for purposes of maintaining the partner capital accounts.

Ferrellgas, Inc. (the “general partner”), a Delaware corporation and a wholly-owned subsidiary of Ferrell Companies, is the sole general partner of Ferrellgas Partners and the operating partnership and, excluding the economic interests attributable to Ferrellgas Partners’ Class B Units and the operating partnership’s Preferred Units, owns an approximate 1% general partner economic interest in each, and, therefore, an effective 2% general partner economic interest in the operating partnership. Excluding the economic interests attributable to the Preferred Units, Ferrellgas Partners owns an approximate 99% limited partner interest in the operating partnership. Our general partner performs all management functions for us. Unless contractually provided for, creditors of the operating partnership have no recourse with regards to Ferrellgas Partners. As of July 31, 2022, Ferrell Companies Inc., a Kansas corporation (“Ferrell Companies”), the parent company of our general partner, beneficially owns approximately 23.4% of Ferrellgas Partners’ outstanding Class A Units. Ferrell Companies is owned 100% by an employee stock ownership trust.

**The operating partnership**

The operating partnership was formed on April 22, 1994, and accounts for substantially all of our consolidated assets, sales and operating earnings. The operating partnership is a limited partnership that owns and operates propane distribution and related assets. Ferrellgas Partners and the holders of the Preferred Units (as defined in [Note I - Preferred units](#)) are the only limited partners of the operating partnership.

The operating partnership owns a 100% equity interest in Ferrellgas Finance Corp., whose only business activity is to act as the co-issuer and co-obligor of debt securities issued by the operating partnership.

The operating partnership is primarily engaged in the retail distribution of propane and related equipment sales. The propane distribution market is seasonal because propane is used primarily for heating in residential and commercial buildings. Ferrellgas serves residential, industrial/commercial, portable tank exchange, agricultural, wholesale and other customers in all 50 states, the District of Columbia, and Puerto Rico.

---

## [Table of Contents](#)

### **B. Summary of significant accounting policies**

#### **(1) Accounting estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from these estimates. Significant estimates impacting the consolidated financial statements include accruals that have been established for contingent liabilities, pending claims and legal actions arising in the normal course of business, useful lives of property, plant and equipment, residual values of tanks, capitalization of customer tank installation costs, amortization methods of intangible assets, valuation methods used to value sales returns and allowances, allowance for expected credit losses, fair value of reporting unit, fair value at issuance of Class B units (related to Ferrellgas Partners), recoverability of long-lived assets, assumptions used to value business combinations, determination of incremental borrowing rate used to measure right-of-use asset and lease liability and fair values of derivative contracts.

#### **(2) Principles of consolidation and basis of presentation**

Certain prior-year amounts have been reclassified to conform to the current-year presentation.

#### Ferrellgas Partners

The consolidated financial statements present the consolidated financial position, results of operations and cash flows of Ferrellgas Partners, its wholly-owned subsidiary, Ferrellgas Partners Finance Corp., and the operating partnership, its majority-owned subsidiary, after elimination of all intercompany accounts and transactions. We have determined that the operating partnership is a variable interest entity for whom Ferrellgas Partners has no ability through voting rights or similar rights to make decisions and thus does not have the power to direct the activities of the operating partnership that most significantly impact economic performance. However, we have determined that the accounts of Ferrellgas Partners’ majority-owned subsidiary should be included because Ferrellgas Partners is most closely associated with the operations of the operating partnership due to the fact that Ferrellgas Partners has the obligation to absorb the losses of and the right to receive benefits from the operating partnership that are significant to the operating partnership and substantially all the assets and liabilities of Ferrellgas Partners consist of the operating partnership. The operating partnership includes the accounts of its wholly-owned subsidiaries. The general partner’s approximate 1% general partner interest in the operating partnership is accounted for as a noncontrolling interest.

#### *Prior period adjustment in E - Supplemental financial statement information note*

Ferrellgas previously disclosed the amount of cash paid for interest by Ferrellgas Partners was \$205.5 million in its Form 10-K for the year ended July 31, 2021. The amount disclosed should have been \$156.4 million, which is the same amount of cash paid for interest by the operating partnership. The error occurred due to the inclusion of non-cash interest and a mathematical error. This error had no impact on Ferrellgas’ consolidated financial statements or the computation of basic and diluted loss per Class A unit and management concluded that the error was not material. Based on this evaluation, the error did not require a restatement of the Form 10-K for the year ended July 31, 2021. The error was corrected in Ferrellgas Partners’ disclosure of certain cash flow and non-cash activities in Note E – Supplemental financial statement information.

#### The operating partnership

The consolidated financial statements present the consolidated financial position, results of operations and cash flows of Ferrellgas, L.P. and its subsidiaries after elimination of all intercompany accounts and transactions. Ferrellgas, L.P. consolidates the following wholly-owned entities: Bridger Logistics, LLC, Blue Rhino Global Sourcing, Inc., FNA Canada, Inc., Ferrellgas Finance Corp, and Ferrellgas Receivables,

LLC, a special purpose entity that had agreements with Ferrellgas, L.P. related to the terminated accounts receivable securitization facility.

## [Table of Contents](#)

### **(3) Fair value measurements**

Ferrellgas measures certain of its assets and liabilities at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants – in either the principal market or the most advantageous market. The principal market is the market with the greatest level of activity and volume for the asset or liability.

The common framework for measuring fair value utilizes a three-level hierarchy to prioritize the inputs used in the valuation techniques to derive fair values. The basis for fair value measurements for each level within the hierarchy is described below with Level 1 having the highest priority and Level 3 having the lowest.

- Level 1: Quoted prices in active markets for identical assets or liabilities.
- Level 2: Quoted prices in active markets for similar assets or liabilities; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are observable in active markets.
- Level 3: Valuations derived from valuation techniques in which one or more significant inputs are unobservable.

### **(4) Accounts receivable**

Accounts receivable are reported on the consolidated balance sheets at the gross outstanding amount adjusted for an allowance for expected credit losses. Accounts receivable that are acquired are initially recorded at fair value on the date of acquisition. Provisions for uncollectible accounts are established based upon our collection experience and the assessment of the collectability of specific amounts. Accounts receivable are written off in the period in which the receivable is deemed uncollectible.

### **(5) Inventories**

Inventories are stated at the lower of cost or net realizable value using weighted average cost and actual cost methods.

### **(6) Property, plant and equipment**

Property, plant and equipment are stated at cost less accumulated depreciation. Expenditures for maintenance and routine repairs are expensed as incurred. Ferrellgas capitalizes computer software, equipment replacement and betterment expenditures that upgrade, replace or completely rebuild major mechanical components and extend the original useful life of the equipment. Depreciation is calculated using the straight-line method based on the estimated useful lives of the assets ranging from 2 to 30 years. Depreciation expense on delivery vehicles Ferrellgas owns are classified within “Depreciation and amortization expense.” Long-lived assets are tested for impairment, using Ferrellgas’ best estimates based on reasonable and supportable assumptions and projections, whenever events or changes in circumstances indicate that the carrying amount of its assets or asset groups might not be recoverable. The recoverability tests for property, plant and equipment are performed at the asset group level that represents the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. The recoverability test is performed by determining the carrying value of the asset group and comparing it to the estimated expected undiscounted future cash flows of the asset group. The expected future cash flows are estimated based on management’s plans. If the carrying value exceeds the expected undiscounted future cash flows, an impairment loss is recognized for the difference between the estimated fair market value and the carrying value of the asset group.

[Table of Contents](#)

**(7) Goodwill**

Ferrellgas records goodwill as the excess of the cost of acquisitions over the fair value of the related net assets at the date of acquisition. Goodwill is tested for impairment annually during the second fiscal quarter, or more frequently if events or changes in circumstances indicate that it is more likely than not the fair value of a reporting unit is less than the carrying value. Ferrellgas has determined that it has one reporting unit for goodwill impairment testing purposes. As of July 31, 2022, this reporting unit contains goodwill that is subject to at least an annual assessment for impairment by applying a fair-value-based test. Under this test, the carrying value of the reporting unit is determined by assigning the assets and liabilities, including the existing goodwill and intangible assets, to the reporting unit as of the date of the evaluation on a specific identification basis. To the extent the reporting unit's carrying value exceeds its fair value, the reporting unit's goodwill is impaired. The amount of impairment would be equal to the lesser of the excess of reporting unit carrying value over its fair value and the reporting unit's recorded amount of goodwill. Ferrellgas completed its most recent annual goodwill impairment test on January 31, 2022 and did not incur an impairment loss.

**(8) Intangible assets**

Intangible assets with finite useful lives, consisting primarily of customer related assets and non-compete agreements, permits, favorable lease arrangements and patented technology are stated at cost, net of accumulated amortization calculated using the straight-line method over periods ranging from 2 to 15 years. When necessary, intangible assets' useful lives are revised and the impact on amortization reflected on a prospective basis. Trade names and trademarks have indefinite lives, are not amortized, and are stated at cost. Ferrellgas tests finite-lived intangible assets for impairment when events or changes in circumstances indicate that the carrying amount of these assets or asset groups might not be recoverable. Indefinite-lived intangible assets are tested for impairment annually on January 31 or more frequently if circumstances dictate. The recoverability tests for definite-lived intangible assets are performed at the asset group level that represents the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. The recoverability test is performed by determining the carrying value of the asset group and comparing it to the estimated expected undiscounted future cash flows of the asset group. The expected future cash flows are estimated based on management's plans. If the carrying value exceeds the expected undiscounted future cash flows, an impairment loss is recognized for the difference between the estimated fair market value and the carrying value of the asset group.

**(9) Derivative instruments and hedging activities**

*Commodity and Transportation Fuel Price Risk.*

Ferrellgas' overall objective for entering into commodity based derivative contracts, including commodity options and swaps, is to hedge a portion of its exposure to market fluctuations in propane, gasoline and diesel prices.

Ferrellgas' risk management activities primarily attempt to mitigate price risks related to the purchase, storage, transport and sale of propane generally in the contract and spot markets from major domestic energy companies on a short-term basis. Ferrellgas attempts to mitigate these price risks through the use of financial derivative instruments and forward propane purchase and sales contracts. Additionally, from time to time our risk management activities attempt to mitigate price risks related to the purchase of gasoline and diesel fuel for use in the transport of propane from retail fueling stations through the use of financial derivative instruments.

Ferrellgas' risk management strategy involves taking positions in the forward or financial markets that are equal and opposite to Ferrellgas' positions in the physical products market in order to minimize the risk of financial loss from an adverse price change. This risk management strategy is successful when Ferrellgas' gains or losses in the physical product markets are offset by its losses or gains in the forward or financial markets. The propane related financial derivatives are designated as cash flow hedges. The gasoline and diesel related financial derivatives have not historically been formally designated and documented as a hedge of exposure to fluctuations in the market price of fuel.

## [Table of Contents](#)

Ferrellgas' risk management activities may include the use of financial derivative instruments including, but not limited to, futures, swaps, and options to seek protection from adverse price movements and to minimize potential losses. We enter into these financial derivative instruments primarily with brokers who are clearing members with the Intercontinental Exchange or the Chicago Mercantile Exchange and, to a lesser extent, directly with third parties in the over-the-counter market. All of our financial derivative instruments are reported on the consolidated balance sheets at fair value.

Ferrellgas also enters into forward propane purchase and sales contracts with counterparties. These forward contracts qualify for the normal purchase normal sales exception within GAAP guidance and are therefore not recorded on Ferrellgas' consolidated financial statements until settled.

On the date that derivative contracts are entered into, other than those designated as normal purchases or normal sales, Ferrellgas makes a determination as to whether the derivative instrument qualifies for designation as a hedge. These financial instruments are formally designated as a hedge of a specific underlying exposure, and that designation as well as the risk management objectives and strategies for undertaking the hedge transaction are documented. Because of the high degree of correlation between the hedging instrument and the underlying exposure being hedged, fluctuations in the value of the derivative instrument are generally offset by changes in the anticipated cash flows of the underlying exposure being hedged. Since the fair value of these derivatives fluctuates over their contractual lives, their fair value amounts should not be viewed in isolation, but rather in relation to the anticipated cash flows of the underlying hedged transaction and the overall reduction in Ferrellgas' risk relating to adverse fluctuations in propane prices. Ferrellgas formally assesses, both at inception and at least quarterly thereafter, whether the financial instruments that are used in hedging transactions are effective at offsetting changes in the anticipated cash flows of the related underlying exposures. Any ineffective portion of a financial instrument's change in fair value is recognized in "Cost of sales - propane and other gas liquids sales" in the consolidated statements of operations. Financial instruments formally designated and documented as a hedge of a specific underlying exposure are recorded gross at fair value as either "Prepaid expenses and other current assets," "Other assets, net," "Other current liabilities," or "Other liabilities" on the consolidated balance sheets with changes in fair value reported in other comprehensive income.

Financial instruments not formally designated and documented as a hedge of a specific underlying exposure are recorded at fair value as "Prepaid expenses and other current assets," "Other assets, net," "Other current liabilities," or "Other liabilities" on the consolidated balance sheets with changes in fair value reported in "Operating expense – personnel, vehicle, plant and other" on the consolidated statements of operations.

### *Interest Rate Risk.*

Fluctuations in interest rates subject the operating partnership to interest rate risk. Decreases in interest rates increase the fair value of the operating partnership's fixed rate debt, while increases in interest rates subject the operating partnership to the risk of increased interest expense related to its variable rate borrowings.

The operating partnership may enter into fair value hedges to help reduce its fixed interest rate risk. Interest rate swaps may be used to hedge the exposure to changes in the fair value of fixed rate debt due to changes in interest rates. Fixed rate debt that has been designated as being hedged is adjusted to offset the change in the fair value of interest rate derivatives that are fair value hedges, which are classified as "Prepaid expenses and other current assets," "Other assets, net," "Other current liabilities" or as "Other liabilities" on the consolidated balance sheets. Changes in the fair value of fixed rate debt and any related fair value hedges are recognized as they occur in "Interest expense" on the consolidated statements of operations.

---

## [Table of Contents](#)

The operating partnership may enter into cash flow hedges to help reduce its variable interest rate risk. Interest rate swaps are used to hedge the risk associated with rising interest rates and their effect on forecasted interest payments related to variable rate borrowings. These interest rate swaps are designated as cash flow hedges. Thus, the effective portions of changes in the fair value of the hedges are recorded in “Prepaid expenses and other current assets,” “Other assets, net,” “Other current liabilities” or as “Other liabilities” with an offsetting entry to “Other comprehensive income” at interim periods and are subsequently recognized as interest expense in the consolidated statement of operations when the forecasted transaction impacts earnings. Changes in the fair value of any cash flow hedges that are considered ineffective are recognized as interest expense on the consolidated statements of operations as they occur.

### **(10) Leases**

In the first quarter of 2020, Ferrellgas adopted amended guidance for leases using the modified retrospective approach. Ferrellgas elected the short-term lease recognition exemption for all leases that qualify, meaning it does not recognize right-of-use assets (“ROU assets”) or lease liabilities for those leases. Ferrellgas also elected the practical expedient to not separate lease and non-lease components for its most significant leasing activity, which includes vehicle and real estate leases. Additionally, it elected the package of three practical expedients which allows entities to not reassess initial direct costs, lease classification for existing or expired leases, and lease definition for existing or expired contracts as of the effective date of August 1, 2019. Ferrellgas did not, however, elect the hindsight method practical expedient which would have allowed it to reassess lease terms and impairment.

Ferrellgas determines if an arrangement is a lease or contains a lease at inception. Ferrellgas leases certain transportation and computer equipment and real estate, predominantly through operating leases. Ferrellgas has an immaterial amount of leases in which it is the lessor. Operating lease rentals are expensed on a straight-line basis over the life of the lease beginning on the lease commencement date. Ferrellgas determines the lease term by assuming the exercise of renewal options that are reasonably certain. The lease term is used to determine whether a lease is finance or operating and is used to calculate rent expense. Additionally, the depreciable life of leased assets and leasehold improvements is limited by the expected lease term. Operating lease balances are classified as operating lease ROU assets, and current and long-term operating lease liabilities on Ferrellgas’ consolidated balance sheet. Finance leases are classified in “Other assets, net”, “Other current liabilities”, and “Other liabilities” on the consolidated balance sheet. Delivery vehicles and distribution technology under operating leases by Ferrellgas are classified within “Operating expense – equipment lease expense.” Delivery vehicles and distribution technology under finance leases are classified within “Depreciation and amortization expense.”

ROU assets represent the right to use an underlying asset for the lease term and lease liabilities represent the obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at the commencement date based on the present value of lease payments over the lease term. As most of Ferrellgas’ leases do not provide an implicit discount rate, Ferrellgas uses its incremental borrowing rate adjusted for the lease term to represent the rate it would have to pay to borrow on a collateralized basis based on the information available at the commencement date in determining the present value of lease payments. Lease terms may include options to extend or terminate the lease and Ferrellgas adjusts the life of the lease when it is reasonably certain that it will exercise an option.

### **(11) Revenue recognition**

Revenues from Ferrellgas’ propane operations and related equipment sales segment are recognized at the time product is delivered with payments generally due 30 days after receipt. Amounts are considered past due after 30 days. Accounts receivable allowances are determined based on management’s assessment of the creditworthiness of the customers and other collection actions. Ferrellgas offers “even pay” billing programs that can create customer deposits or advances. Revenue is recognized from these customer deposits or advances to customers at the time product is delivered. Other revenues, which include revenue from the sale of propane appliances and equipment is recognized at the time of delivery or installation. Shipping and handling revenues and expenses for sales of propane, appliances and equipment are recognized at the time of delivery or installation. Shipping and handling revenues are included in the price

of propane charged to customers, and are classified as revenue. Revenues from annually billed, non-refundable propane tank rentals are recognized in “Revenues: other” on a straight-line basis over one year.

[Table of Contents](#)

**(12) Shipping and handling expenses**

Shipping and handling expenses related to delivery personnel, vehicle repair and maintenance and general liability expenses are classified within “Operating expense – personnel, vehicle, plant and other” in the consolidated statements of operations. See [Note E – Supplemental financial statement information](#) – for the financial statement presentation of shipping and handling expenses.

**(13) Cost of sales**

“Cost of sales – propane and other gas liquids sales” includes all costs to acquire propane and other gas liquids, the costs of storing and transporting inventory prior to delivery to Ferrellgas’ customers, the results from risk management activities to hedge related price risk and the costs of materials related to the refurbishment of Ferrellgas’ portable propane tanks. “Cost of sales – other” primarily includes costs related to the sale of propane appliances and equipment.

**(14) Operating expense**

“Operating expense – personnel, vehicle, plant and other” primarily includes the personnel, vehicle, delivery, handling, plant, office, selling, marketing, credit and collections and other expenses.

**(15) General and administrative expense**

“General and administrative expense” primarily includes personnel and incentive expense related to executives and employees, as well as other overhead expenses related to centralized corporate functions.

**(16) Income taxes**

Ferrellgas Partners

Ferrellgas Partners is a publicly-traded master limited partnership with one subsidiary that is a taxable corporation. Partnerships are generally not subject to federal income tax, although publicly-traded partnerships are treated as corporations for federal income tax purposes and therefore subject to federal income tax unless a qualifying income test is satisfied. If this qualifying income test is satisfied, the publicly-traded partnership will be treated as a partnership for Federal income tax purposes. Based on Ferrellgas’ calculations, Ferrellgas Partners satisfies the qualifying income test. As a result, except for the taxable corporations, Ferrellgas Partners’ earnings or losses for Federal income tax purposes are included in the tax returns of the individual partners, Ferrellgas Partners’ unitholders. Accordingly, the consolidated financial statements of Ferrellgas Partners reflect federal income taxes related to the above mentioned taxable corporations and certain states that allow for income taxation of partnerships. Net earnings for financial statement purposes may differ significantly from taxable income reportable to Ferrellgas Partners unitholders as a result of differences between the tax basis and financial reporting basis of assets and liabilities, the taxable income allocation requirements under Ferrellgas Partners’ partnership agreement and differences between Ferrellgas Partners’ financial reporting fiscal year end and its calendar tax year end.

Income tax expense consisted of the following:

	For the year ended July 31,		
	2022	2021	2020
Current expense	\$ 974	\$ 739	\$ 297
Deferred expense	7	2	554
Income tax expense	<u>\$ 981</u>	<u>\$ 741</u>	<u>\$ 851</u>

Deferred taxes consisted of the following:

	July 31,	
	2022	2021
Deferred tax assets (included in Other assets, net)	\$ 4	\$ 5
Deferred tax liabilities (included in Other liabilities)	(9)	(3)
Net deferred tax (liability) asset	<u>\$ (5)</u>	<u>\$ 2</u>

[Table of Contents](#)

The operating partnership

The operating partnership is a limited partnership and owns three subsidiaries that are taxable corporations. As a result, except for the taxable corporations, the operating partnership's earnings or losses for federal income tax purposes are included in the tax returns of the individual partners. Accordingly, the consolidated financial statements of the operating partnership reflect federal income taxes related to the above mentioned taxable corporations and certain states that allow for income taxation of partnerships. Net earnings for financial statement purposes may differ significantly from taxable income reportable to partners as a result of differences between the tax basis and financial reporting basis of assets and liabilities, the taxable income allocation requirements under Ferrellgas, L.P.'s partnership agreement and differences between the operating partnership's financial reporting fiscal year end and limited partners' tax year end.

Income tax expense consisted of the following:

	For the year ended July 31,		
	2022	2021	2020
Current expense	\$ 969	\$ 725	\$ 248
Deferred expense	7	2	554
Income tax expense	<u>\$ 976</u>	<u>\$ 727</u>	<u>\$ 802</u>

Deferred taxes consisted of the following:

	July 31,	
	2022	2021
Deferred tax assets (included in Other assets, net)	\$ 4	\$ 5
Deferred tax liabilities (included in Other liabilities)	(9)	(3)
Net deferred tax (liability) asset	<u>\$ (5)</u>	<u>\$ 2</u>

**(17) Sales taxes**

Ferrellgas accounts for the collection and remittance of sales tax on a net tax basis. As a result, these amounts are not reflected in the consolidated statements of operations.

**(18) Net loss per Class A Unitholders' interest**

Net loss per Class A unitholders' interest for Ferrellgas Partners is computed by dividing "Net earnings (loss) attributable to Ferrellgas Partners, L.P.," after deducting the general partner's approximate 1% interest, by the weighted average number of outstanding Class A Units and the dilutive effect, if any, of outstanding unit options. See [Note R – Net loss per Class A Unitholders' interest](#) – for further discussion about these calculations.

**(19) Loss contingencies**

In the normal course of business, Ferrellgas is involved in various claims and legal proceedings. A liability is recorded for such matters when it is probable that a loss has been incurred and the amounts can be reasonably estimated. When only a range of possible loss can be established, the most probable amount in the range is accrued. If no amount within this range is a better estimate than any other amount within the range, the minimum amount in the range is accrued. Legal costs associated with loss contingencies are expensed as incurred.

## [Table of Contents](#)

### **(20) Class B Units Valuation**

The Class B Units are classified in equity and are an equity host instrument. Based on Ferrellgas' determination that the Class B Units are an equity host, Ferrellgas determined that all features of the Class B Units were either clearly and closely related to the equity host or did not meet the definition of a derivative, and therefore did not require bifurcation as a derivative. The Class B Units were recognized at their fair value at issuance. The fair value of the Class B Units was estimated based on a valuation model, including the use of Monte Carlo simulations of operating results and available cash flow for a Class B paydown. The significant assumptions in the forecasted operating results and forecasted available cash flow for Class B paydown included forecasted adjusted EBITDA, maintenance and growth capital expenditures, and debt service charges. The significant assumptions used in the Monte Carlo simulations included the cash flow volatility, equity volatility, forecasted available cash flow for Class B paydown, and the discount rates. See [Note J – Equity \(Deficit\)](#) for further discussion.

### **(21) New accounting standards**

#### Recently adopted accounting pronouncements

No new accounting standards were adopted during the year ended July 31, 2022.

#### Recently issued accounting pronouncements not yet adopted

There were no recently issued accounting standards that could have a material impact to our financial position, results of operations, cash flows, or notes to the consolidated financial statements upon their adoption.

## **C. Acquisitions and dispositions**

### *Acquisitions*

Business combinations are accounted for under the acquisition method of accounting and the assets acquired and liabilities assumed are recorded at their estimated fair market values as of the acquisition dates. The results of operations are included in the consolidated statements of operations from the date of acquisition. The pro forma effect of these transactions was not material to Ferrellgas' consolidated balance sheets or results of operations.

#### *Propane operations and related equipment sales*

During fiscal 2022, Ferrellgas acquired propane distribution assets, primarily of two independent distributors and a third-party distributor, with an aggregate value of \$21.7 million in the following transactions:

- North Cascades Propane Service, based in Washington, acquired in August 2021;
- Starlite Propane Gas Corporation, based in New York, acquired in August 2021; and
- Renovex, Inc., based in Pennsylvania, acquired in June 2022.

During fiscal 2021, Ferrellgas acquired propane distribution assets, primarily of an independent distributor, with an aggregate value of \$7.9 million in the following transaction:

- Proflame, Inc., based in New York, acquired in July 2021.

During fiscal 2020, Ferrellgas acquired propane distribution assets, primarily of independent distributors, with an aggregate value of \$11.2 million in the following transactions:

- Golden State Propane, Inc., based in California, acquired in August 2019;
- C.F. Van Duzer Gas Services, Inc., based in New York, acquired in October 2019; and
- Lee Propane of Pennington Gap, Inc., based in Virginia, acquired in June 2020.

## [Table of Contents](#)

These acquisitions were funded as follows on their dates of acquisition:

	For the year ended July 31,		
	2022	2021	2020
Cash payments, net of cash acquired	\$19,679	\$ 6,567	\$10,195
Issuance of liabilities and other costs and considerations	2,022	1,344	975
Aggregate fair value of transactions	<u>\$21,701</u>	<u>\$ 7,911</u>	<u>\$11,170</u>

The aggregate fair values, for the acquisitions in propane operations and related equipment sales reporting segment, were allocated as follows, including any adjustments identified during the measurement period:

	For the year ended July 31,		
	2022	2021	2020
Customer tanks, buildings, land and other	\$ 6,564	\$ 2,607	\$ 6,598
Goodwill	10,153	—	—
Customer lists	4,259	4,973	738
Non-compete agreements	725	331	3,834
Aggregate fair value of net assets acquired	<u>\$21,701</u>	<u>\$ 7,911</u>	<u>\$11,170</u>

The estimated fair values and useful lives of assets acquired during fiscal 2022 are based on a preliminary valuation and are subject to final valuation adjustments. Ferrellgas intends to continue its analysis of the net assets of these transactions to determine the final allocation of the total purchase price to the various assets and liabilities acquired. The estimated fair values and useful lives of assets acquired during fiscal 2021 and 2020 are based on internal valuations and included only minor adjustments during the 12-month period after the date of acquisition. Due to the immateriality of these adjustments, Ferrellgas did not retrospectively adjust the consolidated statements of operations for those measurement period adjustments.

See [Note S – Subsequent events](#) for information on an acquisition made subsequent to July 31, 2022.

### ***Dispositions***

Asset sales and disposals consist of:

	For the year ended July 31,		
	2022	2021	2020
Gain (loss) on sale of:			
Other	\$ 6,618	\$ (1,831)	\$ (7,924)
Gain (loss) on asset sales and disposals	<u>\$ 6,618</u>	<u>\$ (1,831)</u>	<u>\$ (7,924)</u>

### **D. Quarterly distribution of available cash**

Ferrellgas is required by its partnership agreements to make quarterly cash distributions of all of its “available cash.” Available cash is defined in its partnership agreements as, generally, the sum of its consolidated cash receipts less consolidated cash disbursements and net changes in reserves established by the general partner for future requirements.

#### Ferrellgas Partners

Reserves may be established in order to provide for the proper conduct of Ferrellgas Partners’ business, to comply with any contractual obligations and restrictions, and to provide funds for distributions with respect to any one or more of the next four fiscal quarters. To the extent Ferrellgas Partners has available cash for a particular fiscal quarter, distributions of such cash are required to be made within 45 days after the end of such fiscal quarter to holders of record on the applicable record date, subject to the terms and preferences of the Class B Units. To the extent distributions are made in respect of the Class A Units, pro rata distributions are also made to the general partner. See [Note J – Equity \(Deficit\)](#) for further discussion.

## [Table of Contents](#)

### The operating partnership

Reserves may be established in order to provide for the proper conduct of the operating partnership's business, to comply with contractual obligations and restrictions, including the restrictions on distributions in the indentures governing the \$650.0 million aggregate principal amount of 5.375% senior notes due 2026 (the "2026 Notes") and the \$825.0 million aggregate principal amount of 5.875% senior notes due 2029 (the "2029 Notes"), the credit agreement entered into on March 30, 2021 (the "Effective Date") by the operating partnership, the general partner and certain of the operating partnership's subsidiaries (the "Credit Agreement") and the First Amendment to the Fifth Amended and Restated Agreement of Limited Partnership of Ferrellgas, L.P., executed on the Effective Date (the "OpCo LPA Amendment"), and to provide funds for distributions with respect to any one or more of the next four fiscal quarters. To the extent the operating partnership has available cash for a particular fiscal quarter, distributions of such cash are required to be made within 45 days after the end of such fiscal quarter, subject to the terms of the OpCo LPA Amendment.

While any Preferred Units remain outstanding, after giving effect to required payments and distributions in respect of the Preferred Units, distributions by the operating partnership of its available cash will be made solely to Ferrellgas Partners. If and when there are no longer any Preferred Units outstanding, distributions by the operating partnership of its available cash will be made approximately 99% to Ferrellgas Partners and approximately 1% to the general partner.

## **E. Supplemental financial statement information**

### *Inventories*

Inventories consist of the following:

	<b>July 31, 2022</b>	<b>July 31, 2021</b>
Propane gas and related products	\$ 96,679	\$ 75,848
Appliances, parts and supplies, and other	18,508	12,531
<b>Inventories</b>	<b>\$ 115,187</b>	<b>\$ 88,379</b>

In addition to inventories on hand, Ferrellgas enters into contracts to take delivery of propane for supply procurement purposes with terms that generally do not exceed 36 months. Most of these contracts call for payment based on market prices at the date of delivery. As of July 31, 2022, Ferrellgas had committed, for supply procurement purposes, to take delivery of approximately 5.3 million gallons of propane at fixed prices.

### *Property, plant and equipment, net*

Property, plant and equipment, net consist of the following:

	<b>Estimated useful lives</b>	<b>July 31, 2022</b>	<b>July 31, 2021</b>
Land	Indefinite	\$ 41,814	\$ 40,346
Land improvements	2-20	15,560	15,128
Buildings and improvements	20	88,970	88,620
Vehicles, including transport trailers	8-20	117,746	110,517
Bulk equipment and district facilities	5-30	115,927	110,983
Tanks, cylinders and customer equipment	2-30	825,361	786,912
Computer and office equipment	2-5	104,364	107,272
Construction in progress	n/a	7,694	8,478
		<b>1,317,436</b>	<b>1,268,256</b>
Less: accumulated depreciation		714,288	686,138
<b>Property, plant and equipment, net</b>		<b>\$ 603,148</b>	<b>\$ 582,118</b>

Depreciation expense totaled \$71.0 million, \$64.1 million and \$64.5 million for fiscal 2022, 2021 and 2020, respectively.

Other current liabilities	\$ 218,333	\$ 245,782

### ***Shipping and handling expenses***

Shipping and handling expenses are classified in the following consolidated statements of operations line items:

	<b>For the year ended July 31,</b>		
	<b>2022</b>	<b>2021</b>	<b>2020</b>
Operating expense - personnel, vehicle, plant and other	\$244,022	\$217,292	\$219,598
Depreciation and amortization expense	14,370	13,691	9,857
Operating expense - equipment lease expense	18,874	22,609	32,518
	<b>\$277,266</b>	<b>\$253,592</b>	<b>\$261,973</b>

### ***Cash, cash equivalents and restricted cash***

Ferrellgas maintains its cash and cash equivalents in various bank accounts that, at times, may exceed federally insured limits. Ferrellgas' cash and cash equivalent accounts have been placed with high credit quality financial institutions. For purposes of the consolidated statements of cash flows, Ferrellgas considers cash equivalents to include all highly liquid debt instruments purchased with an original maturity of three months or less.

### Ferrellgas Partners

Cash, cash equivalents and restricted cash consist of the following:

	<b>July 31, 2022</b>	<b>July 31, 2021</b>
Cash and cash equivalents	\$ 147,529	\$ 270,452
Restricted cash <sup>(1)</sup>	11,208	11,500
Cash, cash equivalents and restricted cash	<b>\$ 158,737</b>	<b>\$ 281,952</b>

- (1) As of July 31, 2022 and 2021, respectively, restricted cash consists of an \$11.2 million and \$11.5 million cash deposit made with the administrative agent under the operating partnership's senior secured credit facility that was terminated in April 2020, which may be used by the administrative agent to pay contingent obligations arising under the financing agreement that governed the terminated senior secured credit facility. For additional discussion, see [Note H – Debt](#).

Changes in the carrying amount of goodwill are as follows:

	<b>Propane operations and related equipment sales</b>
<b>Balance July 31, 2020</b>	\$ 247,195
Other	(249)
<b>Balance July 31, 2021</b>	246,946
Acquisitions	10,153
<b>Balance July 31, 2022</b>	<b>\$ 257,099</b>

Customer related intangible assets have estimated lives of 15 years and non-compete agreements and other intangible assets have estimated lives ranging from 5 to 10 years. Ferrellgas intends to utilize all acquired trademarks and trade names and does not believe there are any legal, regulatory, contractual, competitive, economical or other factors that would limit their useful lives. Therefore, trademarks and trade names have indefinite useful lives. Customer related intangibles carry a weighted average life of 15 years, and non-compete agreements and other intangibles carry a weighted average life of 9 years.

Aggregate amortization expense related to intangible assets, net:

<b>For the year ended July 31,</b>	
2022	\$ 8,089
2021	8,742
2020	9,079

Unamortized debt issuance and other costs	(27,731)	(32,322)
Less: current portion of long-term debt	1,792	1,670
<b>Long-term debt</b>	<u>\$1,450,016</u>	<u>\$1,444,890</u>

- (1) On the Effective Date, two wholly-owned subsidiaries of the operating partnership (referred to herein as the “Escrow Issuers”) issued the 2026 Notes and the 2029 Notes. On the Effective Date and immediately after the issuance of the 2026 Notes and 2029 Notes by the Escrow Issuers, (i) the Escrow Issuers were merged into the operating partnership and Ferrellgas Finance Corp., respectively, and the operating partnership and Ferrellgas Finance Corp. assumed the obligations of the Escrow Issuers as co-issuers of the 2026 Notes and the 2029 Notes, and (ii) the general partner and certain subsidiaries of the operating partnership guaranteed the 2026 Notes and the 2029 Notes. The 2026 Notes and 2029 Notes bear interest from the date of issuance, payable semi-annually in arrears on October 1 and April 1 of each year. The 2026 Notes will mature on April 1, 2026, and the 2029 Notes will mature on April 1, 2029. See “–Senior unsecured notes” below for additional discussion.

*Senior secured revolving credit facility*

On the Effective Date, the operating partnership, the general partner and certain of the operating partnership’s subsidiaries entered into the Credit Agreement, which provides for the four-year revolving Credit Facility in an aggregate principal amount of up to \$350.0 million. The Credit Agreement includes a sublimit not to exceed \$200.0 million for the issuance of letters of credit.

All borrowings under the Credit Facility are guaranteed by the general partner and the direct and indirect subsidiaries of the operating partnership (other than Ferrellgas Finance Corp. and Ferrellgas Receivables, LLC) and a limited-recourse guaranty from Ferrellgas Partners (limited to its equity interests in the operating partnership). Additionally, all borrowings are secured, on a first priority basis, by substantially all of the assets of the operating partnership and its subsidiaries and all of the equity interests in the operating partnership held by the general partner and Ferrellgas Partners.

Availability under the Credit Facility is, at any time, an amount equal to (a) the lesser of the revolving commitment and the Borrowing Base (as defined below) minus (b) the sum of the aggregate outstanding amount of borrowings under the Credit Facility plus the undrawn amount of outstanding letters of credit under the Credit Facility plus unreimbursed drawings in respect of letters of credit (unless otherwise converted into revolving loans). The "Borrowing Base" equals the sum of: (a) \$200.0 million, plus (b) 80% of the eligible accounts receivable of the operating partnership and its subsidiaries, plus (c) 70% of the eligible propane inventory of the operating partnership and its subsidiaries, valued at weighted average cost, less (d) certain reserves, as determined and subject to certain modifications by the administrative agent in its permitted discretion.

---

## [Table of Contents](#)

Amounts borrowed under the Credit Facility bear interest, at the operating partnership's option, at either (a) for base rate loans, (i) a base rate determined by reference to the highest of (A) the rate of interest last quoted by *The Wall Street Journal* in the U.S. as the prime rate in effect, (B) the NYFRB Rate from time to time plus 0.50% per annum and (C) the Adjusted LIBO Rate for a one-month interest period plus 1.00% per annum plus (ii) a margin of 1.50% to 2.00% per annum depending on total net leverage or (b) for Eurodollar rate loans, (i) a rate determined by reference to the Adjusted LIBO Rate plus (ii) a margin of 2.50% to 3.00% per annum depending on total net leverage. The operating partnership will be required to pay an undrawn fee to the lenders on the average daily unused amount of the Credit Facility at a rate of 0.375% to 0.50% per annum depending on total net leverage.

The Credit Agreement contains customary representations, warranties, covenants and events of default.

The financial covenants in the Credit Agreement require the operating partnership to maintain: (1) a minimum interest coverage ratio (defined generally as the ratio of adjusted EBITDA to cash interest expense) of 2.50 to 1.00, (2) a maximum secured leverage ratio (defined generally as the ratio of total first priority secured indebtedness to adjusted EBITDA) of 2.50 to 1.00, and (3) a maximum total net leverage ratio (defined generally as the ratio of total indebtedness (net of unrestricted cash, subject to certain limits) to adjusted EBITDA) of 5.50 to 1.00 initially. The maximum total net leverage ratio adjusts to 5.25 to 1.00 starting with the quarter ending April 30, 2022, 5.00 to 1.00 starting with the quarter ending October 31, 2022, and 4.75 to 1.00 starting with the quarter ending April 30, 2023.

In addition to the financial covenants, the Credit Agreement includes covenants that may (or if not met will) restrict the ability of the operating partnership to, among other things: incur indebtedness or liens; effect certain fundamental changes, including mergers, consolidations, liquidations, dissolutions and changes in line of business; make certain restricted payments, including distributions to holders of Preferred Units, Ferrellgas Partners and the general partner and redemptions of Preferred Units; make investments, loans or advances; dispose of assets; effect sale and leaseback transactions; enter into swap agreements; make optional payments and modifications of subordinated and other debt instruments; enter into transactions with affiliates; agree to negative pledge clauses and burdensome agreements; and effect amendments to organizational documents.

In particular, under these covenants, subject to certain exceptions and additional requirements, the operating partnership is permitted to make cash distributions to holders of Preferred Units, Ferrellgas Partners and the general partner, redemptions of Preferred Units and other restricted payments (i) only in limited amounts specified in the Credit Agreement and (ii) only if availability under the Credit Facility exceeds the greater of \$50.0 million and 15% of the Borrowing Base and the operating partnership's total net leverage ratio is not greater than 5.0 to 1.0 (or 4.75 to 1.0 starting on April 30, 2023). As of July 31, 2022, the operating partnership is in compliance with all of its debt covenants.

On June 11, 2021, the operating partnership, the general partner and certain of the operating partnership's subsidiaries entered into a First Amendment to the Credit Agreement (the "Credit Agreement Amendment"), with an effective date of April 30, 2021. Among other matters, the Credit Agreement Amendment amended the minimum-interest-coverage-ratio covenant described above by (i) waiving compliance with the covenant for the trailing four fiscal quarters ended April 30, 2021 and (ii) annualizing the cash interest expense component of the covenant for (a) the fiscal quarter ended on July 31, 2021, (b) the two fiscal quarters ending October 31, 2021, and (c) the three fiscal quarters ending January 31, 2022.

## [Table of Contents](#)

### *Senior unsecured notes*

As discussed above, on the Effective Date, (i) the Escrow Issuers issued \$650.0 million aggregate principal amount of 2026 Notes and \$825.0 million aggregate principal amount of 2029 Notes, and (ii) the operating partnership and Ferrellgas Finance Corp. assumed the obligations of the Escrow Issuers as co-issuers of the 2026 Notes and the 2029 Notes upon the merger of the Escrow Issuers into the operating partnership and Ferrellgas Finance Corp., respectively. The operating partnership received aggregate net proceeds from the issuance and sale of the 2026 Notes and the 2029 Notes of approximately \$1,441.2 million, after deducting the initial purchasers' discount and estimated offering expenses. The operating partnership used such net proceeds, together with the net proceeds of the issuance and sale of the Preferred Units, as discussed in Note I – Preferred units, and cash on hand, (i) to redeem (or satisfy and discharge the indentures governing and subsequently redeem) all of the issued and outstanding 2021 Notes, 2022 Notes, 2023 Notes and 2025 Notes, and (ii) to repay all outstanding obligations under the Accounts Receivable Facility in connection with the termination of that facility, as described in Note F – Accounts and notes receivable, net.

The 2026 Notes and 2029 Notes are the senior unsecured obligations of the operating partnership and Ferrellgas Finance Corp. and are unconditionally guaranteed, jointly and severally, on a senior unsecured basis by the general partner and all domestic subsidiaries of the operating partnership other than Ferrellgas Finance Corp. and Ferrellgas Receivables, LLC.

The 2026 Notes may be redeemed prior to April 1, 2023 and the 2029 Notes may be redeemed prior to April 1, 2024 at the issuers' option, in whole or in part, at a redemption price of par plus the applicable make-whole premium and accrued and unpaid interest. On and after April 1, 2023 and April 1, 2024, the 2026 Notes and the 2029 Notes, respectively, may be redeemed at the issuers' option, in whole or in part, at the redemption prices set forth in the respective indenture governing such notes, plus accrued and unpaid interest. Beginning on April 1, 2025 and April 1, 2026, the 2026 Notes and 2029 Notes, respectively, may be redeemed at par plus accrued and unpaid interest.

The indentures governing the 2026 Notes and 2029 Notes contain customary affirmative and negative covenants restricting, among other things, the ability of the operating partnership and its restricted subsidiaries to: incur additional indebtedness and guarantee indebtedness; pay dividends or make other distributions (including distributions to holders of Preferred Units, Ferrellgas Partners and the general partner) or repurchase or redeem their equity interests (including redemptions of Preferred Units); repurchase or redeem certain debt; make certain other restricted payments or investments; sell assets, incur liens, enter into transactions with affiliates, enter into agreements restricting the operating partnership's subsidiaries' ability to pay dividends; and consolidate, merge or sell all or substantially all of their assets. The indentures also restrict the ability of the general partner to engage in certain activities.

In particular, under these covenants, subject to certain exceptions and additional requirements, the operating partnership is permitted to make cash distributions to holders of Preferred Units, Ferrellgas Partners and the general partner, redemptions of Preferred Units and other restricted payments (i) only in limited amounts specified in the indentures and (ii) only if the operating partnership's net leverage ratio (defined generally to mean the ratio of consolidated total net debt to trailing four quarters consolidated EBITDA, both as adjusted for certain, specified items) is not greater than 5.0 to 1.0, on a pro forma basis giving effect to the restricted payment and, if applicable, certain other specified events. Further, if the operating partnership's consolidated fixed charge coverage ratio (defined generally to mean the ratio of trailing four quarters consolidated EBITDA to consolidated fixed charges, both as adjusted for certain, specified items) is equal to or less than 1.75 to 1.00 (on a pro forma basis giving effect to the restricted payment and, if applicable, certain other specified events), the amount of distributions and other restricted payments the operating partnership is permitted to make under the indentures is further limited. As of July 31, 2022, the operating partnership is in compliance with all of its debt covenants.

### *Loss on extinguishment of debt*

Proceeds from the issuance of the Preferred Units, the 2026 Notes and the 2029 Notes were used to redeem (or satisfy and discharge and subsequently redeem) all of the operating partnership's previously

issued and outstanding notes.

---

[Table of Contents](#)

Ferrellgas Partners

The Class B Units were issued to holders of the Ferrellgas Partners Notes in satisfaction of their claims in respect of the Ferrellgas Partners Notes. The effects of these transactions resulted in a loss on extinguishment of debt, with the components presented below:

	<u>For the year ended July 31, 2021</u>
Payment of redemption premium on debt extinguishment	\$ 83,072
Fair value of Class B units in excess of current value	(5,101)
Make-whole payments	1,964
Unamortized deferred financing costs	24,899
Total loss on extinguishment of debt	\$ 104,834

The operating partnership

The effects of these transactions resulted in a loss on extinguishment of debt, with the components presented below:

	<u>For the year ended July 31, 2021</u>
Payment of redemption premium on debt extinguishment	\$ 83,072
Unamortized deferred financing costs	24,899
Total loss on extinguishment of debt	\$ 107,971

*Scheduled annual principal payments*

The scheduled annual principal payments on long-term debt are as follows:

<u>Payment due by fiscal year</u>	<u>Scheduled principal payments</u>
2023	\$ 1,517
2024	947
2025	817
2026	650,435
2027	100
Thereafter	826,188
<b>Total</b>	<b>\$ 1,480,004</b>

Letters of credit outstanding at July 31, 2022 and 2021 totaled \$87.6 million and \$107.7 million, respectively, and were used to secure insurance arrangements, product purchases and commodity hedges. At July 31, 2022, Ferrellgas had available borrowing capacity under its Credit Facility of \$253.5 million and during fiscal 2022 incurred undrawn and commitment fees of \$1.1 million. Ferrellgas incurred commitment fees of \$0.1 million and \$0.5 million in fiscal 2021 and 2020, respectively.

## I. Preferred units

On the Effective Date, pursuant to the Investment Agreement, the operating partnership issued an aggregate of 700,000 Preferred Units, having an aggregate initial liquidation preference of \$700.0 million. The purchase price per Preferred Unit was \$1,000 less a 3.0% purchase price discount, for an aggregate purchase price of \$679.0 million. The operating partnership received net proceeds from the issuance and sale of the Preferred Units of approximately \$651.3 million, after deduction of the purchase price discount and certain expenses. As of July 31, 2022 and 2021, these 700,000 Preferred Units are classified in the “Mezzanine Equity” section of the consolidated balance sheets.

---

## [Table of Contents](#)

The operating partnership used such net proceeds, together with the net proceeds of the issuance and sale of the 2026 Notes and the 2029 Notes and cash on hand, (i) to redeem (or satisfy and discharge the indentures governing and subsequently redeem) all of the issued and outstanding 2021 Notes, 2022 Notes, 2023 Notes and 2025 Notes, as described in Note H - Debt, and (ii) to repay all outstanding obligations under the Accounts Receivable Facility in connection with the termination of that facility, as described in Note F – Accounts and notes receivable, net.

Redemption of the Preferred Units in the near term is not probable because of the high redemption price in the first three to four years. As described in greater detail under “Issuer Redemption Right” below, the Redemption Price for the Preferred Units is based upon the greater of the amount that would result in a 1.47x MOIC (defined below) and the amount that would result in a 12.25% internal rate of return. If the Preferred Units were redeemed during the first three to four years after issuance, the 1.47x MOIC would require a large premium payment and that large premium payment would result in an internal rate of return far in excess of the minimum 12.25%. Consequently, it is unlikely that Ferrellgas would be able to achieve any savings in its cost of capital by redeeming the Preferred Units during the first three to four years after issuance.

“MOIC” means, with respect to a Preferred Unit, a multiple on invested capital equal to the quotient determined by dividing (A) the sum of (x) the aggregate amount of all distributions made in cash with respect to such Preferred Unit prior to the applicable date of determination, with certain exclusions, plus (y) each Redemption Price paid in cash in respect of such Preferred Unit, on or prior to the applicable date of determination, by (B) the Purchase Price (defined below) of such Preferred Unit.

The preferences, rights, privileges and other terms of the Preferred Units are set forth in the OpCo LPA Amendment entered into by the general partner on the Effective Date (along with the Amended OpCo LPA) and are described below.

### *Issuer Redemption Right*

The operating partnership has the right to redeem all or a portion of the Preferred Units for cash, pro rata and at any time and from time to time, including in connection with a Change of Control (as defined in the OpCo LPA Amendment), at an amount per Preferred Unit (the “Redemption Price”) equal to, without duplication, the sum of (a) the greater of (i) the amount necessary to result in a MOIC (as defined above) of 1.47x in respect of the purchase price, before discount, of such Preferred Unit, which is \$1,000 per Preferred Unit (the “Purchase Price”), and (ii) the amount necessary to result in the applicable internal rate of return equal to 12.25%, which is increased by 150 basis points if the operating partnership has elected to pay more than four Quarterly Distributions (as defined below) in PIK Units (as defined below) and (b) the accumulated but unpaid Quarterly Distributions to the date of redemption, if any. A partial redemption of the Preferred Units is permitted only in the event the aggregate amount to be paid in respect of all Preferred Units included in such partial redemption is at least \$25.0 million.

### *Investor Redemption Right*

In the event that (i) any Class B Units are outstanding, or (ii) (x) no Class B Units are outstanding and (y) no more than 233,300 Preferred Units are outstanding, at any time on and after the tenth anniversary of the Effective Date the Required Holders may elect, by delivery of written notice, to have the operating partnership fully redeem each remaining outstanding Preferred Unit for an amount in cash equal to the Redemption Price. “Required Holders” refers to both (i) holders owning at least 33.3% of the total Preferred Units outstanding at any time and (ii) certain initial affiliated purchasers, for so long as such initial affiliated purchasers collectively own at least 25% of the Preferred Units outstanding at such time.

In the event that (i) no Class B Units are outstanding and (ii) more than 233,300 Preferred Units are outstanding, the Required Holders will have the right to trigger a sale of the operating partnership after the tenth anniversary of the Effective Date. If the operating partnership fails to consummate a sale that would pay the Redemption Price in full within 180 days of written notice requiring such sale, the Required Holders will have the right to appoint a majority of the members of the Board of Directors of the general partner and initiate a sale of the operating partnership.

## [Table of Contents](#)

### *Change of Control*

Upon a Change of Control (as defined in the OpCo LPA Amendment), the Required Holders will have the option to require the redemption of all or a portion of the Preferred Units in cash in an amount equal to the Redemption Price; provided, that such Redemption Price shall not be payable unless the operating partnership shall have first made any required change of control offer pursuant to the indentures governing the 2026 Notes and the 2029 Notes and purchased all such 2026 Notes and 2029 Notes tendered pursuant to such offer (unless otherwise waived by such noteholders); provided, further that the Redemption Price shall be paid immediately following the purchase of such tendered Notes (if any).

### *Fair Value of Embedded Derivatives*

Ferrellgas identified the investor redemption right and the change in control option as embedded derivatives that require bifurcation as they are not clearly and closely related to the debt host contract and has concluded that the fair values at issuance and at July 31, 2022 and 2021, are immaterial to the financial statements.

### *Distributions*

Pursuant to the OpCo LPA Amendment, the operating partnership is required to pay to the holders of each Preferred Unit a cumulative, quarterly distribution (the "Quarterly Distribution") at the Distribution Rate (as defined below) on the Purchase Price.

"Distribution Rate" means, for the first five years after March 30, 2021, a rate per annum equal to 8.956%, with certain increases in the Distribution Rate on each of the 5<sup>th</sup>, 6<sup>th</sup> and 7<sup>th</sup> anniversaries of March 30, 2021, subject to a maximum rate of 11.125% and certain other adjustments and exceptions.

The Quarterly Distribution may be paid in cash or, at the election of the operating partnership, "in kind" through the issuance of additional Preferred Units ("PIK Units") at the quarterly Distribution Rate plus an applicable premium that escalates each year from 75 bps to 300 bps so long as the Preferred Units remain outstanding. In the event the operating partnership fails to make any Quarterly Distribution in cash, such Quarterly Distribution will automatically be paid in PIK Units.

The Distribution Rate on the Preferred Units will increase upon violation of certain protective provisions for the benefit of Preferred Unit holders notwithstanding the cap mentioned above.

Quarterly distributions aggregating to \$63.4 million were paid in cash to holders of Preferred Units during the year ended July 31, 2022. This included \$0.9 million of Additional Amounts (as defined below) payable to certain holders of Preferred Units related to the side letters outlined in the OpCo LPA Amendment. As of July 31, 2022, the Quarterly Distribution accrued was \$17.5 million with \$15.4 million paid in cash to holders of Preferred Units on August 15, 2022. The remaining Quarterly Distribution accrual of \$2.1 million represents Additional Amounts payable to certain holders of Preferred Units pursuant to side letters. As of April 30, 2021, the Quarterly Distribution accrued was \$8.0 million, reflecting a prorated distribution amount for the period from the Effective Date to April 30, and the Quarterly Distribution in that amount was paid in cash to holders of Preferred Units on May 17, 2021. As of July 31, 2021, the aggregate Quarterly Distribution and Additional Amounts accrued was \$16.0 million, and \$15.7 million of that amount was paid in cash to holders of Preferred Units on August 16, 2021.

## [Table of Contents](#)

### *Tax Distributions*

For any quarter in which the operating partnership makes a Quarterly Distribution in PIK Units in lieu of cash, it will be required to make a subsequent cash tax distribution for such quarter in an amount equal to the (i) the lesser of (x) 25% and (y) the highest combined federal, state and local tax rate applicable for corporations organized in New York, multiplied by (ii) the excess (if any) of (A) one-fourth (1/4th) of the estimated taxable income to be allocated to the holders of Preferred Units for the year in which the Quarterly Tax Payment Date (which refers to certain specified dates that next follow a Quarterly Distribution date on which PIK Units were issued) occurs, over (B) any cash paid on the Quarterly Distribution date immediately preceding the Quarterly Tax Payment Date on which a quarterly tax amount would otherwise be paid (such amount, the "Tax Distribution"). Tax Distributions are treated as advances against, and reduce, future cash distributions for any reason, including payments in redemption of Preferred Units or PIK Units, or payments to the holders in their capacity as such pursuant to any side letter or other agreement.

### *Additional Amounts for Certain Purchasers*

The operating partnership is required to pay certain additional amounts of cash (the "Additional Amounts") as necessary to certain holders of Preferred Units that hold their interests through a "blocker," which is a U.S. entity that is owned and organized by certain original purchasers of Preferred Units who are non-U.S. persons or tax exempt for U.S. tax purposes and is treated as a corporation for U.S. tax purposes. Only certain original purchasers of Preferred Units who hold their Preferred Units through such blockers are, and none of their transferees is, entitled to Additional Amounts. Additional Amounts are capped at the lesser of: (a) the product of 20% multiplied by taxable income allocated to a "blocker" (as defined) divided by 0.8, and (b) the actual taxes payable by the "blocker" as a result of holding Senior Preferred Units.

### *Board Rights*

For so long as at least 140,000 Preferred Units remain outstanding, holders of the Preferred Units have the right to designate one director to the Board of the general partner, subject to approval by the general partner.

### *Protective Provisions*

The OpCo LPA Amendment and the Amended Ferrellgas Partners LPA include, among other things, certain covenants for the benefit of holders of Preferred Units applicable to the operating partnership and, in certain instances, Ferrellgas Partners, for so long as at least \$35,000,000 of Preferred Units and PIK Units remain outstanding. These covenants include, among other things, limitations on (i) effecting a Change of Control, (ii) amending organizational documents, (iii) issuing certain equity securities, (iv) issuing Preferred Units, (v) filing for bankruptcy, (vi) non-ordinary course investments, and (vii) incurring certain levels of indebtedness.

### *Ranking and Liquidation Preference*

The Preferred Units rank senior to any other class or series of equity interests of the operating partnership (including the partnership interests held by Ferrellgas Partners and the general partner). Upon a liquidation, dissolution or winding up of the operating partnership, each holder of Preferred Units will be entitled to receive, prior and in preference to any distribution of any assets of the operating partnership to the holders of any other class or series of equity interests in the operating partnership (including Ferrellgas Partners and the general partner), an amount per Preferred Unit equal to the Redemption Price.

## [Table of Contents](#)

### *Restrictions on Cash Distributions to Ferrellgas Partners and the General Partner*

The operating partnership is permitted to make distributions of Available Cash (as defined in the Amended OpCo LPA) to Ferrellgas Partners only if (i) the operating partnership has made all required Quarterly Distributions (in cash or PIK Units), Tax Distributions and payments of Additional Amounts, (ii) the operating partnership has redeemed all PIK Units issued, (iii) the operating partnership's consolidated net leverage (defined generally to mean the ratio of the operating partnership's consolidated total net debt (including the total redemption price of all outstanding Preferred Units and PIK Units but excluding certain letters of credit and capital lease obligations) as of each Quarterly Distribution Date to trailing four quarters consolidated EBITDA, both as adjusted for certain, specified items) is below 7.25x through May 15, 2022 and 7.00x thereafter, net of cash, immediately before and after giving effect to such distribution, (iv) the operating partnership has at least \$100 million of liquidity, consisting of unrestricted cash on hand and available capacity under the Credit Agreement or any replacement thereof, and (v) the operating partnership is in compliance with the other protective provisions in the OpCo LPA Amendment.

## **J. Equity (Deficit)**

### Ferrellgas Partners

#### *Reverse Unit Split*

On the Effective Date, Ferrellgas Partners effected a 1-for-20 reverse unit split in which holders of its then-outstanding common units received one Class A Unit for every 20 common units held. No fractional Class A Units were issued in connection with the reverse unit split. If, as a result of the reverse unit split, a unitholder would otherwise have been entitled to a fractional Class A Unit, the number of Class A Units such unitholder received was rounded up or down to the nearest whole Class A Unit, with a fraction of one-half or less being rounded down. The reverse unit split resulted in a reduction of our previously outstanding common units from 97,152,665 common units to 4,857,605 Class A Units. All references to common units and per unit data for all periods presented in the accompanying consolidated financial statements and notes thereto have been adjusted to reflect the reverse unit split on a retroactive basis.

#### *Class B Units*

On the Effective Date, Ferrellgas Partners issued 1.3 million Class B Units to the holders of the Ferrellgas Partners Notes in exchange for such holders' contribution of the Ferrellgas Partners Notes to Ferrellgas Partners as a capital contribution and in satisfaction of such holders' claims in respect of the Ferrellgas Partners Notes. The terms of the Class B Units are set forth in the Amended Ferrellgas Partners LPA entered into by the general partner on the Effective Date.

Ferrellgas Partners may, subject to certain conditions, issue additional Class A Units to such parties as determined at the discretion of Ferrellgas Partners, upon consent by the holders of the requisite percentage of Class B Units as specified in the Amended Ferrellgas Partners LPA (the "Requisite Class B Units"), which refers to: (i) if the initial majority holder of Class B Units holds at least 50% of Class B Units, holders of at least 50% of the outstanding Class B Units, or (ii) if the initial majority holder of Class B Units holds less than 50% of Class B Units, holders of at least one-third of the outstanding Class B Units.

Pursuant to the Amended Ferrellgas Partners LPA, while any Class B Units remain outstanding, any distributions by Ferrellgas Partners to its partners must be made such that the ratio of (i) the amount of distributions made to holders of Class B Units to (ii) the amount of distributions made to holders of Class A Units and the general partner is not less than 6:1.

## [Table of Contents](#)

Once holders of Class B Units receive distributions in the aggregate amount of \$357.0 million (which was the outstanding principal amount of the Ferrellgas Partners Notes), the Class B Units will be (i) convertible into Class A Units at the option of Ferrellgas Partners, if that distribution threshold is reached prior to the fifth anniversary of the Effective Date, or (ii) converted automatically into Class A Units, if the distribution threshold is reached on or after the fifth anniversary of the Effective Date, in each case at the applicable conversion rate set forth in the following table:

<i>Year Post-Emergence</i>	<i>Conversion Factor</i>
Year 1	1.75x
Year 2	2.00x
Year 3	3.50x
Year 4	4.00x
Year 5	5.00x
Year 6	6.00x
Year 7	7.00x
Year 8	10.00x
Year 9	12.00x
Year 10	25.00x

In the first five years after the Effective Date, Ferrellgas Partners may redeem the Class B Units, in full, at a price equal to an amount that will result in an internal rate of return with respect to the Class B Units equal to the sum of (i) 300 basis points and (ii) the internal rate of return for the Preferred Units as specified in the Amended Ferrellgas Partners LPA, subject to the minimum redemption price of \$302.08 per unit, less any cash distributed prior to the redemption, if called in the first year after issuance. The total internal rate of return in respect of the Class B Units required to redeem the Class B Units is 15.85%, but that amount increases under certain circumstances, including if the operating partnership paid distributions on the Preferred Units in-kind rather than in cash for a certain number of quarters.

During the first five years following the Effective Date, after Ferrellgas Partners has distributed \$356 million in distributions to holders of the Class B Units, Ferrellgas Partners will have the option to hold cash for six months at either Ferrellgas Partners or Ferrellgas Partners Finance Corp. for the sole purpose of redeeming the Class B Units. However, if the funds held are not used to redeem the Class B Units, the funds must either be distributed to holders of the Class B Units and, if applicable, holders of the Class A Units and the general partner or returned to the operating partnership.

Ferrellgas Partners will only be able to redeem the Class B Units to the extent it receives sufficient distributions from the operating partnership, and the operating partnership is limited in its ability to make distributions by the indentures that govern the 2026 Notes and the 2029 Notes, the Credit Agreement and the OpCo LPA Amendment governing the Preferred Units.

The holders of Class B Units will have the right to acquire the general partner interests in Ferrellgas Partners and the operating partnership, without the approval of the general partner, Ferrellgas Partners, the holders of the Class A Units or the operating partnership, if the Class B Units are still outstanding and have not been converted to Class A Units by the earlier of (i) a material breach of the covenants in favor of the Class B Units under the Amended Ferrellgas Partners LPA or the Amended OpCo LPA that is not cured within the time period specified therein and (ii) the 10th anniversary of the Effective Date.

### *Board Rights*

The holders of Class B Units will be permitted to designate one independent director to the Board of the general partner in accordance with a voting agreement among the general partner, Ferrell Companies, Inc. ("FCI"), the sole stockholder of the general partner, and the holders of the Class B Units and the general partner's bylaws.

---

## Table of Contents

### *Fair Value*

The fair value of Class B Units approximates the carrying value of the principal and interest of the Ferrellgas Partners Notes of \$385.0 million as of March 31, 2021. During the year ended July 31, 2021, a \$5.1 million gain on extinguishment was recognized in connection with the difference between the book value and fair value of the Class B Units as of July 31, 2021.

### *Class A Units*

As of July 31, 2022 and 2021, Class A Units were beneficially owned by the following:

	<u>July 31, 2022</u>	<u>July 31, 2021</u>
Public Class A Unitholders <sup>(1)</sup>	3,480,621	3,480,621
Ferrell Companies <sup>(2)</sup>	1,126,468	1,126,468
FCI Trading Corp. <sup>(3)</sup>	9,784	9,784
Ferrell Propane, Inc. <sup>(4)</sup>	2,560	2,560
James E. Ferrell <sup>(5)</sup>	238,172	238,172

- (1) These Class A Units are traded on the OTC Pink Market under the symbol “FGPR”.
- (2) Ferrell Companies is the owner of the general partner and an approximate 23% direct owner of Ferrellgas Partners’ Class A Units and thus a related party. Ferrell Companies also beneficially owns 9,784 and 2,560 Class A Units of Ferrellgas Partners held by FCI Trading Corp. (“FCI Trading”) and Ferrell Propane, Inc. (“Ferrell Propane”), respectively, bringing Ferrell Companies’ total beneficial ownership of Class A Units to 23.4%.
- (3) FCI Trading is an affiliate of the general partner and thus a related party.
- (4) Ferrell Propane is controlled by the general partner and thus a related party.
- (5) James E. Ferrell is the Chief Executive Officer and President of our general partner; and is the Chairman of the Board of Directors of our general partner and a related party. JEF Capital Management owns 237,942 of these Class A Units and is owned by the James E. Ferrell Revocable Trust Two and other family trusts, all of which James E. Ferrell and/or his family members are the trustees and beneficiaries. James E. Ferrell holds all voting common stock of JEF Capital Management. The remaining 230 Class A Units are held by Ferrell Resources Holdings, Inc., which is wholly-owned by the James E. Ferrell Revocable Trust One, for which James E. Ferrell is the trustee and sole beneficiary.

Together these Class A Units represent (i) a 99% limited partner economic interest in Ferrellgas Partners, excluding the economic interest attributable to the Class B Units, and (ii) an effective 98% economic interest in the operating partnership, excluding the economic interests attributable to the Class B Units and the Preferred Units. In liquidation, allocations and distributions will be made in accordance with each Class A Unitholder’s positive capital account.

The Class A Units of Ferrellgas Partners represent limited partner interests in Ferrellgas Partners, which give the holders thereof the right to participate in distributions made by Ferrellgas Partners, subject to the rights of holders of Class B Units, and to exercise the other rights or privileges available to such holders under the Amended Ferrellgas Partners LPA. Under the terms of the Amended Ferrellgas Partners LPA, holders of Class A Units have limited voting rights on matters affecting the business of Ferrellgas Partners. Generally, persons or groups owning 20% or more of Ferrellgas Partners’ outstanding Class A Units cannot vote any of their Class A Units in excess of the 20% threshold. However, this limitation does not apply under certain circumstances and does not apply to Class A Units owned by Ferrell Companies, our general partner and its affiliates, and this limitation expires on the later of (a) five years after the Effective Date and (b) the conversion of the Class B Units to Class A Units.

The Amended Ferrellgas Partners LPA allows the general partner to issue an unlimited number of additional general and limited partner interests of Ferrellgas Partners for such consideration and on such terms and conditions as shall be established by the general partner without the approval of any Class A Unitholders.

---

## [Table of Contents](#)

### *Partnership distributions*

Ferrellgas Partners did not declare or pay any distributions to its Class A Unitholders or the general partner during the years ended July 31, 2022 and 2021. Ferrellgas Partners made aggregate cash distributions of approximately \$100.0 million to its Class B Unitholders during the year ended July 31, 2022. See [Note R – Net loss per unitholders' interest](#) for additional information.

### *Accumulated other comprehensive income (loss) ("AOCI")*

See [Note N – Derivative instruments](#) and hedging activities – for details regarding changes in fair value on risk management financial derivatives recorded within AOCI for the years ended July 31, 2022 and 2021.

### *General partner's commitment to maintain its capital account*

Ferrellgas' partnership agreements allow the general partner to have an option to maintain its effective 2% general partner interest (excluding the interest attributable to the Class B Units and the Preferred Units) concurrent with the issuance of other additional equity.

During fiscal 2022 and 2021, the general partner made non-cash contributions of \$63.0 thousand and \$65.0 thousand, respectively, to Ferrellgas to maintain its effective 2% general partner interest.

### The operating partnership

#### *Partnership distributions:*

The operating partnership has recognized the following distributions:

	For the year ended July 31,		
	2022	2021	2020
Ferrellgas Partners	\$119,216	\$ —	\$ 15,496
General partner	—	—	158

See additional discussions about transactions with related parties in Note O – Transactions with related parties.

### *Accumulated other comprehensive income (loss) ("AOCI")*

See [Note N – Derivative instruments](#) and hedging activities – for details regarding changes in fair value on risk management financial derivatives recorded within AOCI for the years ended July 31, 2022 and 2021.

### *General partner's commitment to maintain its capital account*

Ferrellgas, L.P.'s partnership agreement allows the general partner to have an option to maintain its 1.0101% general partner interest (excluding the interest attributable to the Preferred Units) concurrent with the issuance of other additional equity.

During fiscal 2022 and 2021, the general partner made non-cash contributions of \$32.0 thousand to the operating partnership to maintain its 1.0101% general partner interest.

## **K. Leases**

Ferrellgas has lease agreements with lease and non-lease components, which are generally accounted for as a single lease component. Variable lease components include lease payments with payment escalation based on the Consumer Price Index, and other variable items, such as common area maintenance and taxes.

Key assumptions include the discount rate, the impact of purchase options and renewal options on Ferrellgas' lease term, as well as the assessment of residual value guarantees.

[Table of Contents](#)

Ferrellgas' transportation equipment leases generally have purchase options. However, in most circumstances Ferrellgas is not certain if it will exercise the purchase option at lease inception. As circumstances dictate, it may instead return the existing equipment to the lessor and sign a new lease. Ferrellgas' transportation equipment leases often contain residual value guarantees, but they are not reflected in Ferrellgas' lease liabilities as its lease rates are such that residual value guarantees are not expected to be owed at the end of its leases.

Ferrellgas' real estate leases will often have an option to extend the lease, but it is typically not reasonably certain of exercising extension options. As customer demand changes over time, Ferrellgas typically maintains the ability to move to more advantageous locations, relocate to other leased and owned locations, or discontinue service from particular locations.

The following table provides the operating and financing ROU assets and lease liabilities as of July 31, 2022 and 2021:

<b>Leases</b>	<b>Classification</b>	<b>July 31, 2022</b>	<b>July 31, 2021</b>
<b>Assets</b>			
Operating lease assets	Operating lease right-of-use assets	\$ 72,888	\$ 87,611
Financing lease assets	Other assets, net	31,421	34,858
Total leased assets		\$ 104,309	\$ 122,469
<b>Liabilities</b>			
<b>Current</b>			
Operating	Current operating lease liabilities	\$ 25,824	\$ 25,363
Financing	Other current liabilities	6,581	7,479
<b>Noncurrent</b>			
Operating	Operating lease liabilities	47,231	74,349
Financing	Other liabilities	25,309	28,029
Total leased liabilities		\$ 104,945	\$ 135,220

[Table of Contents](#)

The following table provides the lease expenses for the years ended July 31, 2022, 2021 and 2020:

<b>Leases expense</b>	<b>Classification</b>	<b>2022</b>	<b>2021</b>	<b>2020</b>
Operating lease expense	Operating expense - personnel, vehicle, plant and other	\$ 6,832	\$ 7,695	\$ 7,450
	Operating expense - equipment lease expense	20,291	26,127	30,994
	Cost of sales - propane and other gas liquids sales	1,630	1,911	1,553
	General and administrative expense	1,587	437	1,490
Total operating lease expense		30,340	36,170	41,487
Short-term expense	Operating expense - personnel, vehicle, plant and other	9,231	8,151	7,188
	General and administrative expense	271	576	502
Total short-term expense		9,502	8,727	7,690
Variable lease expense	Operating expense - personnel, vehicle, plant and other	3,096	2,328	2,883
	Operating expense - equipment lease expense	2,162	1,547	1,642
Total variable lease expense		5,258	3,875	4,525
Finance lease expense:				
Amortization of leased assets	Depreciation and amortization expense	6,660	8,878	2,613
Interest on lease liabilities	Interest expense	2,905	3,755	1,060
Total finance lease expense		9,565	12,633	3,673
Total lease expense		\$ 54,665	\$ 61,405	\$ 57,375

Minimum annual payments under existing operating and finance lease liabilities as of July 31, 2022 are as follows:

<b>Maturities of lease liabilities</b>	<b>Operating leases</b>	<b>Finance leases</b>	<b>Total</b>
2023	\$ 28,487	\$ 8,886	\$ 37,373
2024	22,399	8,541	30,940
2025	15,668	8,376	24,044
2026	6,035	7,528	13,563
2027	2,551	4,959	7,510
Thereafter	15,322	295	15,617
Total lease payments	\$ 90,462	\$ 38,585	\$ 129,047
Less: Imputed interest	(17,407)	(6,695)	(24,102)
Present value of lease liabilities	\$ 73,055	\$ 31,890	\$ 104,945

---

[Table of Contents](#)

The following table represents the weighted-average remaining lease term and discount rate as of July 31, 2022:

Lease type	As of July 31, 2022	
	Weighted-average remaining lease term (years)	Weighted-average discount rate
Operating leases	4.9	7.6%
Finance leases	4.3	8.3%

Cash flow information is presented below:

	For the year ended July 31,		
	2022	2021	2020
Cash paid for amounts included in the measurement of lease liabilities for operating leases:			
Operating cash flows	\$ 32,699	\$ 34,895	\$ 41,636
Cash paid for amounts included in the measurement of lease liabilities for financing leases:			
Operating cash flows	\$ 9,475	\$ 3,396	\$ 1,060
Financing cash flows	\$ 6,545	\$ 7,188	\$ 2,116

## L. Revenue from contracts with customers

Ferrellgas earns revenue from contracts with customers primarily through the distribution of propane, as well as through the sale of propane related equipment and supplies. Revenues from propane and other gas liquids sales are comprised of revenue earned from the delivery of propane to tanks on customers' premises, from the delivery of propane filled cylinders to customers, or from the sale of portable propane tanks to nationwide and local retailers and end use customers. Other revenues primarily include sales of appliances and other materials as well as other fees charged to customers.

### *Contracts with customers*

Ferrellgas' contracts with customers are principally for the bulk delivery of propane to tanks, delivery of propane filled cylinders or the delivery of portable propane tanks to retailers. Ferrellgas sells propane to a wide variety of customers, including residential, industrial/commercial, portable tank exchange, agricultural, wholesale and others. Ferrellgas' performance obligations in these contracts are generally limited to the delivery of propane, and therefore revenues from these contracts are earned at the time product is delivered or, in the case of some of Ferrellgas' portable tank exchange retailers who have consignment agreements, at the time the tanks are sold to the end use customer. Payment is generally due within 30 days. Revenues from sales of propane are included in Propane and other gas liquids sales on the consolidated statements of operations.

Typically, customers are billed upon delivery and payment is generally due within 30 days. With residential customers, Ferrellgas offers customers the ability to spread their annual heating costs over a longer period, typically twelve months. Customers who opt to spread their heating costs over a longer period are referred to as "even-pay" customers.

Ferrellgas charges other amounts to customers associated with the delivery of propane including hazardous materials fees and fuel surcharge fees. In some regions, Ferrellgas also sells appliances and related parts and fittings as well as other retail propane related services. Ferrellgas charges on an annual basis tank and equipment rental charges for customers that are using our equipment to store propane. Other revenues associated with deliveries of propane are earned at the time product is delivered. Revenues associated with sales of appliances and other materials or services are earned at the time of delivery or installation. Revenues associated with tank and equipment rentals are generally recognized on a straight-line basis over one year.

## [Table of Contents](#)

Accounting estimates related to recognition of revenue require that Ferrellgas makes estimates and assumptions about various factors including credits issued for completed sales, future returns and total consideration payable in instances where we have customer incentives payable to the customer.

### *Disaggregation of revenue*

Ferrellgas disaggregates revenues based upon the type of customer and on the type of revenue. The following table presents retail propane revenues, wholesale propane revenues and other revenues. Retail revenues result from sales to end use customers, wholesale revenues result from sales to or through resellers and all other revenues include sales of appliances and other materials, other fees charged to customers and equipment rental charges.

	For the year ended July 31,		
	2022	2021	2020
Retail - Sales to End Users	\$1,446,857	\$1,123,956	\$ 964,087
Wholesale - Sales to Resellers	549,058	516,599	430,435
Other Gas Sales	21,964	28,297	21,269
Other	96,661	85,458	82,035
Propane and related equipment revenues	<u>\$2,114,540</u>	<u>\$1,754,310</u>	<u>\$1,497,826</u>

### *Contract assets and liabilities*

Ferrellgas' performance obligations are generally limited to the delivery of propane for its retail and wholesale contracts. Ferrellgas' performance obligations with respect to sales of appliances and other materials and other revenues are limited to the delivery of the agreed upon good or service. Ferrellgas does not have material performance obligations that are delivered over time, thus all of its revenue is recognized at the time the goods, including propane, are delivered or installed. Ferrellgas offers "even pay" and other billing programs that can create customer deposits or advances, depending on whether Ferrellgas has delivered more propane than the customer has paid for or whether the customer has paid for more propane than what has been delivered. Revenue is recognized from these customer deposits or advances to customers at the time product is delivered. The advance or deposit is considered to be a contract asset or liability. Additionally, from time to time, we have customers that pay in advance for goods or services, and such amounts result in contract liabilities.

Ferrellgas incurs incremental commissions directly related to the acquisition or renewal of customer contracts. The commissions are calculated and paid based upon the number of gallons sold to the acquired or renewed customer. The total amount of commissions that we incur is not material, and the commissions are expensed commensurate with the deliveries to which they relate; therefore, we do not capitalize these costs.

The following table presents the opening and closing balances of our contract assets and contract liabilities:

	July 31, 2022	July 31, 2021
Contract assets	\$ 11,935	\$ 10,074
Contract liabilities		
Deferred revenue <sup>(1)</sup>	\$ 47,929	\$ 49,354

(1) Of the beginning balance of deferred revenue, \$41.5 million was recognized as revenue during the year ended July 31, 2022.

### *Remaining performance obligations*

Ferrellgas' remaining performance obligations are generally limited to situations where customers have remitted payment but have not yet received deliveries of propane. This most commonly occurs in even pay billing programs and Ferrellgas expects that these balances will be recognized within a year or less as the customer takes delivery of propane.

[Table of Contents](#)

**M. Fair value measurements**

*Derivative financial instruments*

The following table presents Ferrellgas' financial assets and financial liabilities that are measured at fair value on a recurring basis for each of the fair value hierarchy levels, including both current and noncurrent portions, as of July 31, 2022 and 2021:

	Asset (Liability)				Total	
	Quoted Prices in Active Markets for Identical Assets and Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)			
<b>July 31, 2022:</b>						
Assets:						
Derivative financial instruments:						
Commodity derivatives	\$ —	\$ 51,267	\$ —	\$ 51,267		
Liabilities:						
Derivative financial instruments:						
Commodity derivatives	\$ —	\$ (12,960)	\$ —	\$ (12,960)		
<b>July 31, 2021:</b>						
Assets:						
Derivative financial instruments:						
Commodity derivatives	\$ —	\$ 94,244	\$ —	\$ 94,244		
Liabilities:						
Derivative financial instruments:						
Commodity derivatives	\$ —	\$ (4,458)	\$ —	\$ (4,458)		

*Methodology*

The fair values of Ferrellgas' non-exchange traded commodity derivative contracts are based upon indicative price quotations available through brokers, industry price publications or recent market transactions and related market indicators. There were no transfers between Levels 1, 2, or 3 during the years ended July 31, 2022 and 2021.

*Other financial instruments*

The carrying amounts of other financial instruments included in current assets and current liabilities (except for current maturities of long-term debt) approximate their fair values because of their short-term nature. At July 31, 2022 and July 31, 2021, the estimated fair value of Ferrellgas' long-term debt instruments was \$1,327.8 million and \$1,466.4 million, respectively. Ferrellgas estimates the fair value of long-term debt based on quoted market prices. The fair value of Ferrellgas' consolidated debt obligations is a Level 2 valuation based on the observable inputs used for similar liabilities.

Ferrellgas has other financial instruments such as trade accounts receivable which could expose it to concentrations of credit risk. The credit risk from trade accounts receivable is limited because of a large customer base which extends across many different U.S. markets.

**N. Derivative instruments and hedging activities**

Ferrellgas is exposed to certain market risks related to its ongoing business operations. These risks include exposure to changing commodity prices as well as fluctuations in interest rates. Ferrellgas utilizes derivative instruments to manage its exposure to fluctuations in commodity prices. Of these, the propane commodity derivative instruments are designated as cash flow hedges.

---

[Table of Contents](#)

*Derivative instruments and hedging activity*

During the year ended July 31, 2022 and 2021, Ferrellgas did not recognize any gain or loss in earnings related to hedge ineffectiveness and did not exclude any component of financial derivative contract gains or losses from the assessment of hedge effectiveness related to commodity cash flow hedges.

The following tables provide a summary of the fair value of derivatives within Ferrellgas' consolidated balance sheets as of July 31, 2022 and 2021:

Derivative Instrument	Final Maturity Date	July 31, 2022			
		Asset Derivatives Location	Fair value	Liability Derivatives Location	Fair value
Derivatives designated as hedging instruments	December 2024				
Commodity derivatives-propane		Price risk management asset	\$43,015	Other current liabilities	\$11,840
Commodity derivatives-propane		Other assets, net	8,252	Other liabilities	1,120
		Total	\$51,267	Total	\$12,960

Derivative Instrument	Final Maturity Date	July 31, 2021			
		Asset Derivatives Location	Fair value	Liability Derivatives Location	Fair value
Derivatives designated as hedging instruments	December 2023				
Commodity derivatives-propane		Price risk management asset	\$78,001	Other current liabilities	\$ 3,429
Commodity derivatives-propane		Other assets, net	16,243	Other liabilities	1,029
		Total	\$94,244	Total	\$ 4,458

Ferrellgas' exchange traded commodity derivative contracts require cash margin deposit as collateral for contracts that are in a negative mark-to-market position. These cash margin deposits will be returned if mark-to-market conditions improve or will be applied against cash settlement when the contracts are settled. Liabilities represent cash margin deposits received by Ferrellgas for contracts that are in a positive mark-to-market position. The following tables provide a summary of cash margin balances as of July 31, 2022 and July 31, 2021, respectively:

Description	July 31, 2022			
	Assets		Liabilities	
	Location	Amount	Location	Amount
Margin Balances				
Prepaid expense and other current assets		\$12,338	Other current liabilities	\$32,805
Other assets, net		4,797	Other liabilities	7,110
		<u>\$17,135</u>		<u>\$39,915</u>

Description	July 31, 2021			
	Assets		Liabilities	
	Location	Amount	Location	Amount
Margin Balances				
Prepaid expense and other current assets		\$21,068	Other current liabilities	\$79,178
Other assets, net		3,036	Other liabilities	15,489
		<u>\$24,104</u>		<u>\$94,667</u>

[Table of Contents](#)

The following tables provide a summary of the effect on Ferrellgas' consolidated statements of comprehensive income (loss) for the years ended July 31, 2022, 2021 and 2020 due to derivatives designated as cash flow hedging instruments:

Derivative Instrument	For the year ended July 31, 2022			
	Amount of Gain Recognized in AOCI	Location of Gain Reclassified from AOCI into Income	Amount of Gain Reclassified from AOCI into Income

Commodity derivatives	\$ (22,872)	Cost of sales - propane and other gas liquids sales	\$ (35,315)	\$ —

*Accumulated other comprehensive income (loss)*

Ferrellgas partners

The changes in derivatives included in AOCI for the years ended July 31, 2022, 2021 and 2020 were as follows:

Gains and losses on derivatives included in AOCI	For the year ended July 31,		
	2022	2021	2020
Beginning balance attributable to Ferrellgas Partners, L.P.	\$ 88,866	\$ (2,303)	\$ (14,756)
Change in value of risk management commodity derivatives	68,950	136,351	(22,872)
Reclassification of (gains) losses on commodity hedges to cost of sales - propane and other gas liquids sales, net	(120,429)	(44,252)	35,315
Less: amount attributable to noncontrolling interests	520	(930)	10
Ending balance attributable to Ferrellgas Partners, L.P.	\$ 37,907	\$ 88,866	\$ (2,303)

The operating partnership

The changes in derivatives included in AOCI for the years ended July 31, 2022, 2021 and 2020 were as follows:

Gains and losses on derivatives included in AOCI	For the year ended July 31,		
	2022	2021	2020
Beginning balance	\$ 89,786	\$ (2,313)	\$ (14,756)
Change in value of risk management commodity derivatives	68,950	136,351	(22,872)
Reclassification of (gains) losses on commodity hedges to cost of sales - propane and other gas liquids sales, net	(120,429)	(44,252)	35,315
Ending balance	\$ 38,307	\$ 89,786	\$ (2,313)

Ferrellgas expects to reclassify net earnings of approximately \$31.2 million to earnings during the next 12 months. These net earnings are expected to be offset by increased margins on propane sales commitments Ferrellgas has with its customers that qualify for the normal purchase normal sale exception.

## [Table of Contents](#)

During the years ended July 31, 2022, 2021 and 2020, Ferrellgas had no reclassifications to operations resulting from the discontinuance of any cash flow hedges arising from the probability of the original forecasted transactions not occurring within the originally specified period of time defined within the hedging relationship.

As of July 31, 2022, Ferrellgas had financial derivative contracts covering 4.8 million barrels of propane that were entered into as cash flow hedges of forward and forecasted purchases of propane.

### *Derivative financial instruments credit risk*

Ferrellgas is exposed to credit loss in the event of nonperformance by counterparties to derivative financial and commodity instruments. Ferrellgas' counterparties principally consist of major energy companies and major U.S. financial institutions. Ferrellgas maintains credit policies with regard to its counterparties that it believes reduces its overall credit risk. These policies include evaluating and monitoring counterparties' financial condition, including their credit ratings, and entering into agreements with counterparties that govern credit limits. Certain of these agreements call for the posting of collateral by the counterparty or by Ferrellgas in the forms of letters of credit, parent guarantees or cash. Ferrellgas has concentrations of credit risk associated with derivative financial instruments held by certain derivative financial instrument counterparties. If these counterparties that make up the concentration failed to perform according to the terms of their contracts at July 31, 2022, the maximum amount of loss due to credit risk that Ferrellgas would incur based upon the gross fair values of the derivative financial instruments is zero.

From time to time Ferrellgas enters into derivative contracts that have credit-risk-related contingent features which dictate credit limits based upon Ferrellgas' debt rating. There were no open derivative contracts with credit-risk-related contingent features as of July 31, 2022.

## **O. Transactions with related parties**

Ferrellgas has no employees and is managed and controlled by its general partner. Pursuant to Ferrellgas' partnership agreements, the general partner is entitled to reimbursement for all direct and indirect expenses incurred or payments it makes on behalf of Ferrellgas and all other necessary or appropriate expenses allocable to Ferrellgas or otherwise reasonably incurred by its general partner in connection with operating Ferrellgas' business. These costs primarily include compensation and benefits paid to employees of the general partner who perform services on Ferrellgas' behalf and are reported in the consolidated statements of operations as follows:

	For the year ended July 31,		
	2022	2021	2020
Operating expense	\$275,326	\$260,831	\$260,427
General and administrative expense	\$ 28,943	\$ 34,899	\$ 29,859

See additional discussions about transactions with the general partner and related parties in [Note J – Equity \(Deficit\)](#).

### *Term loan credit agreement between Ferrellgas Partners and the operating partnership*

On January 8, 2021, Ferrellgas Partners entered into a term loan credit agreement with the operating partnership, pursuant to which the operating partnership extended to Ferrellgas Partners an unsecured, non-amortizing term loan in the aggregate principal amount of \$19.9 million. The term loan bore interest at a rate of 20% per annum, and all interest on the term loan was added to the outstanding principal amount of the term loan. The term loan was scheduled to mature on July 1, 2022. During July 2021, Ferrellgas Partners made an optional prepayment of \$9.0 million principal amount of the term loan. On May 16, 2022, Ferrellgas Partners repaid the operating partnership the full amount of the term loan of \$15.3 million, which represented the outstanding principal and accrued interest. Additionally, Ferrellgas Partners paid the operating partnership \$3.9 million for separate intercompany receivables related to expenses incurred during the 2021 debt transactions.

## [Table of Contents](#)

### **P. Contingencies and commitments**

#### *Litigation*

Ferrellgas' operations are subject to all operating hazards and risks normally incidental to handling, storing, transporting and otherwise providing for use by consumers of combustible liquids such as propane and, prior to the sales of midstream operations in fiscal 2018, crude oil. As a result, at any given time, we can be threatened with or named as a defendant in various lawsuits arising in the ordinary course of business. Other than as discussed below, we are not a party to any legal proceedings other than various claims and lawsuits arising in the ordinary course of business. It is not possible to determine the ultimate disposition of these matters; however, management is of the opinion that there are no known claims or contingent claims that are reasonably expected to have a material adverse effect on our consolidated financial condition, results of operations and cash flows.

Ferrellgas and Bridger Logistics, LLC ("Bridger"), have been named, along with two former officers ("Rios and Gamboa"), in a lawsuit (the "EDPA Lawsuit") filed by Eddystone Rail Company ("Eddystone") on February 2, 2017 in the U.S. District Court for the Eastern District of Pennsylvania (the "Court"). Eddystone indicated that it has prevailed in or settled an arbitration against Jamex Transfer Services ("JTS"), previously named Bridger Transfer Services, a former subsidiary of Bridger. The arbitration involved a claim against JTS for money due for deficiency payments under a contract for the use of an Eddystone facility used to offload crude from rail onto barges. Eddystone alleges that Ferrellgas transferred assets out of JTS prior to the sale of the membership interest in JTS to Jamex Transfer Holdings, and that those transfers should be avoided so that the assets can be used to satisfy the amount owed by JTS to Eddystone as a result of the arbitration. Eddystone also alleges that JTS was an "alter ego" of Bridger and Ferrellgas and that Bridger and Ferrellgas breached both an implicit contract as well as fiduciary duties allegedly owed to Eddystone as a creditor of JTS. Ferrellgas believes that Ferrellgas and Bridger have valid defenses to these claims and to Eddystone's primary claim against JTS for breach of contract. If Eddystone ultimately prevails, however, Ferrellgas believes that the amount of damages awarded could be material to Ferrellgas. Ferrellgas intends to vigorously defend this claim.

The Court decided summary judgment motions in March 2022 and the segmented bench trial was completed in September 2022. The second and third segments are set to take place in December 2022 and February 2023, respectively. Management does not currently believe a loss is probable or reasonably estimable at this time. However, we may enter into settlement discussions at any time.

On August 24, 2017, Ferrellgas filed a third-party complaint against JTS, Jamex Transfer Holdings, and other related persons and entities (the "Third-Party Defendants"), asserting claims for breach of contract, indemnification of any losses in the EDPA Lawsuit, tortious interference with contract, and contribution. On June 25, 2018, Ferrellgas entered into an agreement with the Third-Party Defendants which, among other things, resulted in a dismissal of the claims against the Third-Party Defendants from the lawsuit.

On December 10, 2021, the Court dismissed Eddystone's claims against Rios and Gamboa, pursuant to a settlement agreement with Eddystone.

#### *Long-term debt-related commitments*

Ferrellgas has long and short-term payment obligations under agreements such as the indentures governing our senior notes. See [Note H – Debt](#) – for a description of these debt obligations and a schedule of future maturities.

### **Q. Employee benefits**

Ferrellgas has no employees and is managed and controlled by its general partner. Ferrellgas assumes all liabilities, which include specific liabilities related to the following employee benefit plans for the benefit of the officers and employees of the general partner.

## [Table of Contents](#)

Ferrell Companies makes contributions to the employee stock ownership trust (the “Trust”), which causes a portion of the shares of Ferrell Companies owned by the Trust to be allocated to employees’ accounts over time. The allocation of Ferrell Companies’ shares to employee accounts causes a non-cash compensation charge to be incurred by Ferrellgas, equivalent to the fair value of such shares allocated. This non-cash compensation charge is reported separately in Ferrellgas’ consolidated statements of operations and thus is excluded from operating and general and administrative expenses. The non-cash compensation charges were \$3.2 million, \$3.2 million and \$2.9 million during fiscal 2022, 2021 and 2020, respectively. Ferrellgas is not obligated to fund or make contributions to the Trust.

The general partner and its parent, Ferrell Companies, have a defined contribution 401(k) investment plan which covers substantially all employees. The plan, which qualifies under section 401(k) of the Internal Revenue Code, also provides for matching contributions under a cash or deferred arrangement based upon participant salaries and employee contributions to the plan. Matching contributions, net of forfeitures, for fiscal 2022, 2021 and 2020 were \$5.4 million, \$4.0 million and \$4.8 million, respectively.

The general partner terminated its defined benefit plan on December 15, 2018 and distributed account balances to participants in the form of lump sum payments or annuity contracts in September, 2019. The defined benefit plan trust account was closed and all remaining funds were rolled into the Ferrell Companies, Inc. Employee Stock Ownership Trust as a plan contribution in December 2019. Prior to termination, this plan provided participants who were covered under a previously terminated plan with a guaranteed retirement benefit at least equal to the benefit they would have received under the prior terminated plan. Until July 31, 1999, benefits under the terminated plan were determined by years of credited service and salary levels. As of July 31, 1999, years of credited service and salary levels were frozen. The general partner’s prior funding policy for this plan was to contribute amounts deductible for Federal income tax purposes and invest the plan assets primarily in corporate stocks and bonds, U.S. Treasury bonds and short-term cash investments. During fiscal 2020, other comprehensive income and other liabilities were adjusted by (\$0.1) million. There were no adjustments in fiscal 2021 or 2022 related to this terminated plan.

### **R. Net loss per Unitholders’ interest**

Below is a calculation of the basic and diluted net loss per Class A Unitholders’ interest in the consolidated statements of operations for the periods indicated. In accordance with guidance issued by the FASB regarding participating securities and the two-class method, Ferrellgas calculates net loss per Class A Unitholders’ interest for each period presented according to distributions declared and participation rights in undistributed earnings, as if all of the earnings or loss for the period had been distributed. Due to the seasonality of Ferrellgas’ business, the dilutive effect of the two-class method typically impacts only the three months ended January 31.

There was not a dilutive effect resulting from this guidance on basic and diluted net loss per Class A Unitholders’ interest for fiscal 2022, 2021 and 2020.

In periods with net losses, the allocation of the net losses to the limited partners and the general partner will be determined based on the same allocation basis specified in Ferrellgas Partners’ partnership agreement that would apply to periods in which there were no undistributed earnings. Additionally, in periods with net losses, there are no dilutive securities.

	For the year ended July 31,		
	2022	2021	2020
Net earnings (loss) attributable to Ferrellgas Partners, L.P.	\$147,993	\$(68,411)	\$(82,499)
Less: Distributions to preferred unitholders	65,287	24,024	—
Less: Distribution to Class B unitholders	99,996	—	—
Less: General partner's interest in net earnings (loss)	1,480	(684)	(825)
Undistributed net loss attributable to Class A unitholders	\$ (18,770)	\$(91,751)	\$(81,674)
Weighted average Class A Units outstanding (in thousands)	4,857.6	4,857.6	4,857.6
Basic and diluted net loss per Class A Unit	\$ (3.86)	\$(18.89)	\$(16.81)

[Table of Contents](#)

*Class B Units considerations*

The Class B Units meet the definition of a participating security and the two-class method is required. For any periods in which earnings are recognized, the earnings will be allocated between the Class B Units and the Class A Units on a six-to-one basis. For any periods in which losses are recognized, no effect is given to the Class B Units as they do not contractually participate in the losses of Ferrellgas.

In addition, Ferrellgas has the option to redeem all, but not less than all, of the Class B Units outstanding at any time on or prior to the fifth anniversary of the Effective Date for cash. This call option does not impact the dilutive effect of net loss per Class A Unit due to the cash-only redemption provision, which is assumed, and therefore there would be no dilutive effect.

**S. Subsequent events**

Ferrellgas has evaluated events and transactions occurring after the balance sheet date through the date Ferrellgas' consolidated financial statements were issued and concluded that there were no events or transactions occurring during this period that required recognition or disclosure in its consolidated financial statements, except as follows.

On August 17, 2022, Ferrellgas closed on the acquisition of Brown's Gas, an independent propane distributor based in California, for a cash purchase price of \$7.5 million.

## **REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

Board of Directors and Shareholders  
Ferrellgas Partners Finance Corp.

### **Opinion on the financial statements**

We have audited the accompanying balance sheets of Ferrellgas Partners Finance Corp. (a Delaware corporation) (the “Company”) as of July 31, 2022 and 2021, the related statements of operations, stockholder’s equity (deficit), and cash flows for each of the three years in the period ended July 31, 2022, and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of July 31, 2022 and 2021, and the results of its operations and its cash flows for each of the three years in the period ended July 31, 2022, in conformity with accounting principles generally accepted in the United States of America.

### **Basis for opinion**

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

### **Critical audit matters**

Critical audit matters are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. We determined that there are no critical audit matters.

[Table of Contents](#)

**FERRELLGAS PARTNERS FINANCE CORP.  
(a wholly-owned subsidiary of Ferrellgas Partners, L.P.)**

**NOTES TO FINANCIAL STATEMENTS**

**A. Formation**

Ferrellgas Partners Finance Corp. (the “Partners Finance Corp.”), a Delaware corporation, was formed on March 28, 1996 and is a wholly-owned subsidiary of Ferrellgas Partners, L.P. (“Ferrellgas Partners”).

Ferrellgas Partners contributed \$1,000 to the Partners Finance Corp. on April 8, 1996 in exchange for 1,000 shares of common stock.

The Partners Finance Corp. has nominal assets, does not conduct any operations and has no employees.

**B. Contingencies and commitments**

The Partners Finance Corp. serves as co-issuer and co-obligor for debt securities of Ferrellgas Partners. At July 31, 2020, the Partners Finance Corp. was liable as co-issuer and co-obligor for the \$357.0 million aggregate principal amount of Ferrellgas Partners’ unsecured senior notes due June 15, 2020, which Ferrellgas Partners failed to repay, and which obligation was only reported on Ferrellgas Partners’ consolidated balance sheet. On March 30, 2021, Ferrellgas Partners issued 1.3 million of its Class B Units in exchange for the holders’ contribution of the Ferrellgas Partners Notes to Ferrellgas Partners as a capital contribution and in satisfaction of such holders’ claims in respect of the Ferrellgas Partners Notes. As of July 31, 2022, Ferrellgas Partners had no debt securities outstanding, and the Partners Finance Corp. therefore was not liable as co-issuer for any such debt securities.

**C. Income taxes**

Income taxes have been computed separately as the Partners Finance Corp. files its own income tax return. Deferred income taxes are provided as a result of temporary differences between financial and tax reporting using the asset/liability method. Deferred income taxes are recognized for the tax consequences of temporary differences between the financial statement carrying amounts and tax basis of existing assets and liabilities.

Due to the inability of the Partners Finance Corp. to utilize the deferred tax benefit of \$8,511 associated with the net operating loss carryforward of \$40,529 generated during and prior to fiscal 2022, a valuation allowance has been provided on the full amount of the deferred tax asset. Accordingly, there is no net deferred tax benefit for fiscal 2022, 2021 or 2020, and there is no net deferred tax asset as of July 31, 2022 and 2021. The net operating loss carryforwards generated after July 31, 2018 are carried forward indefinitely, but are limited to 80% of the taxable income in any one period. The CARES Act temporarily suspends this 80% taxable income limitation, allowing a net operating loss carryforward to fully offset taxable income in tax years beginning before January 1, 2021. The net operating losses generated as of or prior to July 31, 2018 are still subject to prior tax law and will expire at various dates through July 31, 2038.

**D. Subsequent events**

The Partners Finance Corp. has evaluated events and transactions occurring after the balance sheet date through the date the Partners Finance Corp.’s consolidated financial statements were issued, and concluded that there were no events or transactions occurring during this period that required recognition or disclosure in its financial statements.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

Board of Directors and Shareholders  
Ferrellgas Finance Corp.

**Opinion on the financial statements**

We have audited the accompanying balance sheets of Ferrellgas Finance Corp. (a Delaware corporation) (the “Company”) as of July 31, 2022 and 2021, the related statements of operations, stockholder’s equity, and cash flows for each of the three years in the period ended July 31, 2022, and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of July 31, 2022 and 2021, and the results of its operations and its cash flows for each of the three years in the period ended July 31, 2022, in conformity with accounting principles generally accepted in the United States of America.

**Basis for opinion**

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

**Critical audit matters**

Critical audit matters are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. We determined that there are no critical audit matters.

[Table of Contents](#)

**FERRELLGAS FINANCE CORP.  
(a wholly-owned subsidiary of Ferrellgas, L.P.)**

**NOTES TO FINANCIAL STATEMENTS**

**A. Formation**

Ferrellgas Finance Corp. (the “Finance Corp.”), a Delaware corporation, was formed on January 16, 2003 and is a wholly-owned subsidiary of Ferrellgas, L.P. (the “Partnership”).

The Partnership contributed \$1,000 to the Finance Corp. on January 24, 2003 in exchange for 1,000 shares of common stock.

The Finance Corp. has nominal assets, does not conduct any operations and has no employees.

**B. Contingencies and commitments**

The Finance Corp. serves as co-issuer and co-obligor for debt securities of the operating partnership. At July 31, 2020, the Finance Corp. was liable as co-issuer and co-obligor for the operating partnership’s (i) \$500 million aggregate principal amount of unsecured senior notes due 2021, (ii) \$475 million aggregate principal amount of unsecured senior notes due 2022, (iii) \$500 million aggregate principal amount of unsecured senior notes due 2023, and (iv) \$700 million aggregate principal amount of senior secured notes due 2025, which obligations were only reported on the operating partnership’s consolidated balance sheet. The senior notes due 2021, senior notes due 2022, and senior notes due 2023 were redeemed on April 5, 2021, and the senior secured notes due 2025 were redeemed on March 30, 2021. As of July 31, 2022, the Finance Corp. was liable as co-issuer and co-obligor for the operating partnership’s (i) \$650 million aggregate principal amount of unsecured senior notes due 2026 and (ii) \$825 million aggregate principal amount of unsecured senior notes due 2029, each of which were issued on March 30, 2021.

**C. Income taxes**

Income taxes have been computed separately as the Finance Corp. files its own income tax return. Deferred income taxes are provided as a result of temporary differences between financial and tax reporting using the asset/liability method. Deferred income taxes are recognized for the tax consequences of temporary differences between the financial statement carrying amounts and tax basis of existing assets and liabilities.

Due to the inability of the Finance Corp. to utilize the deferred tax benefit of \$22,045 associated with the net operating loss carryforward of \$104,978 generated during and prior to fiscal 2022, a valuation allowance has been provided on the full amount of the deferred tax asset. Accordingly, there is no net deferred tax benefit for fiscal 2022, 2021 or 2020, and there is no net deferred tax asset as of July 31, 2022 and 2021. The net operating loss carryforwards generated after July 31, 2018 are carried forward indefinitely, but are limited to 80% of the taxable income in any one period. The CARES Act temporarily suspends this 80% taxable income limitation, allowing a net operating loss carryforward to fully offset taxable income in tax years beginning before January 1, 2021. The net operating losses generated as of or prior to July 31, 2018 are still subject to prior tax law and will expire at various dates through July 31, 2038.

**D. Subsequent events**

The Finance Corp. has evaluated events and transactions occurring after the balance sheet date through the date the Finance Corp.’s consolidated financial statements were issued, and concluded that there were no events or transactions occurring during this period that required recognition or disclosure in its financial statements.

**Schedule II**

**FERRELLGAS PARTNERS, L.P. AND SUBSIDIARIES**  
**VALUATION AND QUALIFYING ACCOUNTS**  
**(in thousands)**

Description	Balance at beginning of period	Charged to cost and expenses	Other	Balance at end of period
<b>Year ended July 31, 2022</b>				
Allowance for doubtful accounts	\$17,256	\$ 1,847	\$(12,411) <sup>(1)</sup>	\$ 6,692
<b>Year ended July 31, 2021</b>				
Allowance for doubtful accounts	\$14,124	\$ 2,323	\$ 809 <sup>(1)</sup>	\$17,256
<b>Year ended July 31, 2020</b>				
Allowance for doubtful accounts	\$ 2,463	\$ 2,279	\$ 9,382 <sup>(1)</sup>	\$14,124

(1) Uncollectible accounts written off, net of recoveries.

As discussed previously, on June 25, 2018, Ferrellgas and Mr. Ballengee entered into an Omnibus Agreement (the “Omnibus Agreement”) that, among other things, included an executed unsecured promissory note in favor of the operating partnership with an original principal amount of \$18.3 million (the “Revised Jamex Promissory Note”). On July 1, 2020, Mr. Ballengee defaulted on the Revised Jamex Promissory Note by failing to make the first payment in the amount of \$2.5 million. As a result, as of July 31, 2020, Ferrellgas recorded a bad debt reserve against \$17.3 million of the Revised Jamex Promissory Note and is pursuing collections from Mr. Ballengee. As of July 31, 2020, \$12.5 million was classified as current notes receivable, all of which is reserved. On January 27, 2021 we reached an agreement with Mr. Ballengee pursuant to which he would execute an additional promissory note for \$2.5 million secured by his assets, separate from the Revised Jamex Promissory Note, and pay \$1.5 million in cash to us. The \$1.5 million cash payment was received on February 1, 2021. In light of these developments, we released \$0.5 million of reserve in our second fiscal quarter of 2021. We deemed it appropriate to keep the \$2.5 million additional promissory note fully reserved.
